

IDENTIFYING DATA

Mathematics: Calculus 1

Subject	Mathematics: Calculus 1			
Code	O07G410V01101			
Study programme	(*)Grao en Enxeñaría Aeroespacial			
Descriptors	ECTS Credits	Choose	Year	Quadmester
	6	Basic education	1st	1st
Teaching language	Galician			
Department				
Coordinator	Area Carracedo, Iván Carlos			
Lecturers	Area Carracedo, Iván Carlos			
E-mail	area@uvigo.es			
Web	http://area.webs.uvigo.es			
General description	The aim of this course is that the student acquires the techniques of differential calculus both in one and several variables, and integral calculus in one variables, necessary both for other courses of the degree and for professional practice.			

Competencies

Code	
A1	(*)Que os estudantes demostrasen posuír e comprender coñecementos nunha área de estudo que parte da base da educación secundaria xeral, e adóitase atopar a un nivel que, aínda que se apoia en libros de texto avanzados, inclúe tamén algúns aspectos que implican coñecementos procedentes da vangarda do seu campo de estudo
B2	(*)Planificación, redacción, dirección e xestión de proxectos, cálculo e fabricación no ámbito da enxeñaría aeronáutica que teñan por obxecto, de acordo cos coñecementos adquiridos segundo o establecido no apartado 5 da orde CIN/308/2009, os vehículos aeroespaciais, os sistemas de propulsión aeroespacial, os materiais aeroespaciais, as infraestruturas aeroportuarias, as infraestruturas de aeronavegación e calquera sistema de xestión do espazo, do tráfico e do transporte aéreo.
C1	(*)Capacidade para a resolución dos problemas matemáticos que poidan exporse na enxeñaría. Aptitude para aplicar os coñecementos sobre: álgebra lineal; xeometría; xeometría diferencial; cálculo diferencial e integral; ecuacións diferenciais e en derivadas parciais; métodos numéricos; *algorítmica numérica; estatística e optimización.
C32	(*)Coñecemento adecuado e aplicado á Enxeñaría de: Os métodos de cálculo e de desenvolvemento dos materiais e sistemas da defensa; o manexo das técnicas experimentais, equipamento e instrumentos de medida propios da disciplina; a simulación numérica dos procesos físico-matemáticos máis significativos; as técnicas de inspección, de control de calidade e de detección de fallos; os métodos e técnicas de reparación máis adecuados.
D1	(*)Capacidade de análise, organización e planificación
D3	(*)Capacidade de comunicación oral e escrita na lingua nativa
D4	(*)Capacidade de aprendizaxe autónoma e xestión da información
D5	(*)Capacidade de resolución de problemas e toma de decisións
D6	(*)Capacidade de comunicación interpersonal
D8	(*)Capacidade de razoamento crítico e autocrítico

Learning outcomes

Expected results from this subject	Training and Learning Results			
Knowledge and understanding of the main concepts and techniques of differential Calculus in one and several variables, as well as of integral Calculus in one variable.	A1	B2	C1	D1
			C32	D3
				D4
				D5
				D6
				D8

Contents

Topic	
Functions of one real variable.	Functions of one real variable. Limits. Continuity.
Differentiability of functions of one real variable. Mean value theorems. Limited expansions and Taylor's formula. Extrema.	Differentiability of functions of one real variable. Mean value theorems. Limited expansions and Taylor's formula. Extrema.
Integration of functions of one real variable	Primitives. Definite integral. Fundamental theorem of calculus. Geometric applications.
Sequences and series.	Sequences and series. Convergence. Numeric series of positive terms. Convergence criteria. Power series.
Functions of several real variables.	The n-dimensional euclidean space. Functions of several real variables. Limits. Continuity. Differentiability. Expansion and Taylor's formula. Relative extrema.

Planning

	Class hours	Hours outside the classroom	Total hours
Master Session	19	28.5	47.5
Troubleshooting and / or exercises	12	15	27
Troubleshooting and / or exercises	3.5	0	3.5
Introductory activities	1	0	1
Others	0	20	20
Laboratory practises	20	25	45
Long answer tests and development	3	3	6

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

	Description
Master Session	The professor will present in the theoretical classes the contents of the subject. Students will have basic reference texts for tracking the subject.
Troubleshooting and / or exercises	The professor will solve problems and exercises manually and the student will have to solve similar exercises to acquire the necessary skills.
Troubleshooting and / or exercises	The professor will solve problems and exercises manually and the student will have to solve similar exercises to acquire the necessary skills.
Introductory activities	Activities to make contact and gather information on the students, and to present the subject.
Others	Recovery activities for students who do not pass the subject at the first opportunity.
Laboratory practises	The professor will solve problems and exercises with computer tools and the student will have to solve similar exercises to acquire the necessary skills.

Personalized attention

Methodologies	Description
Master Session	The professor will personally solve the doubts of students. The doubts will be solved in-person, specially during problems and laboratory lectures and during tutorials, and also by using the remote options available for the course.
Laboratory practises	The professor will personally solve the doubts of students. The doubts will be solved in-person, specially during problems and laboratory lectures and during tutorials, and also by using the remote options available for the course.
Troubleshooting and / or exercises	The professor will personally solve the doubts of students. The doubts will be solved in-person, specially during problems and laboratory lectures and during tutorials, and also by using the remote options available for the course.
Introductory activities	The professor will personally solve the doubts of students. The doubts will be solved in-person, specially during problems and laboratory lectures and during tutorials, and also by using the remote options available for the course.
Others	The professor will personally solve the doubts of students. The doubts will be solved in-person, specially during problems and laboratory lectures and during tutorials, and also by using the remote options available for the course.

Assessment						
	Description	Qualification	Training	and Learning	Results	
Troubleshooting and / or exercises	Written tests and / or work to assess will be made to evaluate solving exercises and / or problems autonomously as well as attendance and active participation.	40	A1	B2	C1 C32	D1 D3 D4 D5 D6 D8
Long answer tests and development	A final exam on the contents of all the course will be made.	60	A1	B2	C1 C32	D1 D3 D4 D5 D8

Other comments on the Evaluation

The evaluation system June-July is the same as in December-January, keeping the corresponding qualifications obtained via troubleshooting and / or exercises and attendance and participation.

The dates of the final exams will be published on the website of the Escola de Enxeñaría Aeronáutica e do Espazo.

Ethical commitment:

"It is expected is that students present an adequate ethical behavior. If a not appropriate ethical behavior is detected (copying, plagiarism, non authorized use of electronic devices, etc.) the student will not meet the requirements to pass the course. In this case the overall rating in the current academic year will be suspense (0.0). If necessary, a new exam to verify the acquisition of skills and knowledge by the student(s) involved could be performed."
