

## IDENTIFYING DATA

### Electrical machines

Subject	Electrical machines			
Code	V12G360V01605			
Study programme	Degree in Industrial Technologies Engineering			
Descriptors	ECTS Credits 6	Choose Mandatory	Year 3rd	Quadmester 2nd
Teaching language	Spanish Galician			
Department				
Coordinator	Prieto Alonso, Manuel Angel			
Lecturers	Novo Ramos, Bernardino Prieto Alonso, Manuel Angel			
E-mail	maprieto@uvigo.es			
Web	<a href="http://faiticuvigo.es">http://faiticuvigo.es</a>			
General description	(* )O obxectivo desta materia é dotar ao alumno dunha formación básica, **tando teórica como práctica, sobre as máquinas eléctricas rotativas, en canto á constitución, modos de funcionamento e aplicacións.			

## Competencies

### Code

B3	CG3 Knowledge in basic and technological subjects that will enable them to learn new methods and theories, and equip them with versatility to adapt to new situations.
C10	CE10 Knowledge and use of the principles of circuit theory and electrical machines.
D1	CT1 Analysis and synthesis.
D2	CT2 Problems resolution.
D6	CT6 Application of computer science in the field of study.
D10	CT10 Self learning and work.
D14	CT14 Creativity.
D16	CT16 Critical thinking.
D17	CT17 Working as a team.
D19	CT19 Personal relationships.

## Learning outcomes

Expected results from this subject

Training and Learning Results

(*)Competencias específicas RI4A.- Ampliación de conocimiento y utilización de los principios de máquinas eléctricas	B3	C10	D1
			D10
			D16
Los resultados esperados del aprendizaje, son los siguientes:			
<input type="checkbox"/> Comprender los aspectos básicos de la constitución y funcionamiento de las máquinas eléctricas clásicas			
<input type="checkbox"/> Conocer el proceso experimental utilizado para la caracterización los distintos tipos de máquinas.			
<input type="checkbox"/> Conocer las aplicaciones industriales de los distintos tipos de máquinas eléctricas.			
<input type="checkbox"/> Conocer las máquinas ""clásicas"" y las ""modernas"".			
Competencias transversales			
CT1.- Capacidad de análisis y síntesis.			
CT2.- Resolución de problemas			
CT6.- Conocimiento de informática relativos al ámbito de estudio			
CP2.- Razonamiento crítico			
CP3.- Trabajo en equipo			
CP5.- Habilidades en las relaciones interpersonales			
CS2.- Aprendizaje autónomo			
CS6.- Creatividad			
Otras:			
X1.- Capacidad de aplicar los conocimientos en la práctica			
X2.- Conocimientos básicos de la profesión			
New	B3	C10	D1

		D14	
		D16	
New	B3	C10	D10

## Contents

### Topic

UNIT I: INTRODUCTION TO THE ELECTRICAL MACHINES	I-1 Electromagnetic and electro-mechanic fundamental laws. General behaviour notes: Physical arrangement of the electrical machines. Types of machines. Losses. Energy balance. Efficiency. Heating. Cooling. Rated power. Insulation types. Degrees of mechanical protection and construction types. Nameplate. I-2 Principles of Construction. Magnetic poles. Neutral line. Pole-pitch. I-3 M.M.F.s and E.M.F.s inside the machine: Fields generated with concentrated and distributed windings. Rotating magnetic field. Winding factor.
UNIT II: INDUCTION MOTORS (ASYNCHRONOUS)	II-1 Three-phase induction machine Construction characteristics. Operating principles. Electrical equivalent circuit. Powers and torques. Electrical tests. Energy balance and efficiency. T-s curve. Operation modes. Starting methods and speed control. II-2 Single-phase induction motor Construction characteristics. Operating principles. Electrical equivalent circuit. Starting methods.
UNIT III: SYNCHRONOUS MACHINES (GENERATORS)	UNIT III: SYNCHRONOUS MACHINES (GENERATORS) Construction characteristics. Operating principles. Armature reaction. Salient poles and cylindrical rotor machines. Electrical equivalent circuit. Stand-alone and grid-connected behaviours. Synchronous motor: Characteristics and uses
UNIT III: SYNCHRONOUS MACHINES (GENERATORS)	Construction characteristics. Operating principles. Armature reaction. Salient poles and cylindrical rotor machines. Electrical equivalent circuit. Stand-alone and grid-connected behaviours. Synchronous motor: Characteristics and uses.
UNIT IV: D.C. MOTORS. SPECIAL MACHINES	IV-1 Construction characteristics. Operating principles. Excitation systems. Armature reaction. Commutation. Armature reaction. Speed control. IV-2 Special machines: Step Motors, PMDC, Reluctance Motors
UNIT V: PROTECTION AND CONTROL OF ELECTRICAL MOTORS	Low voltage switch gear. Electrical machines protection systems.

