

IDENTIFYING DATA

Physics: Physics 2

Subject	Physics: Physics 2			
Code	O07G410V01202			
Study programme	(*)Grao en Enxeñaría Aeroespacial			
Descriptors	ECTS Credits	Choose	Year	Quadmester
	6	Basic education	1st	2nd
Teaching language	Spanish			
Department				
Coordinator	Michinel Álvarez, Humberto Javier			
Lecturers	Michinel Álvarez, Humberto Javier Salgueiro Piñeiro, Jose Ramon Tommasini, Daniele			
E-mail	hmichinel@uvigo.es			
Web	http://optics.uvigo.es			
General description	Physics II is a subject fundamentally devoted to endow to the student of the training and basic competitions in the areas of electromagnetism and introduction to the thermodynamics, covering the theoretical and practical aspects of both.			

Competencies

Code	
A1	(*)Que os estudantes demostrasen posuír e comprender coñecementos nunha área de estudo que parte da base da educación secundaria xeral, e adóitase atopar a un nivel que, aínda que se apoia en libros de texto avanzados, inclúe tamén algúns aspectos que implican coñecementos procedentes da vangarda do seu campo de estudo
B2	(*)Planificación, redacción, dirección e xestión de proxectos, cálculo e fabricación no ámbito da enxeñaría aeronáutica que teñan por obxecto, de acordo cos coñecementos adquiridos segundo o establecido no apartado 5 da orde CIN/308/2009, os vehículos aeroespaciais, os sistemas de propulsión aeroespacial, os materiais aeroespaciais, as infraestruturas aeroportuarias, as infraestruturas de aeronavegación e calquera sistema de xestión do espazo, do tráfico e do transporte aéreo.
C2	(*)Comprensión e dominio dos conceptos básicos sobre as leis xerais da mecánica, termodinámica, campos e ondas e electromagnetismo e a súa aplicación para a resolución de problemas propios da enxeñaría.
D1	(*)Capacidade de análise, organización e planificación
D3	(*)Capacidade de comunicación oral e escrita na lingua nativa
D4	(*)Capacidade de aprendizaxe autónoma e xestión da información
D5	(*)Capacidade de resolución de problemas e toma de decisións
D6	(*)Capacidade de comunicación interpersoal
D8	(*)Capacidade de razoamento crítico e autocrítico

Learning outcomes

Expected results from this subject	Training and Learning Results			
	A1	B2	C2	D1
Knowledge, understanding, of the basic principles of Physics and its application to the analysis and to the resolution of engineering problems.				D1 D3 D4 D5 D6 D8
Knowledge, understanding and application of the principles of the electromagnetism, including electrostatics, magnetostatics and Maxwell's equations.	A1		C2	D5 D8
Knowledge, understanding and application of the general laws of the classical Thermodynamics, including the concept of thermodynamic balance and the thermodynamic magnitudes.			C2	D5 D8

Contents

Topic

Introduction to Thermodynamics.	Temperature and pressure. Heat and Work. Internal energy. First Principle of the Thermodynamics. Heat Capacity. Perfect gas. Reversible and irreversible processes. Thermal machines. Thermodynamic cycles. Second Principle of the Thermodynamics.
Electrostatics.	Historical introduction. Charge and charge density. Conductive media. Field, Potential and electrostatic energy. Gauss' law. Poisson and Laplace equations. Multipolar expansion of fields. Dielectrics, Displacement vector. Boundary conditions of the fields.
Electrical current and Magnetostatics.	Electrical current. Circuits (DC) Equation of continuity. Lorentz's force. Magnetic induction. Circuits (AC). Particle motion in electromagnetic fields. Biot-Savart law. Ampere law. Magnetic dipoles, magnetic moment. Macroscopic media, magnetic field vector. Boundary conditions of the fields.
Introduction to the Electrodynamics.	Faraday's law. Electromagnetic energy. Maxwell's displacement current. Maxwell's equations. Vector and scalar magnetic potential. Electromagnetic waves.

Planning

	Class hours	Hours outside the classroom	Total hours
Master Session	19	28.5	47.5
Laboratory practises	12	15	27
Troubleshooting and / or exercises	7	7	14
Introductory activities	1.5	0	1.5
Seminars	20	30	50
Multiple choice tests	3	0	3
Long answer tests and development	4	0	4
Troubleshooting and / or exercises	2	0	2
Reports / memories of practice	1	0	1

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

	Description
Master Session	Classes of an hour of length in which the professor exposes the main theoretical concepts of the subject.
Laboratory practises	Development of experiments in the laboratory, illustrating the main theoretical concepts developed previously in the master sessions.
Troubleshooting and / or exercises	Resolution of practical exercises by the professor, similar to those to be solved by the student.
Introductory activities	Introduction of the subject and the teachers. Presentation of the laboratory.
Seminars	Resolution of selected problems by part of the professor, in relation with the theoretical concepts developed previously in the master sessions.

Personalized attention

Methodologies	Description
Laboratory practises	The professor explains individually the development of the practices to do in the laboratory.
Master Session	The professor supervises individually the correct assimilation of the theoretical concepts developed in the master sessions.
Seminars	The professor supervises individually the correct resolution of the problems proposed in the classes of seminars.
Introductory activities	Presentation of the subject and the teacher. Presentation of the laboratory.
Troubleshooting and / or exercises	The professor solves exercises of a similar level of difficulty as those to be addressed by the student in an autonomous way.

Assessment					
	Description	Qualification	Training and Learning Results		
Multiple choice tests	Examination type test of between 30 and 50 multioption questions.	20	A1	B2	C2
Long answer tests and development	Examination of between 3 and 10 questions to be developed individually by the student.	30		C2	D1 D3 D8
Troubleshooting and / or exercises	Examination of problems with multiple sections to be solved individually by the student in a limited time.	30		C2	D1 D5
Reports / memories of practice	Presentation and oral exhibition if it was necessary of the reports about the laboratory experiments.	20		C2	D1 D3 D4 D5 D6 D8
