General description	By the realisation of practices in a company the student will be able to apply the knowledge and skills acquired during his/her studies, reinforcing his/her training and facilitating his/her incorporation to the labour market.			
	English Friendly subject: International students may request from the teachers: a) resources and bibliographic references in English, b) tutoring sessions in English, c) exams and assessments in English.			

Skills

Code	
A2	That the students know how to apply their knowledge to their work or vocation in a professional way and that they possess the competences that are usually demonstrated through the elaboration and defense of arguments and the resolution of problems within their area of study
A3	That the students have the capability to gather and interpret relevant data (usually within their area of study) to issue judgments that include a reflection on relevant social, scientific or ethical issues
A4	That the students can transmit information, ideas, problems and solutions to a specialized and non-specialized audience
A5	That the students develop those learning capabilities necessary to undertake further studies with a high degree of autonomy.
C6	Adequate knowledge of the concept of a company, corporate and legal framework of a company. Organization and management of companies.
C19	Applied knowledge of: science and technology of materials; mechanics and thermodynamics; fluid mechanics; aerodynamics and flight mechanics; navigation and air traffic systems; aerospace technology; theory of structures; airborne transportation; economy and production; projects; environmental impact.
D2	Leadership, initiative and entrepreneurship
D3	Capability of oral and written communication in native language
D4	Capability of autonomous learning and information management
D11	Show motivation for quality with sensitivity towards subjects within the scope of the studies
D12	Ethical and democratic commitment

Learning outcomes

Expected results from this subject	Training and Learning Results
Knowledge, understanding and application of the organization and planning of a company or institution of the aerospace sector.	C6

Knowledge, understanding and application of work teams, oral and written communication skills at institutions of the aerospace sector	A3		D2
	A4		D3
	A5		D4
			D11
			D12
Knowledge, understanding, application, analysis and synthesis of diverse technical problems that appear in the companies, applying with creativity the knowledge acquired during the student studies	A2	C19	D12

Contents

Topic

General knowledge of the organisation chart and lines of activity of the company or institution. - Visit to the installations.

- To familiarize with the instrumentation, tools, programming languages and software packages used by the company

- Allocation of the student to a work group.

- Allocation of a work package to the student, such as present works of the company or its R&D lines.

- Realization of the work entrusted.

- Writing of a final report and the official documents required.

Planning

	Class hours	Hours outside the classroom	Total hours
Practicum, External practices and clinical practices	6	144	150

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

	Description
Practicum, External practices and clinical practices	Realization of the external practices in the organism/company inside the work group and task assigned

Personalized assistance

Assessment

	Description	Qualification	Training and Learning Results		
			A2	C6	D2
Practicum, External practices and clinical practices	Evaluation by the company supervisor during the development of the practices (official report D5)	100	A3	C19	D3
	Evaluation of the memory of practices delivered by the student when finalising.		A4		D4
	Evaluation of the report of the academic supervisor designated by the centre.		A5		D11
	The students will keep in touch not only with the company supervisor, but also with the academic supervisor.				D12
	When concluding the practices, the students will have to deliver to his academic supervisor a final memory and also the official document D6-				
	Report of the student.				
	The evaluation will take into account the follow-up made by the academic tutor and the reports delivered by the student.				

Other comments on the Evaluation
