Web	http://http://direcceuemeixoeiro.webs.uvigo.es/index.php/es/			
General description	(*) Course focused on improving writing skills in Scientific English, Scientific English Presentacions , and improving knowledge of the NHS and guidelines to be able to enter the UK work market			

Competencies

Code	
A1	Students will have shown they have sufficient knowledge and understanding of an area of study, starting after completion of general secondary education, and normally reaching a level of proficiency that, being mostly based on advanced textbooks, will also include familiarity with some cutting-edge developments within the relevant field of study.
A2	Students will be able to apply their knowledge and skills in their professional practice or vocation and they will show they have the required expertise through the construction and discussion of arguments and the resolution of problems within the relevant area of study.
A3	Students will be able to gather and interpret relevant data (normally within their field of study) that will allow them to have a reflection-based considered opinion on important issues of social, scientific and ethical nature.
A4	Students will be able to present information, ideas, problems and solutions both to specialist and non-specialist audiences.
A5	Students will acquire the learning skills that are required to pursue further studies with a high degree of independence.
B6	To apply nursing interventions according to scientific evidence and available resources.
B16	To be able to use the healthcare information systems.
C8	To apply information and communication systems and technologies to healthcare.
D1	Analysis and synthesis skills.
D2	Organization and planning skills.
D3	Information-management skills.
D4	Problem-resolution and decision-making skills.
D7	Critical-thinking skills.
D9	Ability to adapt to new situations. Entrepreneurship skills. Creativity.
D11	Awareness of environmental issues.

Planning

	Class hours	Hours outside the classroom	Total hours
Lecturing	52	0	52
Autonomous problem solving	0	97	97
Presentation	1	0	1

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

	Description
Lecturing	Classes taught by the teacher. Presentations by the students themselves
Autonomous problem solving	Preparation of a presentation topic related to health sciences.
	Preparation of academic writing for IELTS

Personalized assistance

Methodologies	Description
Lecturing	Exercises corrected on-line, in class or via e-mail
Autonomous problem solving	Exercises corrected on-line, in class or via e-mail
Tests	Description
Presentation	The student will give a short presentation

Assessment

Description	Qualification	Training and Learning Results
Lecturing (*)Attendance and participation in the class. Disruptive behaviour in class will cause automatic disqualification.	20	
PresentationThe student will give a presentation	80	

Other comments on the Evaluation

July: Same evaluation as in the previous call.

In the case of not being able to attend class, the student can perform on-line exam tasks. You will have three attempts to pass the test. The best result will be considered as valid.

Information regarding the exam date, time and place can be found at the following web address:

Contingency plan

Description

=== EXCEPTIONAL PLANNING ===

Given the uncertain and unpredictable evolution of the health alert caused by COVID-19, the University of Vigo establishes an extraordinary planning that will be activated when the administrations and the institution itself determine it, considering safety, health and responsibility criteria both in distance and blended learning. These already planned measures guarantee, at the required time, the development of teaching in a more agile and effective way, as it is known in advance (or well in advance) by the students and teachers through the standardized tool.

=== ADAPTATION OF THE METHODOLOGIES ===

In the case of compulsory quarantine, classes will be given online on the BigBlueButton platform of the University of Vigo. The evaluation will be individual through the presentation of an online scientific speech.
