Methodologies

	Description
Lecturing	Presentation by the teacher of the contents on the subject of study, theoretical basis and / or guidelines of a job, an exercise that the student has to develop.
Case studies	Analysis of a fact, problem or real event with the purpose of knowing it, interpreting it, solving it, generating hypotheses, contrasting data, reflecting, completing knowledge, diagnosing it and training in alternative solution procedures.
Problem solving	Activity in which problems and/or exercises related to the subject are formulated. The student must develop the adequate or correct solutions taking into account what was exposed in class.
Project based learning	Elaboration of an own strategy oriented to the development of audiovisual contents in social media.
Workshops	Creation of work teams to experiment with audiovisual creation tools and their narrative possibilities
Design Thinking	Acquisition of basic knowledge about the users of a product, situation or problem; in developing empathy with the user to reach a solution to a problem they have; in building prototypes with the most appropriate ideas; and in learning from users' reactions when interacting with the prototype.

Personalized assistance

Contingency plan

Description

=== EXCEPTIONAL PLANNING ===
Given the uncertain and unpredictable evolution of the health alert caused by COVID-19, the University of Vigo establishes an extraordinary planning that will be activated when the administrations and the institution itself determine it, considering safety, health and responsibility criteria both in distance and blended learning. These already planned measures guarantee, at the required time, the development of teaching in a more agile and effective way, as it is known in advance (or well in advance) by the students and teachers through the standardized tool.

== ADAPTATION OF METHODOLOGIES ===
In a non-attendance situation workshop and design thinking will be replaced by project based learning.

The non-contact mechanisms for attending to the students (tutorials) will be the virtual office of the remote campus at the indicated time and email.

=== ADAPTATION OF THE EVALUATION ===
If necessary, the assessment systems in place will be adapted to the learning mode to be adopted. The percentage of the qualification corresponding to the systematic observation (20%) will be replaced by an increase of the percentages (10%) in the rest of the evaluation systems. The technical limitations of the students will be taken into account in order to apply the necessary modifications
