Fundamentals of Image Processing

Subject	Fundamentals of Image Processing		
Code	V05G300V01632		
Study programme	Degree in Telecommunications Technologies Engineering - In extinction		
Descriptors	ECTS Credits	Choose	Year
	6	Optional	3rd
Teaching language	#EnglishFriendly		Quadmester
	Spanish		2nd
Department			
Coordinator	Martín Herrero, Julio		
Lecturers	Martín Herrero, Julio		
E-mail	julio@uvigo.es		
Web	http://fatic.uvigo.es		
General description	Introduces to the student the basics of digital image processing. English Friendly subject: International students may request from the teachers: a) materials and bibliographic references in English, b) tutoring sessions in English, c) exams and assessments in English.		

Competencies

Code	
B3	CG3: The knowledge of basic subjects and technologies that enables the student to learn new methods and technologies, as well as to give him great versatility to confront and adapt to new situations
B4	CG4: The ability to solve problems with initiative, to make creative decisions and to communicate and transmit knowledge and skills, understanding the ethical and professional responsibility of the Technical Telecommunication Engineer activity.
B10	CG10 The ability for critical reading of scientific papers and docs.
C34	CE34/SI1 The ability to construct, exploit and manage telecommunication services and applications, such as receiving, digital and analogical treatment, codification, transporting and representation, processing, storage, reproduction, management and presentation of audiovisual and multimedia information services.
C38	CE38/SI5 The ability to create, modify, manage, broadcast and distribute multimedia contents taking into account the use and accessibility criteria to audiovisual, broadcasting and interactive services.
D2	CT2 Understanding Engineering within a framework of sustainable development.
D3	CT3 Awareness of the need for long-life training and continuous quality improvement, showing a flexible, open and ethical attitude toward different opinions and situations, particularly on non-discrimination based on sex, race or religion, as well as respect for fundamental rights, accessibility, etc.

Learning outcomes

Expected results from this subject	Training and Learning Results		
Understand the nature and organisation of digital images	B3 B10	C34 C38	
Learn to process digital images	B3 B4 B10	C34 C38	D2 D3
Learn how to program a computer to process a digital image	B3 B4 B10	C34 C38	D2 D3
Understand how the fundamental technics of image processing work	B3 B10	C34 C38	
Apply fundamental processing technics to solve specific problems with images or groups of images	B3 B4	C34 C38	

Contents	
Topic	
GUI programming	.
Basic preprocessing.	.
Image restoration.	.
Global and local operators.	.
Linear and nonlinear filters.	.
Segmentation	.
Mathematical morphology.	.

Planning			
	Class hours	Hours outside the classroom	Total hours
Practices through ICT	19.6	78.4	98
Lecturing	21	21	42
Systematic observation	0.01	0	0.01
Laboratory practice	2	8	10

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
	Description
Practices through ICT	Handling and tuning analytic tools and algorithms, identifying which ones to use in different scenarios. All learning aims are addressed.
Lecturing	Master talks by the teacher on central topics, promoting critical discussion of concepts. All learning aims are addressed.

Personalized assistance

Methodologies	Description
Practices through ICT	Implementation of image processing methods within an image processing and visualization framework with graphic user interface, programming in C and C++.

Assessment		Qualification Training and Learning Results			
	Description				
Practices through ICT	Personalised monitoring of the student's work, with feedback. All teaching aims specified in the corresponding section of this guide are evaluated.	100	B3 B4 B10	C34 C38	D2 D3
Systematic observation	Personalised monitoring of the student's work, with feedback. All teaching aims specified in the corresponding section of this guide are evaluated.	100	B3 B4 B10	C34 C38	D2 D3
Laboratory practice	Final exam.	100	B3 B4 B10	C34 C38	D2 D3

Other comments on the Evaluation

The assistance to class under continuous evaluation is compulsory, unless exceptional circumstances concur. Continuous evaluation is used for assessment, based on the work of the student. There is a final exam in the official date marked by the Board of School in May, for those students that have not passed the continuous evaluation. This final exam will be marked between 0 and 10 points. It covers all the subjects seen during the semester. To approve, the student has to obtain, at least, five points. Students wishing to improve their continuous evaluation marks can also attend the final exam: in this case the mark of this exam will be the final mark. The students that have passed the continuous evaluation and are satisfied with their mark do not need to attend the final exam. Along the semester the students will receive feedback on their progress, and the final mark of continuous evaluation will be communicated to the students well before the final exam. The delivery of the personal work the last week of class will imply the official participation in continuous evaluation.

The extraordinary evaluation of July will be an extraordinary final exam, for those students that have not passed neither the continuous evaluation neither the final exam in May. The final mark will be the mark of the extraordinary final exam in both cases. This extraordinary final exam will be marked between 0 and 10 points, and covers all the subjects. To approve, the student has to obtain, at least, five points.

Note that there are two final exams, but both correspond to a single and the same call ("convocatoria").

Sources of information

Basic Bibliography

Rafael C. Gonzalez, Richard E. Woods, **Digital Image Processing**, 3ª, Prentice Hall,

Complementary Bibliography

Robert Laganière, **OpenCV Computer Vision Application Programming Cookbook**, Packt Publishing, 2014

Jasmin Blanchette, Mark Summerfield, **C++ GUI Programming with Qt 4**, Prentice Hall, 2008

Recommendations

Subjects that continue the syllabus

Image processing and analysis/V05G300V01931

Subjects that are recommended to be taken simultaneously

Imaging Systems/V05G300V01633

Other comments

Simultaneously taking the subject Imaging Systems is emphatically recommended. You also should have passed the subject Programming, or have some notions of, at least, C programming.

Contingency plan

Description

In case of having to teach partly or entirely online because of health and safety recommendations, the same teaching methodologies and assessment methods will be maintained. (See Annex).
