Contents					
Торіс					
Chapter 1 I	NTRODUCTION	1. Electromagn	etic waves in the v	acuum and in th	e matter.
		2. Laser radiati	0n. Etho locor rodiation	-	
Chamber 2 F		3. Properties of	the laser radiation	1.	
Chapter 2 E	ASICS	1. Photons and	energy level diagr	ams. romognotic rodio	tion
		2. Spontaneous		romagnetic raula	luon.
		J. Pupulation II	mission		
		5 Amplification	1111551011. 1		
Chanter 3 C		1 Active medi	ı. ım		
chapter 5. c	on onents of A LASER	2 Excitation m	echanisms		
		3. Feedback me	echanisms.		
		4. Optical cavit	V.		
		5. Exit device.	,		
Chapter 4. T	YPES OF LASER	1. Gas lasers			
		2. Solid-state la	asers		
		3. Diode lasers			
		4. Other lasers.			

Chapter 5. OPTICAL COMPONENTS AND SYSTEMS	1.	Spherical lenses.
	2.	optical centre of a lens.
	3.	Thin lenses. Ray tracing.
	4.	Thin lenses coupling.
	5.	Mirrors.
	6.	Filters.
	7.	OPtical fibers.
Chapter 6. INDUSTRIAL APPLICATIONS	1.	Introduction to laser materials processing
	2.	Introduction to laser cutting and drilling.
	3.	Introduction to laser welding.
	4.	Introduction to laser marking.
	5.	Introduction to laser surface treatments.

Planning			
	Class hours	Hours outside the classroom	Total hours
Laboratory practises	18	30.6	48.6
Master Session	32.5	65	97.5
Long answer tests and development	1.7	0	1.7
Reports / memories of practice	1.9	0	1.9
Short answer tests	0.3	0	0.3
*The information in the planning table is for	guidance only and does no	ot take into account the het	erogeneity of the students.

Methodologies	
	Description
Laboratory practises	Activities of application of the knowledge to specific situations and of acquisition of basic and practical skills related to the matter object of study. They will be developped in the laboratories of industrial applications of the lasers of the EEI.
Master Session	Exhibition on the part of the teacher of the contents on the matter object of study. Exhibition of real cases of application of the laser technology in the industry.

Description	Qualification
The examination will consist of five questions of equal value. Four of them will	70
correspond to the contents of theory and the fifth one to the contents seen in the	
laboratory practices.	
The evaluation of the laboratory practices will be carried out by means of the	20
qualification of the corresponding practice reports.	
During the course there will be carried out a test of follow-up of the subject that will	10
consist of two questions of equal value.	
	Description The examination will consist of five questions of equal value. Four of them will correspond to the contents of theory and the fifth one to the contents seen in the laboratory practices. The evaluation of the laboratory practices will be carried out by means of the qualification of the corresponding practice reports. During the course there will be carried out a test of follow-up of the subject that will consist of two questions of equal value.

Other comments on the Evaluation

If some student was resigning officially the continuous assessment that is carried out by means of the test of follow-up of the subject, the final note would be calculated by the following formula:

(0.8 x Exam qualification) + (0.2 x Practices qualification).

It is mandatory to carry ut the laboratory parctices in order to pass the subject.
