

IDENTIFYING DATA

Technical English I

Subject	Technical English I			
Code	V12G380V01903			
Study programme	Degree in Mechanical Engineering			
Descriptors	ECTS Credits	Choose	Year	Quadmester
	6	Optional	4th	2nd
Teaching language	English			
Department	Filoloxía Inglesa, Francesa e Alemá			
Coordinator	Pérez Paz, María Flor			
Lecturers	Pérez Paz, María Flor			
E-mail	mflor@uvigo.es			
Web	http://faitic.uvigo.es			
General description	<p>This course aims at providing students with a systematic adequacy to develop the appropriate skills for communicating in Technical English at level A2 according to the Common European Framework of Reference for Languages (CEFR).</p> <p>As far as possible, students will be monitored so as to accommodate to each individual needs.</p>			

Competencies

Code	
B10	CG10 Ability to work in a multidisciplinary and multilingual environment.
D1	CT1 Analysis and synthesis
D4	CT4 Oral and written proficiency in a foreign language.
D7	CT7 Ability to organize and plan.
D10	CT10 Self learning and work.
D17	CT17 Working as a team.
D18	CT18 Working in an international context.

Learning outcomes

Expected results from this subject	Training and Learning Results	
To encourage students to use the English language within the engineering context, and the benefits and usefulness of the English language when applying their grammatical, lexical, and cultural knowledge.	B10	D1 D4 D7 D10 D17 D18
To improve students' sense of linguistic awareness of English as a second language, the grammatical and lexical mechanisms and types of expressions.	B10	D1 D4 D7 D10 D17 D18
Improving students' listening and reading skills, as well as their speaking and writing skills.	B10	D1 D4 D7 D10 D17 D18

To upgrade students' grammatical and lexical notions of the English language, and the comprehension of basic Technical English structures.	B10	D1 D4 D7 D10 D17 D18
Promoting students' critical autonomy for the comprehension and understanding of texts, dialogues and oral presentations.	B10	D1 D4 D7 D10 D17 D18

Contents

Topic	
1. English grammar	UNIT 1
2. Vocabulary/Use of English	Reading: Batteries and Flowbatteries.
3. Technical-scientific language	Reading: Parts of a car.
4. Speaking	Speaking: Describing components and materials.
5. Listening	Speaking: Dates, mathematical expressions, web sites and email addresses, chemical formula.
6. Reading comprehension	Listening: Where's that Darn Battery.
7. Writing	Listening: Adsense Making Money Online.
8. Direct and inverse translation of specific parts of the discourse	Grammar: Present Simple.
1. English grammar	UNIT 2
2. Vocabulary/Use of English	Reading: CO2 and the Greenhouse Effect.
3. Technical-scientific language	Reading: Maintaining your Car.
4. Speaking	Speaking: Describing easy shapes and forms, and dimensions.
5. Listening	Listening: Light Pollution.
6. Reading comprehension	Listening: MIT Seeks Moral to the Story of Self-driving Cars.
7. Writing	Writing: Easy paragraph writing.
8. Direct and inverse translation of specific parts of the discourse	Grammar: Passive voice.
1. English grammar	UNIT 3
2. Vocabulary/Use of English	Reading: Job Qualities for an Engineer.
3. Technical-scientific language	Speaking: Expressing one own's qualities, and personal characteristics and abilities.
4. Speaking	Listening: Mobile phones.
5. Listening	Grammar: Relative Clauses.
6. Reading comprehension	Writing: Dividing a text into types of paragraphs.
7. Writing	
8. Direct and inverse translation of specific parts of the discourse	
1. English grammar	UNIT 4
2. Vocabulary/Use of English	Reading: Repairing a Broken Wall Socket.
3. Technical-scientific language	Speaking: Advantages and disadvantages of the different generation power systems.
4. Speaking	Listening: How do Nuclear Power Plants work?
5. Listening	Writing: A report.
6. Reading comprehension	Grammar: Adverbs of sequence; conditional sentences; connectors: contrast, reason, purpose, and result.
7. Writing	
8. Direct and inverse translation of specific parts of the discourse	
1. English grammar	UNIT 5
2. Vocabulary/Use of English	Reading: Windfarms.
3. Technical-scientific language	Speaking: Comparison and contrast.
4. Speaking	Listening: Manipulating Glass Properties.
5. Listening	Listening: IT-related Problems.
6. Reading comprehension	Writing: Letter of Motivation.
7. Writing	Grammar: Verb tenses expressing future; time adverbials; using "enable", "allow", "permit", "make", and "cause".
8. Direct and inverse translation of specific parts of the discourse	

