

IDENTIFYING DATA

Information Systems

Subject	Information Systems			
Code	V05G300V01644			
Study programme	Degree in Telecommunications Technologies Engineering			
Descriptors	ECTS Credits	Choose	Year	Quadmester
	6	Optional	3rd	2nd
Teaching language	Spanish			
Department				
Coordinator	Ramos Cabrer, Manuel			
Lecturers	Mikic Fonte, Fernando Ariel Ramos Cabrer, Manuel			
E-mail	mramos@uvigo.es			
Web	http://fatic.uvigo.es			
General description	The aim of this subject is to introduce to the student in the main technologies to process and store the information, like central element of the telematic services			

Competencies

Code	
B3	CG3: The knowledge of basic subjects and technologies that enables the student to learn new methods and technologies, as well as to give him great versatility to confront and adapt to new situations
B4	CG4: The ability to solve problems with initiative, to make creative decisions and to communicate and transmit knowledge and skills, understanding the ethical and professional responsibility of the Technical Telecommunication Engineer activity.
B6	CG6: The aptitude to manage mandatory specifications, procedures and laws.
B9	CG9: The ability to work in multidisciplinary groups in a Multilanguage environment and to communicate, in writing and orally, knowledge, procedures, results and ideas related with Telecommunications and Electronics.
C27	CE27/TEL1 The ability to construct, operate and manage telecommunication networks, services, processes and applications considered as systems to receive, transport, represent, process, store, manage and present multimedia information from the computer services point of view.
C29	CE29/TEL3 The ability to build, operate and manage computer services using planning, sizing and analytical tools
D2	CT2 Understanding Engineering within a framework of sustainable development.
D3	CT3 Awareness of the need for long-life training and continuous quality improvement, showing a flexible, open and ethical attitude toward different opinions and situations, particularly on non-discrimination based on sex, race or religion, as well as respect for fundamental rights, accessibility, etc.
D4	CT4 Encourage cooperative work, and skills like communication, organization, planning and acceptance of responsibility in a multilingual and multidisciplinary work environment, which promotes education for equality, peace and respect for fundamental rights.

Learning outcomes

Expected results from this subject	Training and Learning Results		
Know the main mechanisms of organisation of the information for their storage and process.		C27	
Know the main mechanisms of research, recovery and presentation of the information.		C27	
Comprise the concept of metainformación and its main applications in the new telematic services.		C27	
Capacity to design and implement a database using current models.		C29	
Comprise the importance of information management like a basic support element for telematic services.	B3	C29	D3
Skill to select the mechanisms of information management more suitable for a problem.	B4 B6	C27	D2

Contents

Topic	
Introduction and general perspective of the Systems of Information.	<ul style="list-style-type: none"> - Concepts of system of information and database. - Types of systems of information. - Concept of Managing System of Databases. - Models of databases. - The process of design of a database.
Design of Relational Databases: Conceptual Model.	<ul style="list-style-type: none"> - Aims of the conceptual design. - Conceptual models of databases. - The E-A model.
Design of Relational Databases: Logical Model.	<ul style="list-style-type: none"> - Concept of the logical design. - Logical models of databases. - The relational model. - Relational algebra. - Relational calculus. - Normalisation of databases.
Database Management Systems.	<ul style="list-style-type: none"> - Physical storage of the data. - Organisation of data in files. - Indexes and associations. - Management of the integrity of the data. - Consistency. - Concepts related with the security. - Optimisation of queries.
Other information systems.	<ul style="list-style-type: none"> - No relational databases. - Semistructured information Processing. - No-structured information Processing. - Meta-information and information semantics: - Semantic information processing. - Semantic web and ontologies.

Planning

	Class hours	Hours outside the classroom	Total hours
Master Session	20	46	66
Practice in computer rooms	13	26	39
Workshops	5	30	35
Short answer tests	1	0	1
Practical tests, real task execution and / or simulated.	1	0	1
Jobs and projects	2	6	8

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

	Description
Master Session	Presentation of the ideas, concepts, technics and algorithms of each lesson. This activity develops CG3, CG4, CG6, CT2 and CT3 competencies.
Practice in computer rooms	The students will resolve practical problems under supervision of teachers. This activity develops CG4, CT2, CE29 and CE27 competencies.
Workshops	Each group of students will tackle the design and implementation of a software project with half complexity. This task will be realised in successive steps, that will be discussed and validated in the face-to-face sessions. The aim of this methodology is to provide a suitable feedback to improve the proposed solutions. This activity develops CG4, CG9, CT2, CT4 and CE27 competencies.

Personalized attention

Methodologies	Description
Workshops	The professor will be present during the realisation of the workshops, answering all the doubts that can arise to the students.
Practice in computer rooms	The professor will be present during the realisation of the practices, answering all the doubts that can arise to the students.

Master Session In the development of the master sessions, the students will be able to interrupt and formulate all the questions or doubts that can arise them.

Assessment				
	Description	Qualification	Training and Learning Results	
Short answer tests	Proof of theoretical contents exposed in the master classes.	60	B3 B4 B6	D2 D3
Practical tests, real task execution and / or simulated.	Evaluation of the work realised in the sessions of laboratory.	20	B4	C27 D2 C29
Jobs and projects	In the last face-to-face session of workshop, students will deliver and will expose to their mates the design and the proposed solution for their project. This solution will be exposed to debate for students and professors. The professor will do questions for each member of the group, what will allow his individual evaluation.	20	B4 B9	C27 D2 D4

Other comments on the Evaluation

The subject can be surpassed by means of Continuous Evaluation according to the following criteria, having opened the possibility to opt by the No Continuous Evaluation anytime until the beginning of the final examination to celebrate the day fixed to such effect in the official calendar of the EET. All those students that opt by the continuous evaluation will consider presented if they evaluate of the part of the work in Workshops.

Continuous evaluation:

The final note will result of the sum of the corresponding notes to the three following components:

1. Three proofs of type short answer questions to evaluate the contents given in the masterclasses. Each proof will take place in one of the master classes , except the last that will realise in one of the sessions of the Workshop.

Punctuation: Up to 2 points each proof.

2. One Practical Proofs that will realise at the last session of laboratory.

Punctuation: Up to 2 points.

3. Presentation of the Project proposed like work in the sessions of the Workshop.

Punctuation: Up to 2 points.

To pass the subject by Continuous Evaluation will have to give the three following conditions: (i) obtain an equal or upper qualification to 2 points in the group of the tests.; (ii) Upper qualification to 0.75 points in the practical proof; and (iii) to attend all the face-to-face sessions and obtain more than 0 points in the presentation of the project.

No Continuous Evaluation:

By means of an examination on 10 points scheduled in the official calendar of the EET.

Final Call:

It will be governed by the indicated for the No Continuous evaluation.
