General	The aim that pursues with this subject is to form to the student in the thematic relative to the Graphic			
description				
description	in the industrial reality and his basic technicians, enter him to the knowledge of the forms, generation and			
	properties of the geometrical entities more frequent in the technician, including the acquisition of vision and			
	space understanding, initiate him in the study of the appearances of technological character that influence in			
	the Graphic Expression of the Engineering and enter him rationally in the knowledge and application of the			
	Normalisation, so much in his basic appearances as in the specific. The subject will develop so that prepare to			
	the student for the indifferent employment of traditional technicians and of new technologies of the information			
	and communications.			

Competencies

Code

- B3 CG3 Knowledge in basic and technological subjects that will enable students to learn new methods and theories, and provide them the versatility to adapt to new situations.
- B4 CG4 Ability to solve problems with initiative, decision making, creativity, critical thinking and the ability to communicate and transmit knowledge and skills in the field of industrial engineering specializing in Industrial Chemistry.
- B6 CG6 Capacity for handling specifications, regulations and mandatory standards.
- C5 CE5 Capacity for spatial vision and knowledge of the techniques of graphic representation, using traditional methods of metric geometry and descriptive geometry, and through the application of computer-aided design.
- D2 CT2 Problems resolution.
- D5 CT5 Information Management.
- D6 CT6 Application of computer science in the field of study.
- D9 CT9 Apply knowledge.
- D13 CT13 Adaptability to new situations.
- D16 CT16 Critical thinking.

Learning ou	

Expected results from this subject

Training and Learning Results

Purchase the capacity for the abstract reasoning and the establishment of strategies and efficient 83 CS D2 procedures in the resolution of the graphic problems inside the context of the works and own 8 d D16 projects of the engineering. Be the graphic communication between technicians, by means of the realisation and 86 CS D6 interpretation of planes in accordance with the Norms of Technical Drawing, involving the use of D9 the new technologies. Both one work of the participatory and with spirit of "superación. Contents Topic Block 0. Computer-aided drawing 2D. Sketching, and application of Norms Introduction to the Computer-aided Drawing. Surroundings of work. Systems of Coordinates. You order of Madification. You order of Madification. You order of Madification. You order of Madification. You order of Query. Impression and Scales. 0.2. Sketching, and application of Norms I review of previous knowledges. Conical: definitions, focal and main circumferences, tangent line and normal in a point, tangente lines from an external point, own and improper. Tangencies between straight and circumferences and between circumferences (26 cases). Tools of resolution: geometrical places, operations of dilatation and investment and power. Technical curves: Technical curves: Tochoids: definition, traced and tangent line in a point. Other technical curves. System *Diédrico: Foundations. Belongia and Incidence. Parallelism and *Perpendicularidad. Distances, Angles. Operations: Twister, Irradiated and of Revolution, Surfaces: Flat Sections, Development. Introduction: Types of projections. Invariants *proyectivos. System of Bounded Planes: Foundations. Axonometric scales. Types of *axonometrics: Strimétrica, *dimétrica and isometric. System of Paxonometrias: *trimétrica, *dimétrica and isometric. System of Cavalier Perspective: Foundations.	- Know, understand, and apply a body of knowledge about the basics of drawing and standardization of industrial engineering, in its broadest sense, while promoting the development of space capacity.			C5	D6

Block III. Normalisation.

Generalities on the drawing:

- The drawing like language.
- Types of drawings: technicians and artistic.
- Technical drawings: architectural, topographical and industrial.
- Industrial drawing: *Croquis, conjoint diagrams, *despieces and geometrical drawing.

Normalisation of the drawing:

- Advantages of the normalisation.
- Difference between regulation, specification and norm.

Basic normalisation: formats, writing, types of line, scales, etc.

Representation normalised:

- basic Principles of representation. Methods of projection
- Seen. Seen particular: auxiliaries, interrupted, partial, local, turned, etc.
- Courts, Sections and Breaks: Specifications, types of cut, sections (knocked down, displaced), etc.
- *Rayado of courts: types of line, orientation, etc.
- Conventionalisms: symmetrical pieces, repetitive elements, details, intersections, parts *contíguas, etc.

*Acotación:

- General principles of dimensioning.
- Types of *acotación. Classification of the heights.
- Principles of *acotación.
- Elements of *acotación: Lines, extremes of lines, *inscriciones, etc.
- Forms of *acotación: series, parallel, by coordinates, etc.
- *Acotación of particular elements: radios, diameters, spheres, arches, symmetries, chamfers, etc.
- Threads and threaded unions.

Elements of a thread. Threaded elements.

Classification of the threads.

Representation of the threads.

Threads normalised.

- *Acotación Of threaded elements.
- Designation of the threads.

Drawings of group and *despiece:

- Rules and agreements: reference to elements, material, numbering of planes, examples.
- *Acotación Of groups. List of *despiece.

Systems of tolerances and superficial finishings:

- Types of tolerances: dimensional and geometrical.
- Dimensional tolerances: linear and angular.
- Tolerances ISO: qualities, positions, types of adjust, etc.
- Systems of adjust. Examples.

Assessment				
	Description	Qualification	Traini	ng and
			Lear	ning
			Res	ults
Long answer tests	It will realise a final examination that will cover the whole of the contents of	65	B3 C5	D2
and development	the subject, so many theorists like practical, and that they will be able to		B4	D5
	include test type test, questions of reasoning, resolution of problems and			D9
	development of practical cases. It demands reach a minimum qualification			D13
	of 4,0 points on 10 possible to be able to surpass the subject.			D16
Practical tests, real	Along the triannual, in determinate sessions of resolution of problems and	35	B4 C5	D2
task execution and /	exercises will pose problems or exercises for his resolution by the students			D5
or simulated.	and back delivery to the professor, that will evaluate them in accordance			D6
	with the criteria that previously will have communicated to the students.			D9
	·			D13

Other comments on the Evaluation

In second announcement will realise to the student a theoretical proof-practical to evaluate his degree of acquisition of competitions, of analogous characteristics to the final examination, in which to surpass the subject will be necessary to reach a minimum qualification of 5,0 points on 10 possible.

Ethical commitment: It is expected an adequate ethical behaviour of the student. In case of detecting unethical behaviour (copying, plagiarism, unauthorized use of electronic devices, etc.)Â shall be deemed that the student does not meet the requirements for passing the subject. In this case, the overall rating in the current academic year will be Fail (0.0).

Responsible professors of groups:

Group To: Javier *Corralo *Domonte.

Group *B: Carlos *Troncoso *Saracho.

Group C: Antonio Fernández Álvarez.

Group D: Carlos *Troncoso *Saracho.

Group And: Javier *Corralo *Domonte.

Group *F: Paulino Cheerful *Fidalgo.

Group G: Ernesto *Roa Farmyard.

Group *H: Esteban López *Figueroa.

Group I: Faustino *Patiño *Barbeito.

Group *J: Ernesto *Roa Farmyard.

Group *K: Manuel Adán Gómez.

Group L: Faustino *Patiño *Barbeito.
