General	The subject of "Geriatric Infirmary and palliative car	es" treats to provid	e to the studen	t the knowledge of the			
description	modifications that produce in the individual with the						
accemption	functional but also partner-economic that have in this group of population a signification of sum importance						
	and transcendence, treats equally of the taken care that owe to mete out to the elderly healthy and ill, as well						
	as of the suitable attitude when meting out the *devanditos cares. Also *engloba the palliative cares since the						
	personal perspective, social and familiar and boardi						
	· · · ·	-					
	This subject imparts in the third course of the Degree	ee of Infirmary, and	is a subject *cu	iatrimestral.			

Con	npetencies
Cod	e
A1	Students have demonstrated knowledge and understanding in an area of study that comes from the basis of the general secondary education, and it is often found at a level that, if well supported on advanced text books, it also includes some aspects that involve knowledge from the forefront of their field of study.
A2	Students know how to apply their knowledge to their work or vocation in a professional manner and have the skills that are often demonstrated through the preparation and defense of arguments and the resolution of problems within their area of study.
A3	Students have the capacity to collect and interpret relevant data (normally within their area of study) to make judgments that include a reflection on relevant topics of social, scientific or ethical nature.
A4	Students will be able to convey information, ideas, problems and solutions to specialist and non-specialist audiences
A5	Students have developed those skills needed to undertake further studies with a high degree of autonomy.
B1	To be able, in the field of nursing, to provide a professional and technical health care, appropriate to the health needs of people they assist, in accordance with the state of development of the scientific knowledge of each moment and with the quality and safety levels established in the legal and ethical applicable standards.
B2	To know how to plan and provide nursing care to individuals, families or groups, aimed at health results, evaluating their impact through clinical and care practice guidelines, that describe the processes by which a health problem is diagnosed, treated and looked for.
B3	To know how to apply the foundations and technical and methodological principles of nursing.
B5	To design care systems conducted to individuals, families or groups, assessing its impact and making the necessary modifications.
B6	To apply the nursing interventions on scientific evidence and on the available resources.
B7	To know how to understand, without prejudice, people, considering their physical, psychological and social aspects, as autonomous and independent individuals, ensuring respect for their views, beliefs and values, besides ensuring the right to privacy, through professional confidentiality and secrecy
B9	To promote healthy lifestyles and self-care, supporting the maintenance of preventive and therapeutic behaviours.
B11	To know how to establish effective communication with patients, families, social groups and colleagues. To promote training and information for health.
B14	To establish mechanics of evaluation, taking into account the scientific, technical and quality aspects

- B15 To be able to work with a professional team as the basic unit in which professionals are structured in uni or multidisciplinar and interdisciplinar way and the rest staff of the welfare organizations.
- B18 To apply strategies for means of comfort and care for symptoms, directed to the patient and family, in the implementation of palliative care that contributes to alleviating the situation of patients in advanced or terminal disease situations.
- C8 To apply the technologies and information systems and communication of health care
- C41 To understand changes associated with the aging process and its impact on health.
- C42 To identify structural, functional, psychological and life forms changes, associated with the aging process
- C43 To know the most common health problems in elderly.
- C44 To select care interventions aimed to treat or prevent health problems and its adjustament to everyday life by proximity and support resources to elderly.
- C49 To provide care, guaranteeing the right to dignity, privacy, confidentiality and problem-solving ability of the patient and family.
- C52 To know palliative care and pain control to provide care that soothe the situation of patients in advanced or terminal illness situation.
- D1 Analysis and synthesis ability
- D2 Organization and planning ability
- D3 Information management ability.
- D4 Problem solving and decision making.
- D5 Multidisciplinar and multilingual teamwork
- D6 Skills in interpersonal relationships
- D7 Critical reasoning.
- D8 Autonomous learning.
- D9 Adaptation to new situations. Initiative and entrepreneurial spirit. Creativity
- D10 Motivation for the quality.
- D11 Sensitivity towards environmental issues.

