Other comments on the Evaluation

The theoretical and practical proofs, the works of classroom, tutelado and other activities will be *liberatorias. In the final examination (official) will do the parts that remain pending, in his case. In case of not assisting and not realising the activities, or not realising the corresponding proofs, will do all in the final examination (official). To obtain an approved in the final qualification is NECESSARY CONDITION have surpassed the theoretical and practical proofs. The realisation of the other activities by himself alone, although numerically they allow it, will not be sufficient to achieve the approved final. Of the same way, the approved of the theoretical part-practical will not suffice for the approved final without the realisation and *superación of the other activities

The theoretical proofs and practices will not compensate between yes of face to the final note; it is precise to approve the three parts of independent way. The theoretical contents-practical of each proof will be the following: in the first, the ones of the block 1; in the second, the ones of the block 2; in the third, the ones of the block 3.

To the theoretical partial proofs-practical only will be able to present those students that have delivered a ficha properly cover inside the first month.

In the second announcement, July, and other extraordinary announcements, will have to do a global examination of the matter. They will not conserve the notes of eventual parts approved. Only they will conserve , in case to have realised in the classroom, the qualifications of the activities of the classes *B. Of have not realised these activities, will have to realise in this examination.

All the alumnado, assist or no to the classrooms, has right to be evaluated (by means of an examination or in the way that establish in the educational guide). The same conditions of general evaluation govern for those students that, by some reason, can not assist regularly to class

The dates of the examinations can consult in the page web of the Faculty, in the link <http://feduc.webs.uvigo.es/index.php?id=189,921,0,0,1,0>
