

IDENTIFYING DATA

(*)Sistemas Radio en Banda Ancha

Subject	(*)Sistemas Radio en Banda Ancha			
Code	V05M145V01312			
Study programme	(*)Máster Universitario en Enxeñaría de Telecomunicación			
Descriptors	ECTS Credits	Choose	Year	Quadmester
	5	Optional	2nd	1st
Teaching language	English			
Department				
Coordinator	García Sánchez, Manuel			
Lecturers	García Sánchez, Manuel Santalla del Río, María Verónica			
E-mail	manuel.garciasanchez@uvigo.es			
Web	http://www.faitic.uvigo.es			
General description	Wideband radio systems.			

Competencies

Code	
C19	CE19/RAD2 Ability to perform theoretical design, experimental band systems measurement and practical implementation broadband for current applications

Learning outcomes

Expected results from this subject	Training and Learning Results
Theoretical and experimental knowledge of wideband systems	C19
Knowledge of designs of wideband active and passive elements	C19
Fundamentals of wideband signal generation and reception	C19
Fundamentals of wideband signal measurement	C19

Contents

Topic	
Introduction	Definitions and basic concepts Communication systems Radio systems. Antennas. Radioelectric spectrum. Modulation. Radio channel. Propagation channel.
Description of the radio channel	Free space Undistorted transmission Attenuation. Multipath Fading. Doppler spread. Delay spread. Frequency selective channels.
Mathematical description	Narrowband Statistical amplitude distributions Doppler spectrum Wideband Bello formulation

Channel sounders	Narrowband Doppler. Nyquist limit. Wideband. Frequency domain sounders: VNA Time domain sounders. RF pulse. Sliding correlation sounders. Sounder design and performance assesment. Narrowband sounder with spectrum analyzer 0 span. VNA based sounder. Sliding correlation sounder.
Channel sounders lab	Buliding a wideband sounder to measure the radio channel.
Wideband modulations	Delay spread. Inter symbol interference. Irreducible BER. Frequency hopping; GSM OFDM. Guard interval. Pilot tones. Equalization. PAPR. Amplifiers. DVB-T. CDMA. Processing gain. Noise. Adquisition and tracking. RAKE receiver. 3G. Power control. Cellular breathing.
UWB systems	1. Definition. Specificities. Regulation 2. Channel characteristics. 3. Impulse radio UWB. 4. Multiband OFDM approach to UWB. 5. Applications
UWB radar	1. Fundamentals. 2. Applications: - Ground penetrating radar - Medical imaging
Wideband aand UWB ntennas	1. Wideband antennas. Definition and requirements. 2. Characterization of wideband antennas 3. Examples and applications. 4U WB antennas. Definition and requirements. 5. Characterization of UWB antennas 6. Examples and applications.

Planning

	Class hours	Hours outside the classroom	Total hours
Master Session	20	40	60
Laboratory practises	4	28	32
Tutored works	5	20	25
Short answer tests	1	7	8

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

	Description
Master Session	Master lecture given by the teacher
Laboratory practises	Building and testing wideband radio channel sounders
Tutored works	These are tutorial type classes for discussion and follow-up of the previously assigned project.

Personalized attention

Methodologies	Description
Master Session	The students will have the opportunity to ask their doubts and questions during the learning activities, attending to scheduled meetings with the lecturer, or by means of email
Laboratory practises	The students will have the opportunity to ask their doubts and questions during the learning activities, attending to scheduled meetings with the lecturer, or by means of email
Tutored works	The students will have the opportunity to ask their doubts and questions during the learning activities, attending to scheduled meetings with the lecturer, or by means of email

Assessment

	Description	Qualification	Training and Learning Results
Master Session	Short answer test	60	C19
Laboratory practises	Report	20	C19
Tutored works	Work report	20	C19

Other comments on the Evaluation

First call:

Following the guidelines of the master we offer to the students two schemes of evaluation: continuous assessment and final assessment. The students will have to opt by one of the two schemes before a given date.

Second call: just final exam.