1. English grammar	UNIT 6
2. Vocabulary/Use of English	Reading: Difference Engines.
3. Technical-scientific language	Speaking: Expressing hypothetical future.
4. Speaking	Listening: Industrial Processing of Canned Corn.
5. Listening	Grammar: Order of adjectives.
6. Reading comprehension	
7. Writing	
8. Direct and inverse translation of specific parts of the discourse	

1. English grammar	UNIT 7
2. Vocabulary/Use of English	Reading: Properties of Materials.
3. Technical-scientific language	Reading: Land and Off-shore Windfarms.
4. Speaking	Speaking: Expressing cause and effect.
5. Listening	Listening: Innovations is Great (1).
6. Reading comprehension	Listening: e-trading and e-selling.
7. Writing	Writing: Paragraph divisions for descriptions.
8. Direct and inverse translation of specific parts of the discourse	Grammar: Expressing cause and effect.

1. English grammar	UNIT 8
2. Vocabulary/Use of English	Reading: Superconductivity in Orbit.
3. Technical-scientific language	Speaking: Expressing likelihood.
4. Speaking	Listening: Innovation is Great (2).
5. Listening	Listening: Geothermal Energy.
6. Reading comprehension	Writing: Description of a process.
7. Writing	Grammar: Likelihood.
8. Direct and inverse translation of specific parts of the discourse	

1. English grammar	UNIT 9
2. Vocabulary/Use of English	Reading: Water is Everything.
3. Technical-scientific language	Reading: Man-made Building Materials.
4. Speaking	Speaking: Materials used in industry: purpose and cause.
5. Listening	Listening: Fuel Cells.
6. Reading comprehension	Grammar: Adjectives: present participle, past participle.
7. Writing	
8. Direct and inverse translation of specific parts of the discourse	

Planning

	Class hours	Hours outside the classroom	Total hours
Introductory activities	1	0	1
Classroom jobs	6	15	21
Autonomous problem solving	4	15	19
Group tutoring	2	0	2
Autonomous practices through ICT	8	10	18
Presentation	9	20	29
Others	6	15	21
Short answer tests	6	10	16
Essay	4	15	19
Objective questions exam	4	0	4

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

	Description
Introductory activities	Activities aiming at introducing the subject, establish contact with students, and to gather information about their previous knowledge of the English language.
Classroom jobs	Analysis and problem solving activities in relation to exercises concerning grammar and vocabulary, and communicative skills.
Autonomous problem solving	Activities focused on dealing with problems and/or exercises in relation to this subject. Students develop skills to autonomously analyse and solve problems and/or exercises.
Group tutoring	Tutor and tutees carry out joint reviews for discussing issues concerning the so far course achievements and learning process.
Autonomous practices through ICT	The practice activities in connection to the four communication skills: Listening comprehension, Speaking, Reading comprehension, and Writing, as well as Use of English in Technical English. These activities are done individually or in groups (teamwork).
Presentation	In order to assess communication skills, students, in group or individually, accomplish guided Technical English oral and writing presentations.

Others	Role-play activities whose purpose is to improve students' speaking skill, and to increase their participation in order to prompt the interaction of the group in English.
--------	--

Personalized attention

Methodologies	Description
Introductory activities	General guidance to students on the subject concerning goals and how to achieve them. Exploring motivations and interests of the students. Indications on assignments and exercises to be done during the course, dates of assignment deliveries and the examination dates and how to achieve goals on the subject. Indicating that no tutorial will be done on the telephone or internet (electronic post, Skype, etc.). In case of any doubt, students will have to contact directly with the professor in the classroom or during tutorial hours.
Classroom jobs	Practice of the different exercises in relation to the communicative skills and the linguistic skill.
Group tutoring	By group tutoring we mean tutorials given to students within the classroom and during scheduled tutorials dates and hours. The aims of personalized attention are to concentrate on particular issues concerning individual students by giving them, according to their specific needs, guidance on the subject, the encouragement of strategies in the learning process, giving indications about assignments and exercises, analysing the results obtained in the examinations already done or advice for achieving better outcomes and results.

