Mathematics: Mathematics 2

Subject	Mathematics: Mathematics 2			
Code	V11G200V01203			
Study programme	(*)Grao en Química			
Descriptors	ECTS Credits	Choose	Year	Quadmester
	6	Basic education	1st	2nd
Teaching language	Spanish Galician			
Department	Mathematics			
Coordinator	Mirás Calvo, Miguel Ángel Hervés Beloso, Francisco Javier			
Lecturers	Hervés Beloso, Francisco Javier Mirás Calvo, Miguel Ángel			
E-mail	fjherves@uvigo.es mmiras@uvigo.es			
Web	http://http://fatic.uvigo.es/			
General description	This course covers theoretical and practical topics of Calculus (several variables), optimization e statistics. It is intended to improve the student's abilities in comprehension and use of mathematical language. It will also give the student the necessary general computation skills and the basic knowledge of mathematics-oriented software.			

Competencies

Code
A4 Students can communicate information, ideas, problems and solutions to both specialist and non-specialist audiences
C22 Process and perform computational calculations with chemical information and chemical data
C23 Present oral and written scientific material and scientific arguments to a specialized audience
C29 Demonstrate skills for numerical calculations and interpretation of experimental data, with special emphasis on precision and accuracy
D1 Communicate orally and in writing in at least one of the official languages of the University
D3 Learn independently
D4 Search and manage information from different sources
D5 Use information and communication technologies and manage basic computer tools
D6 Use mathematics, including error analysis, estimates of orders of magnitude, correct use of units and data representations
D7 Apply theoretical knowledge in practice
D8 Teamwork
D9 Work independently
D12 Plan and manage time properly
D13 Make decisions
D14 Analyze and synthesize information and draw conclusions
D15 Evaluate critically and constructively the environment and oneself

Learning outcomes

Expected results from this subject	Training and Learning Results	
To relate curves and surfaces with geometrical objects and functions of several variables.	C29	D6 D9
To compute the volume of three-dimensional domains and basic surface integrals as well as using polar, spherical and cylindrical coordinates.	C29	D6
To apply the basic notions and rules of the calculus of several variables.	C29	D3 D6 D9

Differentiating implicitly	C23	D3 D9
To express and solve optimization problems without constraints	C23 C29	D1 D3 D4 D6 D7 D14
To model and solve practical problems using differentiable and integral calculus techniques.	C22 C23 C29	D3 D6 D7 D9 D12 D13 D14
To use an appropriate graphic, numerical and symbolical software to solve practical problems of calculus of several variables.	C22 C29	D4 D5 D6 D7 D13 D14
To compute eigenvalues and check whether a matrix is diagonalizable.	C29	D3 D6 D9
To establish the definiteness of a quadratic form.	C29	D3 D6 D9
To use adequate software to solve linear algebra problems.	C22 C29	D3 D4 D5 D6 D7 D9 D12 D13 D14
To perform a descriptive statistical data analysis	C22 C29	D4 D5 D6 D7 D9 D12 D13 D14
To compute probabilities in different spaces and apply the concept of random variable to model real situations.	C23 C29	D3 D6 D9
To use basic statistical software.	C22 C23 C29	D1 D4 D5 D6 D7 D14
To write or make and oral presentation of mathematical concepts.	A4 C23	D1 D3 D4 D5 D8 D12 D13 D14 D15

Contents

Topic

Chapter 1: Eigenvalues and symmetric matrices	Computation of eigenvalues. Diagonalizable matrices. Sign of a quadratic form
---	---

Chapter 2: Calculus of several variables	Intoduction to real functions of several variables. Continuous and differentiable functions. Higher order derivatives. The chain rule. Implicit differentiation. Computation of extreme points
Chapter 3: Multiple integration	Integrals of functions of two and three variables on bounded domains. Polar, spherical and cylindrical coordinates. Surface Integrals
Chapter 4: Basic Statistics	Descriptive statistics Introduction to probability

Planning

	Class hours	Hours outside the classroom	Total hours
Lecturing	20	30	50
Problem solving	26	36	62
Computer practices	6	3	9
Essay questions exam	3	20	23
Laboratory practice	0	6	6

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

	Description
Lecturing	The teachers will lecture on the theoretical foundations of the topics cover in the course; they will present possible applications; they will formulate problems, questions and exercises; and they will propose tasks and activities with orientations on the methods and techniques needed.
Problem solving	In this activity, the students, individually or in group, must solve problems and exercises. The students must be able to find a convincing mathematical model, use the appropriate technique according to the available information and give a sound interpretation of the results.
Computer practices	Activities designed to learn how to use mathematical software to make numerical computations and plotting of functions and data.

Personalized attention

Methodologies	Description
Problem solving	Each student can ask the teachers for advise and guidance related to the contents and activities of the course. They will be attended during tutorial hours.
Computer practices	Questions and doubts related to the computer classes will be attended during tutorial hours.

Assessment

	Description	Qualification	Training and Learning Results
Problem solving	The student must solve some given problems and exercises within the time and under the conditions specified by the teacher. The activities can be of very different types: go out to the blackboard, written assingment, oral presentation, puzzle,...	15	A4 C23 D1 D3 D4 D6 D7 D8 D9 D12 D13 D14 D15
Essay questions exam	Final exam. A formal individual examination consisting on theoretical and practical questions that will take place right after the classes period.	80	C22 D3 C29 D6 D7 D9 D12 D13 D14
Laboratory practice	Practical exercise to evaluate the student degree of knowledge and application of the mathematical software used in the lab clases.	5	C22 D4 C29 D5 D6 D7 D14

Other comments on the Evaluation

Second call (failed subject):

To pass the subject the student must obtain a global score greater or equal than 50% of the possible highest score.

The student who fails the subject in the first call must repeat the final exam in July. The other marks will be maintained.

A final mark or qualification will be assigned to those students who attend any of the final exams.
