| General description | This subject presents the main specific technological solutions for distributing multimedia contents over telecommunication networks. | | | |

Competencies

| | |
|------|--|
| Code | |
| B3 | CG3: The knowledge of basic subjects and technologies that capacitates the student to learn new methods and technologies, as well as to give him great versatility to confront and update to new situations |
| B6 | CG6: The aptitude to manage mandatory specifications, procedures and laws. |
| C30 | CE30/TEL4 The ability to describe, program, assess and optimize communication protocols and interfaces at different network architecture layers . |
| C33 | CE33/TEL7 The ability to program network and distributed applications and services. |
| D3 | CT3 Awareness of the need for long-life training and continuous quality improvement, showing a flexible, open and ethical attitude toward different opinions and situations, particularly on non-discrimination based on sex, race or religion, as well as respect for fundamental rights, accessibility, etc. |

Learning outcomes

| Expected results from this subject | Training and Learning Results | | |
|---|-------------------------------|-----|-----|
| The comprehension of basic concepts in digital encoding of audio and video. | B3 | | |
| The knowledge of the main standards in the field of digital encoding of audio and video. | B6 | | |
| The knowledge and comprehension of the main problems raised in the transmission of multimedia contents. | B3 | C30 | D3 |
| The knowledge of the main protocols used for the transmission of multimedia contents. | | C30 | |
| The knowledge and comprehension of the main techniques used to provide quality of service in Internet. | B3 | C30 | D3 |
| The ability to analyze and develop VoIP networks. | | C30 | C33 |

Contents

| | |
|-------------------------------------|--|
| Topic | |
| Digital encoding of audio and video | a) Digital audio (PCM). Audio compression b) Digital video. Intraframe and interframes compression |
| Multimedia applications | a) Classes. Quality of service (QoS) requirements b) Impact of delay and packet losses c) Content distribution. Multicast. CDN d) IP telephony: architecture, softphones, softswitches, codecs... |

| | |
|--|---|
| Multimedia protocols | a) Transport protocols: TCP/UDP, RTP, HTTP b) Session protocols: SIP, H.323, RTSP c) Adaptive streaming |
| Providing quality of service in Internet | a) Monitoring and policing techniques b) Scheduling and resource allocation c) Differentiated Services (DiffServ) d) Integrated Services (IntServ). RSVP |

Planning

| | Class hours | Hours outside the classroom | Total hours |
|------------------------------------|-------------|-----------------------------|-------------|
| Master Session | 20 | 40 | 60 |
| Practice in computer rooms | 12 | 18 | 30 |
| Tutored works | 6 | 24 | 30 |
| Troubleshooting and / or exercises | 1 | 5 | 6 |
| Jobs and projects | 1 | 5 | 6 |
| Troubleshooting and / or exercises | 2 | 16 | 18 |

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

| | Description |
|----------------------------|---|
| Master Session | Exhibition of the ideas, concepts and techniques of each topic of the course. In these sessions, students must acquire competences CG3, CG6, CE30 and CT3. |
| Practice in computer rooms | Practical learning of basic tools for the distribution of multimedia contents on computer networks. In these sessions, students must acquire competences CE30 and CE33. |
| Tutored works | Configuration, under the supervision of professors, of a basic IP PBX. This work should help students to acquire competence CE33. |

Personalized attention

Methodologies Description

| | |
|----------------|--|
| Master Session | It will be dispensed individually attention during the hours of tutoring. No appointment is necessary. |
|----------------|--|

Assessment

| | Description | Qualification | Training and Learning Results |
|------------------------------------|--|---------------|-------------------------------|
| Troubleshooting and / or exercises | Partial exam covering some of the contents of the subject. Questions and problems of conceptual, logical, analytical or applied character. One hour long written exercise. | 20 | B3 C30 B6 |
| Jobs and projects | Evaluation of the features and performance of the IP PBX configured by the student during the course. | 20 | C33 |
| Troubleshooting and / or exercises | Final exam covering all the contents of the subject. Questions and problems of conceptual, logical, analytical or applied character. Two hour long written exercise. | 60 | B3 C30 B6 |

Other comments on the Evaluation

Two different systems of evaluation will be offered to the students: continuous evaluation and evaluation at the end of the course.

Students opting for continuous evaluation must take two intermediate tasks: a short exam around week 5 of the course (20% of the final mark) and a project involving the configuration of a basic IP PBX around week 13 of the course (20% of the final mark), together with a final written exam at the end of the course (60% of the final mark). Both intermediate tasks are not recoverable and will be only valid for the current course.

Students can also opt for being evaluated by means of just a final written exam at the end of the course. The final mark of the subject will be, in this case, just the mark obtained in this exam.

It will be considered that a student opts for continuous evaluation if he takes the short exam or the project proposed. The final exam can contain some additional questions for those students that have opted by the evaluation at the end of the course.

If plagiarism is detected in any of the tasks proposed (exams or project), the involved students will be failed with a final mark of 0.

Those students that have not passed the subject in first call will have to take an extra written exam in July. Those students that opted for continuous evaluation will be able to choose between evaluation by means of just the final exam or keep continuous evaluation, in which case they would keep the marks obtained in the intermediate tasks (short exam and project) and only would have to take the final exam as the last task. Students will indicate which of these two options choose at the final exam.
