Competencies

Code

- A2 The students known to apply the acquire knowledge and be able to solve problem in new environment or less known in wider contexts (or multidisciplinary) related with their study area.
- A5 The students own the ability of learn to continuos studying, in wide range, on a self-directed and autonomous way.
- B2 Be able to devise, design, put in to practice and adopt a research process rigorously academics in the physical activity, health and sports study ambit.
- B4 Critically analyze, evaluate and synthesize new and complex ideas in the physical activity, health and sports study ambit.
- C2 Develop scientific thoughts capacity to research in the physical activity, health and sports study ambit.
- C4 Show link attitudes with excellence habits, ethical commitment and quality in the research exercise physical activity, health and sports study ambit
- C5 Known and dominant the information search procedures and tools, both en primary and secondary sources in physical activity, health and sports.
- C6 Be able to analyze organized, select, classify and compile information about physical activity, health and sports study
- C7 Assess, manage and combine different techniques of physical activity, health and sports sciences research.
- C9 Be able to design and implement a research work in the physical activity, health and sports study ambit.
- C10 Manage software packages for the introduction and data analyze collected in the physical activity, health and sports study ambit.
- C13 Execute the most used statistical analyzed technique of the physical activity, health and sports research.
- C16 Be able to incorporated new technologies and integrate knowledge from other professional and scientific ambits.
- C21 Develop on a efficient manner own task s of the design, implementation, analyzed and publish work related wit the sports performance ambit.
- D1 Critically assess the knowledge, the technology and the available information to solve problems.
- D2 Effectively communicate in academic and informative ambits ideas and concepts linked with the physical activity, health and sports studies.
- D3 Be able to promote in academic and professional contexts activities to improve the technological advance, social and cultural, in physical activity, health and sports sciences field.

Learning outcomes					
Expected results from this subject		Training and Learning			
			Results		
The student will be able to realise an analysis of the sportive performance in a determinate sport,	A2	В2	C2	D1	
using like variables of study those that have showed to be determinated factors of the	Α5		C4	D3	
performance in this sport			C5	D4	
			C6		
			C7		
			C9		
			C16		
			C21		
The student will be able to interpret the results, giving felt to the most notable findings of his		B2	C2	D1	
research, work and analysis of the data		В4	C10	D2	
			C13	D3	
				D4	

Contents				
Topic				
The scientific method in the analysis in the sports Identification of factors of the performance				
	Hierarchy of the factors of the performance			
Designs of investigation for the analysis of the sports	Designs of investigation for the analysis of the sports of situation			
	Designs of investigation for the analysis of the sports bioenergetics			
Implementation of a design for the analysis of one or several sports	Implement a design of investigation to analyse a concrete sport			
Collected and processing of corresponding data to a design for the analysis of one or several sports	Collected and processing of corresponding data to a design for the analysis of the sport chosen			
Oral communication and written of a design for the analysis of one or several sports	Oral communication and written of the design for the analysis of the sport chosen			

Planning			
	Class hours	Hours outside the classroom	Total hours
Autonomous problem solving	0	100	100
Group tutoring	12	30	42
Seminars	12	30	42
Laboratory practices	70	150	220
Lecturing	6	25	31
Short answer tests	0.5	32	32.5
Essay	0.5	32	32.5

^{*}The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
	Description
Autonomous problem solving	The student will resolve the tasks proposed by the educational
Group tutoring	Discussion in small groups on the contents of the matter
Seminars	
	They will treat specific subjects of form very concentrated
Laboratory practices	They will propose practices of laboratory
Lecturing	Theoretical classes-practical given by the educational

Personalized attention				
Methodologies	Description			
	Will resolve the doubts that can arise to the student on the use of different instruments, methods, designs, etc.			

Assessment		
Description	Qualification	Training and
		Learning Results

Short answer tests	The proof will consist in answering to a battery of ten questions of short answer	25	A5	B4	C2 C4 C6 C7	D1
Essay	The work will consist in the design of a project of investigation related with the analysis of the performance in a determined sport. The student realized a theoretical positioning using the existent bibliography and from ahi developed the aims, hypothesis, and method of a possible design of investigation.	75	A2	B2 B4	C2 C4 C5 C6 C7 C9 C10 C13 C16 C21	D1 D2 D3 D4

Other comments on the Evaluation

The student will have to surpass all the proofs of evaluation to be able to surpass the subject. In case of not having surpassed the *asignatura in the first announcement, the no purchased competitions will be evaluated in the announcement of July. The evaluation in successive announcements will realise of the same forms that the posed initially with the two proofs. The official dates of the examinations can consult in the page web of the faculty of Sciences of the Education and of the Sport http://fcced.uvigo.es
