General description	(*)A economía é unha ciencia social que estuda a produción, a distribución e o consumo de bens e servizos. Analiza como os individuos toman decisións, como interactúan e como inflúen no seu comportamento as institucións e os incentivos. O obxectivo desta materia é sentar as bases dunha linguaxe rigorosa e transmitir os coñecementos económicos básicos para que o alumno aprenda a pensar como un economista. O programa da materia ofrece unha visión panorámica das grandes ideas que se repiten en Economía como o custo de oportunidade, a toma de decisións en termos marxinais, o papel dos incentivos, a eficiencia das asignacións do mercado, e así ata dez principios básicos que constitúen o fundamento da maior parte da análise económica.
