General	The aim that pursues with this subject is to form to the student in the thematic relative to the Graphic				
description					
	in the industrial reality and his basic technicians, enter him to the knowledge of the forms, generation and				
	properties of the geometrical entities more frequent in the technician, including the acquisition of vision and space understanding, initiate him in the study of the appearances of technological character that influence in				
	the Graphic Expression of the Engineering and enter him Normalisation, so much in his basic appearances as in th				
	the student for the indifferent employment of traditional				
	and communications.	cermicians and C	n new technologie	3 or the inititiation	
	and communications.				

Competencies

Code

- B3 CG 3. Knowledge in basic and technological subjects that will enable them to learn new methods and theories, and equip them with versatility to adapt to new situations.
- B4 CG 4. Ability to solve problems with initiative, decision making, creativity, critical thinking and to communicate and transmit knowledge, skills and abilities in the field of industrial engineering.
- B6 CG 6 Capacity for handling specifications, regulations and mandatory standards.
- C5 CE5 Capacity for spatial vision and knowledge of the techniques of graphic representation, using traditional methods of metric geometry and descriptive geometry, and through the application of computer-aided design.
- D2 CT2 Problems resolution.
- D6 CT6 Application of computer science in the field of study.
- D9 CT9 Apply knowledge.

Expected results from this subject

Training and Learning
Results

Purchase the capacity for the abstract reasoning and the establishment of strategies and efficient projects of the resolution of the graphic problems inside the context of the works and own projects of the engineering. Use the engineering. Use the engineering. Use the graphic communication between technicians, by means of the realisation and more than of planes in accordance with the Norms of Technical Drawing, involving the use of D9 the new technologies. Assume a favourable attitude to the permanent learning in the profession, showing proactive, B4 D9 participatory and with spirit of improvement. Contents Topic Block 0 Computer-aided drawing 2D. Sketching, and application of Norms. Sketching, and application of Norms. Sketching, and application of Norms. O2. Sketching, and application of Norms or Fervious knowledges. O3. Sketching, and application of Norms I review of previous knowledges. Conical: definitions, focal and main circumferences, tangent line and normal in a point, tangent lines from an external point, own and improper. Tangencies between straight and circumferences and between circumferences (26 cases). Tools of resolution: geometrical places, operations of dilatation and investment and power. Technical curves: Technical curves: Trochoids: definition, traced and tangent line in a point. Other technical curves: Trochoids: definition, traced and tangent line in a point. Other technical curves: Trochoids: definition, traced and tangent line in a point. Other technical curves: Trochoids: definition, traced and tangent line in a point. Other technical curves: Trochoids: definition, traced and tangent line in a point. Other technical curves: Trochoids: definition, traced and tangent line in a point. Other technical curves: Trochoids: definition, traced and tangent line in a point. Other technical curves. Foundations: Belonging and Incidence. Parallelism and *Perpendicularidad. Distances, Angles. Parallelism and *Perpendicularidad. Distances, Angles. *Abatimientos.	- Know, understand, and apply a body of knowledge about the basics of drawing and standardization of industrial engineering, in its broadest sense, while promoting the development of space capacity. Block III. Normalisation.

Generalities on the drawing:

- The drawing like language.
- Types of drawings: technicians and artistic.
- Technical drawings: architectural, topographical and industrial.
- Industrial drawing: *Croquis, conjoint diagrams, *despieces and geometrical drawing.

Normalisation of the drawing:

- Advantages of the normalisation.
- Difference between regulation, specification and norm.

Basic normalisation: formats, writing, types of line, scales, etc.

Representation normalised:

- basic Principles of representation. Methods of projection
- Seen. Seen particular: auxiliaries, interrupted, partial, local, turned, etc.
- Courts, Sections and Breaks: Specifications, types of cut, sections (knocked down, displaced), etc.
- *Rayado of courts: types of line, orientation, etc.
- Conventionalisms: symmetrical pieces, repetitive elements, details, intersections, parts *contíguas, etc.

*Acotación:

- General principles of dimensioning.
- Types of *acotación. Classification of the heights.
- Principles of *acotación.
- Elements of *acotación: Lines, extremes of lines, *inscriciones, etc.
- Forms of *acotación: series, parallel, by coordinates, etc.
- *Acotación of particular elements: radios, diameters, spheres, arches, symmetries, chamfers, etc.
- Threads and threaded unions.

Elements of a thread. Threaded elements.

Classification of the threads.

Representation of the threads.

Threads normalised.

- *Acotación Of threaded elements.
- Designation of the threads.

Drawings of group and *despiece:

- Rules and agreements: reference to elements, material, numbering of planes, examples.
- *Acotación Of groups. List of *despiece.

Systems of tolerances and superficial finishings:

- Types of tolerances: dimensional and geometrical.
- Dimensional tolerances: linear and angular.
- Tolerances ISO: qualities, positions, types of adjust, etc.
- Systems of adjust. Examples.
- Indication of superficial finishings.

Representation of Elements Normalised. Diagrams.

Planning			
	Class hours	Hours outside the classroom	Total hours
Lecturing	38	116	154
Problem solving	34	0	34
Group tutoring	4	0	4
Problem based learning	0	27	27
Essay questions exam	2	0	2
Laboratory practice	4	0	4

^{*}The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
	Description
Lecturing	Active master Session. Each thematic unit will be presented by the professor, complemented with the comments of the students with base in the bibliography assigned or another pertinent.

Problem solving	They will pose exercises and/or problems that will resolve of individual way or *grupal.
Group tutoring	Realisation of activities of reinforcement to the learning by means of the resolution *tutelada of way
	*grupal of practical suppositions linked to the theoretical contents of the subject.
Problem based learning Realisation of activities that require the active participation and the collaboration between	
	students.

Personalized attention		
Methodologies	Description	
Group tutoring		

Assessment				
	Description	Qualification Training and Learning Results		
Essay questions exam	It will realise a final examination that will cover the whole of the contents of the subject, so many theorists like practical, and that they will be able to include test type test, questions of reasoning, resolution of problems and development of practical cases. It demands reach a minimum qualification of 4,0 points on 10 possible to be able to surpass the subject.	65	B3 C5 B4	D2 D9
Laboratory practice	Along the triannual, in determinate sessions of resolution of problems and exercises will pose problems or exercises for his resolution by the students and back delivery to the professor, that will evaluate them in accordance with the criteria that previously will have communicated to the students.	35	B4 C5	D2 D6 D9

Other comments on the Evaluation

In second announcement will realise to the student a theoretical proof-practical to evaluate his degree of acquisition of competitions, of analogous characteristics to the final examination, in which to surpass the *asignatura will be necessary to reach a minimum qualification of 5,0 points on 10 possible.

Ethical commitment: It is expected an adequate ethical behaviour of the student. In case of detecting unethical behaviour (copying, plagiarism, unauthorized use of electronic devices, etc.) shall be deemed that the student does not meet the requirements for passing the subject. In this case, the overall rating in the current academic year will be Fail (0.0).

Responsible professors of groups:

Group To: Javier *Corralo *Domonte.

Group *B: Carlos *Troncoso *Saracho.

Group C: Antonio Fernández Álvarez.

Group D: Carlos *Troncoso *Saracho.

Group G: Ernesto *Roa Farmyard.

Group *H: Esteban López *Figueroa.

Group I: Faustino *Patiño *Barbeito.

Group *J: Ernesto *Roa Farmyard.

Group *K: Manuel Adán Gómez.

Group L: Faustino *Patiño *Barbeito.
