

IDENTIFYING DATA

Statistics: Introduction to administrative statistics

Subject	Statistics: Introduction to administrative statistics			
Code	P04G091V01202			
Study programme	(*) Grao en Dirección e Xestión Pública			
Descriptors	ECTS Credits 6	Choose	Year 1st	Quadmester 2nd
Teaching language	Spanish Galician English			
Department				
Coordinator	Vidal Puga, Juan José			
Lecturers	Vidal Puga, Juan José			
E-mail	vidalpuga@uvigo.es			
Web	http://vidalpuga.webs.uvigo.es			
General description	Basic notions of statistics are provided for their application in public administration and management			

Competencies

Code

A1	(*) Que os estudantes demostren posuír e comprender coñecementos nunha área de estudo que parte da base da educación secundaria xeral e adoita atoparse a un nivel que, malia se apoiar en libros de texto avanzados, inclúe tamén algúns aspectos que implican coñecementos procedentes da vanguarda do seu campo de estudo.
A2	(*) Que os estudantes saibam aplicar os seus coñecementos ó seu traballo ou vocación dunha forma profesional e posúan as competencias que adoitan demostrarse por medio da elaboración e defensa de argumentos e a resolución de problemas dentro da súa área de estudo.
A3	(*) Que os estudantes teñan a capacidade de reunir e interpretar datos relevantes (normalmente dentro da súa área de estudo) para emitir xuízos que inclúan unha reflexión sobre temas relevantes de índole social, científica ou ética.
A4	(*) Que os estudantes poidan transmitir información, ideas, problemas e solución a un público tanto especializado coma non especializado.
A5	(*) Que os estudantes desenvolvan aquellas habilidades de aprendizaxe necesarias para emprender estudos posteriores cun alto grao de autonomía.
B1	Habilidades en la búsqueda de información, en relación con fuentes de información primarias y secundarias, incluyendo el uso de ordenadores para búsquedas en línea
B2	Capacidad de analizar, sintetizar e integrar conocimientos y enfrentarse a la complejidad de formular juicios con información limitada
B4	Comunicación a través de Internet y, en general, manejo de herramientas multimedia para la comunicación a distancia
B5	Ser capaz de interpretar datos derivados de las observaciones en relación con su significación y relacionarlos con las teorías apropiadas en el ámbito de la dirección y gestión pública
C8	Saber aplicar métodos, modelos y técnicas de datos cualitativos y cuantitativos (estadísticos) para procesos de gestión y dirección pública
D4	Habilidad para la resolución independiente de problemas en relación con información cualitativa y cuantitativa
D5	Capacidad para la toma de decisiones autónoma e independiente
D7	Motivación por la calidad y la mejora continua y la innovación
D9	Capacidad para el razonamiento crítico creativo y el autocriticismo

Learning outcomes

Expected results from this subject

Training and Learning Results

Distinguish and differentiate the basic concepts of the statistical analysis: individual, observation, case, variable, value, category, data, population and sample.	A5	B2	C8	D4
				D9

Classify the variables according to the type of values that can take and the operations that can realise with them.	A1 A3 A5	B2	C8	D4 D9
Identify the basic forms of sampling.	A1 A2 A3	B1		D7 D9
Use on-line questionnaires.	A3 A5	B1 B4	C8	D4 D9
Order, organise and summarise one-dimensional data by tables.	A1 A2 A3 A4 A5	B2 B5	C8	
Illustrate the behaviour of variables by means of suitable graphic representations.	A1 A2 A3 A4	B2 B5	C8	D4 D7 D9
Calculate and interpret the main measures of position, dispersion and form.	A1 A2 A3 A4	B2 B5	C8	D5 D7 D9
Recognise and describe the relation between two variables.	A1 A4	B2 B5	C8	D4 D5 D7 D9
Simple analysis of information: series, formulas and tables.	A1 A4 A5	B2 B5	C8	D5 D7
Basic descriptive analysis of a one-dimensional statistical variable: tables and graphic representations.	A1 A2 A3 A4 A5	B2 B5	C8	
Create tables with data grouped by intervals.	A1 A2 A3 A4 A5	B2 B5	C8	D4
Represent a continuous one-dimensional statistical variable by histograms, area charts and polygons of frequencies.	A1 A3 A4 A5	B2 B5	C8	D4 D7
Simulate a process of sampling.		B2 B5		D4 D5 D7 D9
Represent a discrete numerical variable.	A1 A3 A4 A5	B2 B5	C8	
Calculate the functions for descriptive measures of a quantitative variable.	A1 A2	B2	C8	D4 D7
Create new variables from others already existent.	A1 A2 A5		C8	D4 D7
Descriptive analysis of two statistical variables of continuous quantitative type: graphic representation by means of diagrams of dispersion, calculation and interpretation of the covariance, the coefficient of correlation and the coefficient of determination, and linear prediction.	A1 A2 A4 A5	B2 B5	C8	D4
Use spreadsheets to describe the relation between two qualitative variables: graphic representation by means of charts of bars and of columns grouped and piled, calculation and interpretation of the Chi-square value, the coefficient of association and the coefficient of contingency.	A1 A2 A4	B2 B5	C8	D4 D5 D7 D9
Quote the main organic appearances and legislative of the statistical systems publics in either European, Spanish and Galician levels.	A5			D7

