

## IDENTIFYING DATA

### (\*)Introdución á avaliación estrutural de construcións patrimoniais

Subject	(*)Introdución á avaliación estrutural de construcións patrimoniais			
Code	O02M143V03217			
Study programme	(*)Máster Universitario en Valoración, xestión e protección do patrimonio cultural			
Descriptors	ECTS Credits	Choose	Year	Quadmester
	3	Optional	1st	2nd
Teaching language	Spanish Galician			
Department				
Coordinator	Riveiro Rodríguez, Belén			
Lecturers	Cabaleiro Núñez, Manuel Conde Carnero, Borja Riveiro Rodríguez, Belén			
E-mail	belenriveiro@uvigo.es			
Web	<a href="http://faitic.uvigo.es">http://faitic.uvigo.es</a>			
General description	This subject aims to train the student to understand the requirements in terms of structural safety of a building, taking into account the particularities of its heritage. Likewise, it will allow the student to conduct the tasks of documentation of the property through the technologies of geometric documentation and the materials addressed in module II of the master's degree, which serve as the basis for the diagnosis of the level of structural health of a heritage construction.			

## Competencies

Code	
A2	That students know how to apply the knowledge acquired and their ability to solve problems in new or unfamiliar environments within broader (or multidisciplinary) contexts related to their area of study.
B2	Acquire the necessary knowledge to handle the different tools of graphic, dimensional and geospatial documentation to be applied in the documentation and valuation of Cultural Heritage.
B3	Acquire the ability to bring to the practical application of the protection of cultural property the theoretical knowledge and the protocols of documentation, diagnosis and evaluation.
C2	Acquire the ability to design intervention protocols, establishing types, priorities and intensities of action before a cultural property at risk of alteration.
C9	Acquire the ability to diagnose, on the basis of scientific knowledge, the state of structural conservation of the Cultural Heritage.
C10	Understand the fundamentals of structural stability and the analysis procedures necessary to guarantee the structural safety of heritage constructions.
D5	Be able to predict and control the evolution of complex situations through the development of new and innovative work methodologies adapted to the specific scientific / research, technological or professional field, in general multidisciplinary, in which their activity is developed.
D8	Acquire advanced knowledge and demonstrate, in a context of scientific and technological research or highly specialized, a detailed and substantiated understanding of the theoretical and practical aspects and the methodology of work in one or more fields of study.

## Learning outcomes

Expected results from this subject	Training and Learning Results
------------------------------------	-------------------------------

Acquisition of knowledge regarding structural security, analysis methods and regulations applicable to heritage buildings	A2 B2 B3 C2 C9 C10 D5 D8
Know the tools that allow a diagnosis of the structural condition of heritage buildings	A2 B2 B3 C2 C9 C10 D5 D8

## Contents

Topic	
Introduction to structural mechanics	Forces Moments Static equilibrium Thrust Structural stability.
Structural typologies, constructive elements and mechanical modeling	Wooden structures  Masonry structures  Metallic structures  Concrete structures
Introduction to structural analysis methods.	Classic methods  Theory of limit analysis in masonry structures  Computacionais methods: finite method method, discrete element method.
Structural pathology in heritage buildings.	Main structural pathologies.  Methodologies and techniques for identification and characterization.
Standards of mandatory compliance in terms of structural safety.	Código Técnico de la Edificación

## Planning

	Class hours	Hours outside the classroom	Total hours
Introductory activities	0.5	0	0.5
Seminars	4	15	19
Case studies	0.5	15	15.5
Problem solving	0	18	18
Essay	0	20	20
Systematic observation	0	1	1
Oral exam	1	0	1

\*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

## Methodologies

	Description
Introductory activities	Activities directed to take contact and gather information on the students, as well as to present the module. They will present the module outline form of the matter, aims, calendar, criteria of evaluation, as well as forums of debate and news and other surroundings in which it will manage the learning.
Seminars	Activities focused to the work on each one of the technologies that present in the matter, so that the students can understand the theoretical principles of each technician to the time that take contact with the tools software that will allow them put in technical said practice during a process of documentation. These seminars will realise by means of videoconference and totorial videosl, on the studies of case of employment of each technician.

Case studies	Analysis of a problem or real case, with the purpose to know it, interpret it, resolve it, generate hypothesis, diagnose it and get introduced to alternative procedures of solution, to see the application of the theoretical concepts in the reality. They will employ as a complement of the theoretical classes for the autolearning.
Problem solving	Activities in which they formulate problems and/or exercises related with the matter.

