(*)Ferramentas informáticas e de comunicación en química

Subject	(*)Ferramentas informáticas e de comunicación en química			
Code	V11G200V01401			
Study programme	(*)Grao en Química			
Descriptors	ECTS Credits	Choose	Year	Quadmester
	6	Mandatory	2nd	2nd
Teaching language	English			
Department				
Coordinator	Pérez Lorenzo, Moisés			
Lecturers	Pérez Lorenzo, Moisés Vaz Araújo, Belén			
E-mail	moisespl@uvigo.es			
Web				
General description	The course aims to familiarize students with the use of chemical information sources (scientific and technical in general) with emphasis on its use through the Internet, as well as with the use of all types of software tools for statistical calculations and chemical modeling . Attention is also paid to the acquisition of important communication skills (writing scientific and technical documents, academic, web design, etc).			

Competencies

Code	
A20	(*)Avaliar, interpretar e sintetizar datos e información química
A29	(*)Demostrar habilidades para os cálculos numéricos e a interpretación dos datos experimentais, con especial énfase na precisión e a exactitude
B2	(*)Comunicarse a nivel básico en inglés no ámbito da Química
B4	(*)Procurar e administrar información procedente de distintas fontes
B5	(*)Utilizar as tecnoloxías da información e das comunicacións e manexar ferramentas informáticas básicas
B6	(*)Manexar as matemáticas, incluíndo aspectos tales como análise de erros, estimacións de ordes de magnitude, uso correcto de unidades e modos de presentación de datos
B7	(*)Aplicar os coñecementos teóricos á práctica
B9	(*)Traballar de forma autónoma
B10	(*) Traballar nun contexto tanto nacional como internacional
B14	(*) Analizar e sintetizar información e obter conclusións
B15	(*)Avaliar de modo crítico e construtivo o entorno e a si mesmo

Learning aims

Expected results from this subject	Training and Learning Results	
To know the different sources of scientific and technical information	A20	B2 B4 B5 B9 B14
To understand the basics of running a Science library and know how to perform an advanced use of its services		B2 B4 B5 B9 B14

To classify scientific journals based on their theme or objective	A20	B2 B5 B9 B10 B15
To know the basic characteristics of other sources: technical reports, conference proceedings, patents, dissertations, government publications, standards, videos, dictionaries, encyclopedias, directories, databases and "handbooks".	A20	B2 B5 B10
To know the basic characteristics of other sources: technical reports, conference proceedings, patents, dissertations, government publications, standards, videos, dictionaries, encyclopedias, directories, databases and "handbooks".	A20	B2 B5 B10
To know the structure and function of an abstracting or indexing service	A20	B2 B5 B10
To know how to use statistical program packages to perform data fitting, graphical and other kinds of statistical analysis	A29	B5 B6 B7 B9 B14

Contents

Topic	
The scientific literature: general aspects.	Structure and classification of the literature. General rules of a literature search. Function, organization and use of a scientific library.
Information Sources	Books. Journals. Technical reports. Conference Proceedings. Patents. Thesis. Government Publications. Standards. Videos. Dictionaries. Directories Encyclopedias Databases
Using Internet	Basic Internet services. Remote connection and file transfer utilities. Search engines. Electronic lists and subscription services. Other services. Structure, function and design of web pages.
Indexing and abstracting services	Identification of a scientific paper. The ISI Web of Knowledge (WOK). The Chemical Abstract Service (CAS) and the Scifinder. Other abstracting services. Handbooks.
Bibliographic Managers	Classification of bibliographic references: general principles. Use of popular software packages: Refworks and Endnote as examples.

Preparation of a scientific, technical or academic document	Parts of a scientific document. References, tables and figures : general principles. Use of computer templates. General aspects of the scientific style and the use of English. How to write: CVs, progress reports, grant requests and other academic documents.
Using Statistical Software	2 and 3D graphics. Statistical Analysis. Data fitting.

Planning

	Class hours	Hours outside the classroom	Total hours
(*) Sesión maxistral	14	28	42
(*) Prácticas en aulas de informática	26	52	78
(*) Resolución de problemas e/ou ejercicios	2	22	24
(*) Probas de resposta longa, de desenvolvemento	1.5	4.5	6

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

	Description
(*) Sesión maxistral	The theoretical aspects of the subject are presented
(*) Prácticas en aulas de informática	Computer lab exercises: literature searches, use of bibliographic managers, use of statistical packages, report writing.
(*) Resolución de problemas e/ou ejercicios	Report or article writing in English language. Simple exercises with modelling software

Personalized attention

Methodologies	Description
(*) Prácticas en aulas de informática	The student is helped by providing adequate guidelines. Since all lectures are given in the computer room, the student will be helped mostly there in a practical and effective way.
Resolución de problemas e/ou ejercicios	The student is helped by providing adequate guidelines. Since all lectures are given in the computer room, the student will be helped mostly there in a practical and effective way.

Assessment

	Description	Qualification
(*) Prácticas en aulas de informática	Typically, literature searches	20
(*) Resolución de problemas e/ou ejercicios	Typically, database searches and use of utilities of modelling software.	40
(*) Probas de resposta longa, de desenvolvemento	Written exam consisting of short questions.	40

Other comments on the Evaluation

Attendance at practical lectures (seminars) is compulsory. The student will be given a rating (0-10) as long as he/she has attended 3 or more seminar sessions, has delivered at least two reports on the exercises or practices proposed by the teacher or has done a written exam.

If the student fails in the first call he/she will be asked to improve some of the exercises or perform new ones provided by the teacher. In addition he/she will have to undergo a more thorough exam, which will weight 50% of the final grade.

Sources of information

Douville, J.A., **The literature of chemistry**, 1st,
Kaplan, S.M., **The English-Spanish Spanish-English dictionary of chemistry**, 1st,
Maizell, R.E., **How to find chemical information: a guide for practising chemists, educators and students**, 3d,

Day, R.A.; Gastel, B., **How to write and publish a scientific paper**, 6th,

References 1,2 and 4, are considered "basic". A list "topic dependent" references (including other web resources and software) will be handed to the student in due course.