Find and analyse the distinct public statistics from the databases of the European Union, Spain and A3
Galicia.

B1 C8 D4
B2
B4
B5

Contents

Topic

Chapter 1: Population, sample and variables	Basic concepts. Population, sample, types of variables.
Chapter 2: Analysis of one-dimensional data	Tables of frequencies, graphic representations, temporary series, parameters, estimators, main one-dimensional analytical measures (position, dispersion and form).
Chapter 3: Analysis of two-dimensional data	Tables of double entrance, graphic representations, main measures of correlation and association.
Chapter 4: Public statistics	Organisation of the statistical activity in the administrations: local (Galicia), national (Spain) and international (Europe). Legislation. Access and basic manipulation of official database (EuroStat, INEBase, IGE)
Chapter 5: Introduction to Statistical Computing	Introduction to electronic spreadsheets with statistical functions. Resolution of practical cases.

Planning

	Class hours	Hours outside the classroom	Total hours
Introductory activities	1	0	1
Master Session	15	0	15
Troubleshooting and / or exercises	14	0	14
Autonomous troubleshooting and / or exercises	0	85	85
Practice in computer rooms	9	0	9
Autonomous troubleshooting and / or exercises	0	20	20
Short answer tests	3	0	3
Practical tests, real task execution and / or simulated.	3	0	3

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

	Description
Introductory activities	Introductory activities.
Master Session	Contents and theoretical bases of the subject.
Troubleshooting and / or Resolution of problems and/or exercises related with the subject. exercises	Troubleshooting and / or Resolution of problems and/or exercises related with the subject.
Autonomous troubleshooting and / or exercises	Resolution of proposed problems and/or exercises related with the subject.
Practice in computer rooms	Use of computer tools applied to Statistics.
Autonomous troubleshooting and / or exercises	Resolution of proposed problems and/or exercises. The students should upload the answers on time using the eLearning platform.

Personalized attention

Methodologies	Description
Troubleshooting and / or exercises	The exercises realised in class will be corrected in the same session.
Master Session	Very applied.
Practice in computer rooms	Students will practice the contents.
Introductory activities	Presentation at the beginning of the course, where planning, methodology and evaluation will be explained.
Autonomous troubleshooting and / or exercises	Generally, the resolution of the proposed exercises will be available so that the students can check their answers.

Assessment

Description	Qualification	Training and Learning Results

Autonomous troubleshooting and / or exercises	Individual assignments proposed at the theoretical and practical classes.	20	A1 A2 A3 A4 A5	B1 B2 B4 B5	C8	D4 D5 D7 D9
Short answer tests	Evaluation of the theory.	40	A1 A2 A4 A5	B1 B2 B5	C8	D4 D5 D7 D9
Practical tests, real task execution and / or simulated.	Use of computer tools to practice the theory.	40	A5	B1 B2 B4	C8	D4 D5 D7

Other comments on the Evaluation

There will be two midterm exams, in addition to the final exam in the official dates. It is necessary to achieve 3.75 (out of 10) in each one of the midterm exams.

Second call: The second call will be a single exam.

Recommendations

Subjects that continue the syllabus

Social research techniques and methodologies applied to public administrations/P04G091V01604

Other comments

Both in-class and blended learning share the same study plan, whose subjects (from 1st to 4th) help to develop a learning of competencies based in the continuous evaluation.