Assessment

	Description	Qualification	Training and Learning Results
Presentation	Performance of the speaking skill in relation to engineering topics, aimed to consolidate an acceptable fluent communication in English.	32	B10 D1 D4 D7 D10 D17 D18
Others	Evaluations concerning the communicative skill of reading comprehension in relation to engineering topics.	16	B10 D1 D4 D7 D10 D18
Short answer tests	Evaluation of the theoretical concept of the Technical English language and its application. Performance of practical exercises in relation to the linguistic skill (Use of English).	20	B10 D4 D10 D18
Essay	Evaluation of the communicative skill of writing.	16	B10 D1 D4 D7 D10 D18
Objective questions exam	Evaluation of the communicative skill of listening comprehension in relation to topics concerning Technical English.	16	B10 D1 D10 D18

Other comments on the Evaluation

1. Particular considerations

There are two assessment systems. Choosing a system excludes the other.

1.1. Continuous assessment

To qualify under the system of continuous evaluation, students are required to attend 80% of the total lecture hours with academic progress and involvement. Therefore students not attending the total hours of the percentage established will lose this option. Students making use of the continuous evaluation counts 100% in the assessment of their final grade with the course assignments and testings. The failure to complete the assignments requested along the course will be counted as a zero (0.0). The assignments requested must be delivered or submitted by the deadlines and dates marked beforehand.

1.2. Final assessment

Students making use of the only evaluation or final examination sit for examination with a final overall assessment, taking place on the official date established by the School of Industrial Engineering. To this end, students should consult the School web site, where the examination date and time are specified in accordance to students' subject attendance either Campus

or City Centre (Torrecedeira).

2. Final subject assessment result

2.1. Continuous assessment

The final mark for this subject is computed taking into consideration all the skills practiced during the course. Therefore each of them counts as follows: Listening: 16%. Speaking: 32%. Reading: 16%. Writing: 16%. On the other hand, Use of English examination sums up 20%.

So the final mark will be established adding the communicative skills and Use of English tests to sum up 100%, being 5 (five) the mark necessary to obtain a pass in all skills and Use of English tests.

Students, who in the publication of the first assessment record, have scored a non-pass in one or several skills, must retake the part or parts for the corresponding failed skills in the July exam of 2019 to obtain a pass. In case of a second non-pass in July 2019, students must undergo examination for all skills in future courses. Therefore, those passed parts will not be taken into account in the future or subconsequent to course 2018-2019 .

Partial or total plagiarism in any of the assignment or activity will result in an automatic non-pass on the subject. Plead ignorance of what plagiarism is, will not exempt students of their responsibility in this regard.

2.1. Final Assessment (May and July)

The only assessment is computed as follows: Listening: 16%. Speaking: 32%. Reading: 16%. Writing 16%, whereas Use of English examination sums up 20%.

So the final mark will be established adding skills and Use of English test to sum up 100%, being 5 (five) the mark necessary to obtain a pass in all skills and short answer tests.

Regarding July assessment (second call assessment) continuous evaluation students will undergo examination for the specific parts of the subject contents not completed; while students of the only examination who failed in the previous exam notification (first call) must undergo an assessment of the total subject contents (100%).

Both continuous assessment and final assessment will take into account not only the relevance and appropriateness of the content of the answers, but also their linguistic correctness.

3. Additional considerations

3.1. Forbidden materials or devices

In addition, during the examinations no dictionaries, notes or electronic devices (mobile phones, tablets, PCs, etc.) will be allowed.

3.2. Information and deadlines

It is students' responsibility to check FAITIC or their e-mails to be kept up to date on the uploaded teaching materials, as well as to be aware of examination or submission dates.

3.3. Erasmus students

All the comments here indicated also pertain to Erasmus students. In the event of not being able to access information on FAITIC, students have to contact the teacher to solve the problem.

3.4. Ethical commitment. Students are requested to present an adequate ethical behaviour. In case of detecting an unethical behaviour (copying, plagiarism, use of not authorized electronic devices, and others) will be considered that the student does not meet the requisites necessary to pass the subject. In this case, the global qualification in the present academic course will be of a fail (0.0).

Recommendations

Other comments

We recommend students, who wish to take part in this course, to have a prior A1 level in English so as to reach the A2 level, according to the European Framework of Reference for Languages of the Council of Europe.

Requisites:

To register in this subject it is necessary to have passed or to be registered for all the subjects of the lower-division courses to the course where this subject is placed.

We also recommend continuous assessment due to the methodology used to practice and consolidate the learning process of the subject contents. Therefore, the active participation of students is essential to pass the Technical English subject requisites.

It is advisable to check the School's lectures timetable so as to avert incompatibility of attendance with any other subject. Therefore students will not be permitted to sit for continuous evaluation if there is overlap.

In order to avoid damaging computers, students will not be allowed to take drinks or food into the classroom. If the ingestion of liquid or food is necessary, students must show an official medical prescription.