### Personalized assistance

#### Methodologies Description

Case studies	Resolution of doubts and personalised attention of the work performed by the students. Resources used: platform for virtual teaching Moodle, and videoconference and e-meeting
Problem solving	Resolution of doubts and personalised attention through the videoconference and e-meeting.

### Assessment

	Description	Qualification	Training and Learning Results			
Essay	The student presents the result obtained in the elaboration of a document on the subject matter in the preparation of seminars, investigations, memories, essays, summaries of readings, conferences, etc. The learning outcomes are the student's training for the diagnosis of the structural condition of heritage assets, through the appropriate use of different identification tools and characterization of structural damage and pathologies, as well as using the applicable regulations.	40	A2	B2	C2	D5
				B3	C9	D8
					C10	
Systematic observation	The performance of the student is being observed, as well as the practices and seminars through the telematic tools. The results of the learning are the qualification of the student for the structural diagnosis of the heritage.	20	A2	B2	C2	D5
				B3	C9	D8
					C10	
Oral exam	The student will conduct a critical discussion on case study about characterization and diagnosis of a heritage construction. The student will argue their decisions regarding the most appropriate tools for identification and characterization of structural damage and pathologies, as well as the results obtained in said diagnosis.	40	A2	B2	C2	D5
				B3	C9	D8
					C10	

### Other comments on the Evaluation

The student, according to the valid rule, has two announcements of evaluation. The first carries out during the teaching period. In the case that the weeks of teaching of the matter are not sufficient for the delivery of all the planned works, will enable the platform of teaching two additional weeks, at the end of the semester, to facilitate works delivery, establishing in this case an alternative calendar of delivery of tasks. The second evaluation is in the month of July, for which will enable again the access to the educational platform.

### Sources of information

#### Basic Bibliography

#### Complementary Bibliography

Heyman, Jackes, **The Stone skeleton : structural engineering of masonry architecture**, Cambridge University Press,  
Zanni, Enrique, **Patología de la madera : degradación y rehabilitación de estructuras de madera**, Brujas,  
Belén Riveiro, Mercedes Solla, **Non-Destructive Techniques for the Evaluation of Structures and Infrastructure**, CRC Press - Taylor and Francis,

### Recommendations

#### Subjects that are recommended to be taken simultaneously

(\*)Técnicas non destructivas para a avaliación do patrimonio cultural inmobile/O02M143V03218

#### Subjects that it is recommended to have taken before

2D and 3D Cartographic Documentation Techniques for Cultural Heritage/O02M143V03109

CAD Techniques to Present Heritage/O02M143V03107

### Other comments

The teaching of the matter carries out using the educational platform Moodle and, of face-to-face way, participating in the educational activities through videoconference or through tools of remote connection (as it Adobe Connect). To be able to receive the teaching of effective way, recommends , previously to the start of the matter, consult the manual of access to the platform and follow the technical specifications to be able to assist to the remote sessions. This information is available in the common space of the Master. It is indispensable that the student access to the educational platform of the matter

previously to the start of the same.

In general, for the practices will employ free software or free versions (demo) of commercial software for operating system Windows 7.

## **Contingency plan**

---

### **Description**

---

#### === EXCEPTIONAL PLANNING ===

Given the uncertain and unpredictable evolution of the health alert caused by COVID-19, the University of Vigo establishes an extraordinary planning that will be activated when the administrations and the institution itself determine it, considering safety, health and responsibility criteria both in distance and blended learning. These already planned measures guarantee, at the required time, the development of teaching in a more agile and effective way, as it is known in advance (or well in advance) by the students and teachers through the standardized tool.

#### === ADAPTATION OF THE METHODOLOGIES ===

- \* Teaching methodologies maintained
  
- \* Teaching methodologies modified
  
- \* Non-attendance mechanisms for student attention (tutoring)
  
- \* Modifications (if applicable) of the contents
  
- \* Additional bibliography to facilitate self-learning
  
- \* Other modifications

#### === ADAPTATION OF THE TESTS ===

- \* Tests already carried out  
Test XX: [Previous Weight 00%] [Proposed Weight 00%]  
...
  
  - \* Pending tests that are maintained  
Test XX: [Previous Weight 00%] [Proposed Weight 00%]  
...
  
  - \* Tests that are modified  
[Previous test] => [New test]
  
  - \* New tests
  
  - \* Additional Information
-