Methodologies	
	Description
-	r Activity in the that formulate problems and/or exercises related with the subject. The student owes
exercises	to develop the suitable or correct solutions by means of it practice of routines, the application of formulas or algorithms, the application of procedures of transformation of the available information and the interpretation of the resulted. It usually employ how supplement of the lesson masterly.
Case studies / analysis of situations	Analysis of a done, problem or real event with the aim to know it, interpreted, resolved, generate hypothesis, contrast data, reflect, complete knowledges, diagnosed and trained in alternative procedures of solution.

Tutored works	The student, of individual way or in group, elaborates a document envelope to thematic of the subject or prepares seminars, investigations, memories, essays, summaries of readings, conferences, etc. Generally it treats of an autonomous activity of the student that includes the research and collected of information, reading and handle of bibliography, editorial Student that includes the research and collected of information, reading and handle of bibliography, editorial
Forum Index	Forums in the that It is proposed the student that think on different concepts of the subject. And in the that the students deepen owes reflexions and think of assertive form envelope the vision of the rest of the mates.
Proceedings	Activities group, in the that the students expose the their ideas and argues them envelope a subject related that subject. Of the same form listen other ideas and argues so as to have different view and therefore it enrich his field of knowledges. The debate will be moderate pole professor to guide and drive the debate inside the field professional.
Seminars	Exhibition by part of the professor of one fear related with the subject and that supplements and enriches the knowledge of the students in relation with the field of the Geriatric Nursing.
Master Session	Exhibition by part of the professor of the contained envelope to subject object of study, theoretical bases and/or guidelines of one work, exercise or project to develop pole student.

Description
The student will owe to resolve exercises proposed that they remitted by mail electronic and that will serve even to keep a discussion *có @docente no that *reflexionará on concepts keys of this *asignatura. Also it will owe to calculate extracting data of the different INE *indices *y *tasas related with the aging in Spain
The student owed to resolve different cases proposed pole professor in group and of individual form related that subjects (determine the cares *más suitable in different clinical situations that manifests in *Xeriatria, know apply scales of *valotrcion of the AVD and envelope the Cognitive state etc)
The student *desenrolará in the kind in group being *tutorizará teaching pole, diverse exercises on active aging, organisation of the taken care in of geriatric centres, etc.
They will establish different forums of discussion, on important concepts in *xeriatría *incluido the field of the taken care palliative

Assessment						
	Description	Qualification			ning a ng Re	
Troubleshooting and or exercises	/ Proof in which the student has to solve a series of problems and/or exercises in a time/condition established/the by the professor. Of this way, the student has to apply the knowledges that purchased.			B3 B14	C42 C43	
Case studies / analysis of situations	Proof in which it presents a situation or problematic already given or that it can give, splitting of the different factors *involucrados, the analysis of the antecedents, conditions, of the situation, etc.		A2 A3 A4	B1 B2 B3 B5 B6 B7 B9 B15 B18	C8 C41 C42 C43	D4
Tutored works	The student presents the result obtained in the preparation of a document on the thematic of the matter, in the preparation of seminars, investigations, memories, essays, summaries of readings, conferences, etc. Can carry out of individual way or in group, of oral form or writing		A2 A3 A4	B2 B3 B5 B6 B7 B9 B14 B15	C8 C41 C42	
Multiple choice tests	Proofs for evaluation of the competitions purchased that include enclosed questions with different alternative of answer (true/false, multiple election, *emparejamiento of elements). The students select an answer between a number limited of possibilities.	-	A3	B7 B9 B14	C41 C42 C43	D1

Short answer tests	Proofs for evaluation of the competitions purchased that include direct questions on a concrete appearance. The students have to answer of direct and brief way in base to the knowledges that have on the matter.	64	A1 B1 A2 B2 A3 B3 A4 B5 A5 B6 B7 B9 B11 B14 B15 B18	C8 C41 C42 C43 C44 C49 C52	D3 D4 D5 D6

Other comments on the Evaluation

*DIA EXAMINATION: WENESDAY 23 MAY 11:00 (2 HOURS)

EVALUATION JULY IT WILL HAVE THE SAME FACTORYS THAT THE ONE OF MAY, DATE OF EXAMINATION - THURSDAY 28 JUNE 12:00
