Learning outcomes

Expected results from this subject	Training and Learning Results
------------------------------------	-------------------------------

The student will be able to comprise the structure of integration inside a project, relating all the areas of knowledge in the plan of management	A2 B2 C5 C8 D5
The student will be able to comprise the importance of the Record of Constitution, of the management of the change and of the closing of the project	A1 A2 B1 B2 B4 C5 C8 D5
Know analyse the results and interpret them.	
The student will be able to know and use the basic tools of taking of requirements and of control of the scope of a project	A2 B1 B4 B9 C5 C21 D5
The student will be able to define the scope of a project, knowing the difference between the scope of the product and of the project	A1 A2 B2 B4 C5 C8 D5 D8
The student will be able to develop a structure of breakdown of work (*EDT) for the project	B2 B4 B5 C8 C19 D7 D8

Contents

Topic	
Subject I. The management of the integration in the project.	The key element of the integrated direction
Subject II. The Development of the Record of Constitution of the Project	Practical examples and documents
Subject III. The Development of the Plan of Management of the Project	The integration of the areas of knowledge
Subject IV. The Integrated Control of Changes	The management of the change
Subject V. The Development of the document of closing of the project	Practical examples and documents
Subject VI. The identification of requirements of a project	Tools
Subject VII. The Definition of the scope of a project	Practical examples and documents
Subject VIII. Creation of the structure of breakdown of the work (EDT) of a project step by step	Practical examples and Exercises
Subject IX. The Verification of the scope of a project.	The feasibility of the aims of the project
Subject X. The control of the scope of a project	The start of the triple restriction

Planning

	Class hours	Hours outside the classroom	Total hours
Lecturing	20	15	35
Debate	6	8	14
Flipped Learning	2	12	14
Case studies	5	25	30
Essay	1	25	26

Presentation 1 5 6
 *The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
	Description
Lecturing	Oral exhibition with audiovisual support of the contents of the matter object of study.
Debate	Formulation, analysis, resolution and debate of problems or exercises related the integration and acquisition and his management
Flipped Learning	The student will receive through the platform of teledocencia faitic documentation so that it can work on her and later can pose to the professor doubt or problems of learning related with these contents
Case studies	Study of situations proposed by the educational.

Personalized assistance	
Methodologies	Description
Lecturing	During the tutorial hours, specific doubts about the exercises, cases and explanations made during the theoretical classes will be resolved. The tutorials may be resolved through face-to-face or virtual mode, either through the virtual offices of the teachers (1006, prof. Dr. Oscar García García), or by email or through the forums of the Moovi tele-teaching platform.
Case studies	During the tutoring hours, specific doubts about the cases and situations raised during the classes will be resolved. The tutorials may be resolved through face-to-face or virtual mode, either through the virtual offices of the teachers (1006, prof. Dr. Oscar García García), or by email or through the forums of the Moovi tele-teaching platform.

Assessment						
	Description	Qualification	Training and Learning Results			
Essay	Works tutored, following the marked guidelines by the educational	50	A1 A2	B2 B4 B9	C8 C21	D5
Presentation	Presentation, defence and debate of the work realized	50		B1 B5	C5 C19	D7 D8

Other comments on the Evaluation

The student who does not develop the works and case studies proposed must sit the official exams, which will have a value of 100%. The exam will be a test of 20 questions with a single answer and two development exercises. In case of not having passed the subject in the first call, the competences not acquired will be evaluated in the July call through a test type test of 20 questions with a single answer and two development exercises. The official dates of the exams can be found on the Master's website www.mdip.es

Contingency plan

Description

As a consequence of COVID-19 and in accordance with the extraordinary and urgent measures in the event of a health crisis, approved by the Governing Council of June 12, 2020 and the Resolution Rectoral of June 17, 2020 for its implementation, an instruction was prepared from the VOAP for the development of the teaching guides.

Based on this, the teaching of this subject in the 2021/2022 academic year, in the event of a re-outbreak of COVID-19, will be through virtual face-to-face modality (Classroom 12; <https://campusremotouvigo.gal/public/2025273042>), in which neither the teacher nor the students attend the classroom physically. The classes and the evaluation will be carried out by remote campus and through the moodle platform. If necessary, this modality would be activated by RR.

The contents are maintained, as well as the evaluation system.

The teaching methodology in this case will be based fundamentally on reverse learning "Flipped Learning" in substitution of the other methodologies, where the student will work autonomously on the documents provided by the teacher through the Fatic tele-teaching platform and in face-to-face classes. Virtual problems, doubts and deficiencies detected by the student and the teacher will be raised and resolved.
