Information management systems

| | | | | |
|---------------------|---|----------|------|------------|
| Subject | Information management systems | | | |
| Code | O07G410V01910 | | | |
| Study programme | Grado en Ingeniería Aeroespacial | | | |
| Descriptors | ECTS Credits | Choose | Year | Quadmester |
| | 6 | Optional | 4th | 2nd |
| Teaching language | #EnglishFriendly Spanish Galician | | | |
| Department | | | | |
| Coordinator | Otero Cerdeira, Lorena | | | |
| Lecturers | Otero Cerdeira, Lorena Rodríguez Martínez, Francisco Javier | | | |
| E-mail | locerdeira@uvigo.es | | | |
| Web | http://aero.uvigo.es | | | |
| General description | Introduction to companies information systems regarding their security and management tools. English Friendly subject: International students may request from the teachers: a) materials and bibliographic references in English, b) tutoring sessions in English, c) exams and assessments in English. | | | |

Skills

| | |
|------|--|
| Code | |
| A2 | That the students know how to apply their knowledge to their work or vocation in a professional way and that they possess the competences that are usually demonstrated through the elaboration and defense of arguments and the resolution of problems within their area of study |
| A3 | That the students have the capability to gather and interpret relevant data (usually within their area of study) to issue judgments that include a reflection on relevant social, scientific or ethical issues |
| A5 | That the students develop those learning capabilities necessary to undertake further studies with a high degree of autonomy. |
| C24 | Appropriate knowledge applied to engineering: systems of aircrafts and automatic systems of flight control of the aerospace vehicles. |
| D11 | Show motivation for quality with sensitivity towards subjects within the scope of the studies |

Learning outcomes

| | | | |
|---|-------------------------------|-----|-----|
| Expected results from this subject | Training and Learning Results | | |
| RA1: Understanding, application and analysis of information management systems in aerospace projects. | A2 A3 A5 | C24 | D11 |

Contents

| | |
|---------------------|---|
| Topic | |
| Information | - Encryption - Storage - Processing - Usage |
| Information systems | - Information resources - Tools - Transmission of information - Analysis |

| | |
|------------|---|
| Security | - Threats and Countermeasures - Cybersecurity - Data protection |
| Management | - Norms and Certification - Standards - Interoperability - Interfaces between applications |

Planning

| | Class hours | Hours outside the classroom | Total hours |
|-------------------------|-------------|-----------------------------|-------------|
| Lecturing | 18 | 36 | 54 |
| Case studies | 20 | 30 | 50 |
| Problem solving | 11 | 25 | 36 |
| Introductory activities | 1 | 1.5 | 2.5 |
| Essay questions exam | 2.5 | 5 | 7.5 |

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

| | Description |
|-------------------------|---|
| Lecturing | Exhibition by the teaching staff of the contents on the subject under study, theoretical bases and / or guidelines of a work, exercise or project to be developed by the student. |
| Case studies | Analysis of a fact, problem or real event in order to know it, interpret it, solve it, generate hypotheses, contrast data, reflect, complete knowledge, diagnose it and train in alternative solution procedures. |
| Problem solving | Solve problems and / or exercises related to the subject. The student must develop a correct or correct solution and interpret the results. |
| Introductory activities | Activities aimed at organizing the subject, gathering sources of information, as well as presenting the content and time planning. |

Personalized assistance

Methodologies Description

| | |
|-----------------|--|
| Problem solving | The tutorials will be carried out, preferably, by telematic means: email or through the personal office of the teaching staff on the remote campus of the university, within the teaching staff tutoring hours (published on the centre's website). It will be necessary to contact the teachers in advance by email to set the time for the tutoring. |
|-----------------|--|

Assessment

| | Description | Qualification | Training and Learning Results | | |
|----------------------|--|---------------|-------------------------------|-----|-----|
| Case studies | Test in which the student must analyze a fact, problem or real event in order to know it, interpret it, solve it, generate hypotheses, contrast data, reflect, complete knowledge, diagnose it and train in alternative solution procedures. Learning outcomes assessed: RA1 | 10 | A2 A3 A5 | C24 | D11 |
| Problem solving | Periodic individual or group deliveries indicated by the teacher / who will serve as information on the progress of the student and will also be indicators of their attendance. Learning outcomes assessed: RA1 | 30 | A2 A3 A5 | C24 | D11 |
| Essay questions exam | Partial tests that include open questions about the content of the subject. Students must develop, relate, organize and present the knowledge they have on the subject in a reasoned answer. Learning outcomes assessed: RA1 | 60 | A2 A3 A5 | C24 | D11 |

Other comments on the Evaluation

General remarks:

The student will be able to choose the evaluation system that will be applied to the subject. For this, you must choose, in the first 15 days of the semester, between continuous assessment or final assessment (a single exam at the end of the semester). If you do not specify the type of evaluation desired, it is understood that you opt for continuous evaluation.

The dates and times of the evaluation tests of the different calls are those specified in the evaluation tests calendar approved by the Faculty Board for the 2021-22 academic year.

Continuous assessment tests will be conducted within school hours

General evaluation criteria:

To pass the subject, the student must obtain, as a final grade, a grade equal to or greater than 5. If in any of the blocks the student obtains a grade lower than 4, even if the average grade is equal to or greater than 5, the subject It will be suspended and the final grade that will appear in the minutes will be Suspense (4).

Evaluation criteria for attendees 1st edition of the minutes:

All students who choose the continuous assessment modality will be evaluated continuously by taking tests and activities, developed throughout the semester, applying the general evaluation criteria described in the previous section.

Evaluation criteria for non-attendees 1st edition of the minutes:

All students who opt for the non-attendance mode will be evaluated with a single final exam (100% of the grade) that will encompass everything seen throughout the semester, applying the general evaluation criteria described above.

Evaluation criteria for 2nd edition of minutes and end of degree:

In the second opportunity (July) and in the end-of-degree call, students will be evaluated with a single final exam (100% of the grade) that will encompass all the seen throughout the semester, applying the general evaluation criteria described above. maintaining, if applicable, the qualifications obtained for problem solving, case studies, and / or exercises and attendance and participation.

Evaluated competences: the same as in the evaluation system for assistants. Evaluated learning outcomes: the same as in the evaluation system for assistants.
