General description	This course deals with the fundamental issues of image processing and analysis and is presented as the first part of another course that introduces more advanced topics. In addition to the study and application of fundamental techniques, practical applications of these techniques to solve real problems are studied. This subject provides the tools needed to apply the algorithms used in practical cases, as well as the basis for developing new algorithms and continuing with more advanced methods.

#### === EXCEPTIONAL PLANNING ===

Given the uncertain and unpredictable evolution of the health alert caused by COVID-19, the University of Vigo establishes an extraordinary planning that will be activated when the administrations and the institution itself determine it, considering safety, health and responsibility criteria both in distance and blended learning. These already planned measures guarantee, at the required time, the development of teaching in a more agile and effective way, as it is known in advance (or well in advance) by the students and teachers through the standardized tool.

#### === ADAPTATION OF THE METHODOLOGIES ===

- \* Teaching methodologies maintained
  
- \* Teaching methodologies modified
  
- \* Non-attendance mechanisms for student attention (tutoring)
  
- \* Modifications (if applicable) of the contents
  
- \* Additional bibliography to facilitate self-learning
  
- \* Other modifications

#### === ADAPTATION OF THE TESTS ===

- \* Tests already carried out  
Test XX: [Previous Weight 00%] [Proposed Weight 00%]  
...
  
- \* Pending tests that are maintained  
Test XX: [Previous Weight 00%] [Proposed Weight 00%]  
...
  
- \* Tests that are modified  
[Previous test] => [New test]
  
- \* New tests

- \* Additional Information