<b>Planning</b>			
	Class hours	Hours outside the classroom	Total hours
Master Session	32.5	65	97.5
Laboratory practises	10	16	26
Troubleshooting and / or exercises	8	16	24
Multiple choice tests	1	0	1
Troubleshooting and / or exercises	1.5	0	1.5

\*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

<b>Methodologies</b>	
	Description
Master Session	(*) Exposición por parte do profesor dos contidos sobre a materia de máquinas eléctricas.
Laboratory practises	(*) Actividades de aplicación dos coñecementos teóricos a situacíons concretas e de adquisición de habilidades básicas e procedimentales relacionadas coas máquinas eléctricas rotativas. Desenvolverase no laboratorio de máquinas eléctricas correspondente.
Troubleshooting and / or exercises	(*) Actividade na que se formulan problemas e exercicios relacionados coa materia de máquinas eléctricas rotativas. O profesor resolverá problemas tipo de máquinas rotativas e o alumno debe resolver problemas similares.

<b>Personalized attention</b>	
<b>Methodologies</b>	<b>Description</b>
Master Session	Any question can be arised during the lessons. Office hores are also available for the students
Laboratory practises	During the realization of the practical tests any possible question will be solved.
Troubleshooting and / or exercises	All numerical exercices will be solved in this classes. Q and A will be highly recommended.

<b>Assessment</b>		Description	Qualification	Training and Learning Results		
Laboratory practises	The evaluation of the practical laboratory tests will be done in a continuous way (session to session). The evaluation criteria is : - Minimum attendance of 80%. - Punctuality . - Previous preparation of the practical test. - Correct utilization of the material . □Practical tests results. Not attending the lab lessons will imply 0 point in this part. Attendance below 80% will imply 0 point in this part. To pass the whole subject, a mark higher than 40% in this part in mandatory.		10	B3	C10	D1 D2 D10 D14 D16 D17 D19
Troubleshooting and / or exercises	The evaluation of the exercises will be done in a continuous way (session to session). The evaluation criteria is : - Minimum attendance of 80%. - Punctuality . - Previous preparation of the exercise, if required. . □Correct exercise result, if required.		5	B3	C10	D1 D2 D6 D10 D16
Multiple choice tests	The assessment method will be a multiple choice test, to be done individually without the use of any information source. There will be one unique test for the whole subject, and it will cover not only the theoretical lessons but the practical lab tests. A minimum mark of 40% will be required in this part.		55	B3	C10	D1 D6
Troubleshooting and / or exercises	The assessment method will be a numerical resolution of an exercise of electrical machines A minimum mark of 40% will be required in this part.		30	C10	D1 D2 D10 D14 D16	

<b>Other comments on the Evaluation</b>	

Second attempt (July)

If a student does not reach an 80% for the lab lessons or his/her marks are not higher the minimum required, a practical exam will be necessary to pass this part.

To pass the subject a minimum of 5/10 will be required (result of the sum of the 4 subject parts)

**Commitment:** An student ethical behaviour is expected. If not ethical behaviour is detected (copying, cheating in any way, using unlicensed electronic devices, and others), it will be considered that the student does not gather the necessary requirements to pass the subject.

In this case the global qualification in the present academic course will be (0.0). (FAILED)
