Universida_{de}Vigo

Subject Guide 2016 / 2017

Competencies

Code

B1 Conceptualization and identification of the object of study of the Sciences of the Physical Activity and the Sport.

knowledge of the object of studio of the same: motricity, corporality and corporal practices.

- B2 Knowledge and comprehension of the scientific literature of the area of the physical activity and the sport.
- B9 Knowledge and comprehension of the foundations of the physical exercise, motive game, dance, movement and activities in the nature.
- B11 Knowledge and comprehension of the ethical beginning necessary for the correct professional exercise.
- B12 Application of the technologies of the information and communication (TIC) to the area of the Sciences of the Physical Activity and of the Sport.
- B13 Habits of excellence and quality in the professional exercise.
- B25 Skill of leadership, capacity of interpersonal relation and teamwork.
- B26 Adjustment to new situations, the resolution of problems and the autonomous learning.

Learning outcomes	
Expected results from this subject	Training and Learning Results
Differentiate between the reality and the objects of study. Comprise the function of the epistemology.	B1
Distinguish different types of object of study that can be addressed by CCAFD.	B1
Understand the object of study human motor functions from different perspectives formal and know how to identify their different notes: psychological, somatic, natural, cultural, centripetal and centrifugal.	B9 d
Understand the existence of paradigms or different approaches in the interpretation of the world	B1
and how affect to the scientific knowledge.	B2
	B26

Identify the different paradigmatic currents valid	in the field discipline of the Sciences of the	B1
Physical Activity and the Sport.		
Think different perspectives of social and practic	al understanding on the body and the human	
motricity, known and unknown, hegemonic and i		
Comprise the relation between the language, the		B1
philosophical/conceptions on the corporality hun		В9

Methodologies	
	Description
Master Session	- Oral exhibition with audiovisual support of the conceptual contents
Troubleshooting and / o exercises	r Work led by Professor / a. Participatory group techniques.
Group tutoring	Resolution of doubt, query and tracking of works.
Tutored works	Preparation of a scholarly work. Delimitation of a subject, context, search for resources using databases, and writing the essay. Application of APA style manual.
Case studies / analysis of situations	 Analysis and comprehensive reading of academic and scientific documentation. Compilation and analysis of common knowledge about physical activity and sport through
	different media. - Analysis of the systemic professional field. - Analysis of the systemic configuration of academic degree.
Proceedings	 Discussion programmed on relative situations the scientific delimitation and discipline of the Sciences of the Physical Activity and of the Sport. Discussion programmed on terminological situations and epistemological identity. Critical of news linked with problematic epistemological of the Sciences of the Physical Activity and of the Sport

Personalized attention		
Methodologies	Description	
Tutored works	Supervision and discussion in group and individual tutorials on the work to be performed by students. Discussion and critical reading scheduled.	
Group tutoring	Resolution of doubts, consultation and supervision of works.	

	Description	Qualification	Training and
			Learning Results
Troubleshooting and / or exercises	Attendance and participation in the labs developed in times of groups B.	13	B1 B2 B26

Other comments on the Evaluation

To pass the course is essential to achieve a minimum score of 5 points.

The students "not attending" shall perform the methodologies of "Jobs and Projects" and "Proof Long answer development".

The grants awarded to the same academic year, conserve the qualifications obtained by students. You need to repeat the methodologies required to achieve a minimum of 5 points.
