

## IDENTIFYING DATA

### Materials science and technology

Subject	Materials science and technology			
Code	V12G360V01301			
Study programme	Degree in Industrial Technologies Engineering			
Descriptors	ECTS Credits	Choose	Year	Quadmester
	6	Mandatory	2nd	1st
Teaching language	Spanish Galician			
Department				
Coordinator	Figueroa Martínez, Raúl Abreu Fernández, Carmen María			
Lecturers	Abreu Fernández, Carmen María Cortes Redin, María Begoña Díaz Fernández, Belén Figueroa Martínez, Raúl Iglesias Rodríguez, Fernando Pena Uris, Gloria María			
E-mail	cabreu@uvigo.es raulfm@uvigo.es			
Web	<a href="http://fatic.uvigo.es">http://fatic.uvigo.es</a>			
General description	The aim of this subject is to introduce the main concepts of materials technology as well as to study applications of the most common materials			

## Competencies

Code	
B3	CG3 Knowledge in basic and technological subjects that will enable them to learn new methods and theories, and equip them with versatility to adapt to new situations.
B4	CG4 Ability to solve problems with initiative, decision making, creativity, critical thinking and to communicate and transmit knowledge, skills and abilities in the field of Industrial Engineering.
B6	CG6 Capacity for handling specifications, regulations and mandatory standards.
C9	CE9 Knowledge of the fundamentals of the science, technology and chemistry of materials. Understand the relationship between microstructure, the synthesis, processing and properties of materials.
D1	CT1 Analysis and synthesis.
D5	CT5 Information Management.
D9	CT9 Apply knowledge.
D10	CT10 Self learning and work.

## Learning outcomes

Expected results from this subject	Training and Learning Results		
It comprises the fundamental concepts of link, structure and microstructure of the distinct types of materials	B3	C9	D10
It comprises the influence of the microstructure of the material on its mechanical, electrical, thermal and magnetic behaviour	B3	C9	
It comprises the mechanical behaviour of the metallic, ceramic, plastics and composite materials.	B4 B6		
It knows how to modify the material properties by means of mechanical processes and thermal treatments	B4	C9	D9
It knows the basic structural characterisation techniques for materials.	B3 B6	C9	
To acquire skills in the handle of the diagrams and charts			D1

To acquire skills in the realisation of tests	B6	C9	D10
It analyses the results obtained and extracts conclusions from them			D1 D5 D9
It is able to apply norms of materials testing	B6		D1 D9

## Contents

Topic	
Introduction	Introduction to the Science and Technology of Material. Classification of the materials. Terminology. Orientations for the follow-up of the matter.
Crystalline arrangement.	Crystalline and amorphous solids. Crystalline lattices, characteristics and imperfections. Allotropic transformations.
Properties of materials. Laboratory practices.	Mechanical, chemical, thermal, electric and magnetic properties. Standards for materials analysis. Compressive and tensile deformation. Principles of fracture mechanisms. Toughness. Hardness. Main test methods. Fundamentals of thermal analysis. Fundamentals of non-destructive testing. Introduction to metallography. Binary isomorphous and eutectic systems. Microstructure in eutectic alloys. Analyses of practical situations.
Metallic materials.	Solidification. Constitution of alloys. Grain size. Main binary phase diagrams. Processing. Carbon steels: classification and applications. Cast iron alloys. Heat treatments: annealing, normalizing, quenching and tempering. Nonferrous alloys.
Polymers and composites	General concepts. Classification. Properties. Types of polymers. Processing. Classification of composite materials. Polymer matrix composite materials. Processing of composite materials. Problems related to polymeric and composite materials.
Ceramic materials	Structure and bonding in ceramic materials. Silicates structure. Glasses. Properties of ceramic materials. Processing of ceramic materials. Applications.

## Planning

	Class hours	Hours outside the classroom	Total hours
Introductory activities	1.5	0	1.5
Lecturing	31	55.8	86.8
Laboratory practical	18	18	36
Autonomous problem solving	0	12	12
Objective questions exam	0.5	0.5	1
Problem and/or exercise solving	1	0.95	1.95
Problem and/or exercise solving	1.25	1.5	2.75
Essay	0.5	7.5	8

\*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

## Methodologies

	Description
Introductory activities	Presentation of the subject. Introduction to materials science and technology.
Lecturing	Exhibition by the lecturers of the main contents of the subject, theoretical bases and/or projects guidelines. Hands on science methodology.
Laboratory practical	Practical application of the theoretical contents. Practical exercises in the materials laboratory.
Autonomous problem solving	Formulation of a practical activity related to the subject. The student must be able to resolve them by himself.

## Personalized assistance

Methodologies	Description
Lecturing	
Laboratory practical	
Tests	Description
Problem and/or exercise solving	
Essay	

## Assessment

	Description	Qualification	Training and Learning Results		
Laboratory practical	Attendance, participation and periodical assignments.	2	B3 B6	C9	D1 D9 D10
Problem and/or exercise solving	In the final exam, short questions will be included. The final exam will be held the day fixed by the school.	40	B3 B4 B6	C9	D1 D9 D10
Problem and/or exercise solving	Exercises will be assessed along the course (25%). The final exam will include similar exercises (20%).	50	B3 B4 B6	C9	D1 D9 D10
Essay	The main guidelines to successfully develop short projects will be given.	8	B3 B4 B6	C9	D1 D9 D10

### Other comments on the Evaluation

#### \*Evaluaci3n Continuous

The \*evaluaci3n continua make during the period of \*impartici3n of the subject, \*seg3n los criteria established in the previous section and corresponds with 30% of the final note. To surpass the subject be necessary to have reached \*unapuntuaci3n \*m3nima of 40% in the proof made in the date previously \*fijadapor the centre, that corresponds with 70% of the final note. Those students \*queno receive to the \*evaluaci3n continuous (previous \*autorizaci3n of the \*direcci3n \*dela \*EEI) be evaluated with a final examination on the contents of \*latotalidad of the matter, that \*supondr3 100% of the note.

#### Examination of Julio (2\*3 Edici3n)

In the examination \*de julio \*tendr3 in account the \*evaluaci3n continuous (V3lida only in the course 2019-20). The examination \*tendr3 the same \*caracter3sticasque the previous and make in the previously fixed date by the centre. Those students \*quequieran renounce to the \*evaluaci3n continuous be evaluated with an examination \*finalsobre the contents of the whole of the matter (\*teor3to + \*pr3ctica) \*quesupondr3 100% of the note.

#### Extraordinary examination

Examination on \*los contenidos of the whole of the matter (\*teor3to + \*pr3ctica) that \*supondr3 100% of the note.

#### Commitment 3tico:

It expects that the present student a behaviour 3tico suitable. In \*casode detect a behaviour no 3tico (copy, plagiarism, \*utilizaci3n of \*aparatos electr3nicos unauthorised, etc.), consider3 that the student no \*re3ne \*los requisitos necessary to surpass the matter. In this case, the \*calificaci3n global in the present course \*acad3mico be of suspense (0.0).

No allow3 the \*utilizaci3n of \*ning3n device \*electr3nico \*durantelas proofs of \*evaluaci3n, except \*autorizaci3n expresses. The fact of \*introduciron device \*electr3nico unauthorised in the classroom of examination be \*consideradomotivo of no \*superaci3n of the matter in the present course \*acad3mico and \*lcalificaci3n global be of suspense (0.0).
