General description	The subject of Physiotherapy in lymphedema is an o Physiotherapy. It is intended that you achieve both types of edema in different areas from oncology, aesubject with a lot of practical load, to learn the realized Decongestive Therapy, that the therapy recommend English friendly subject: International students may references in English, b) tutoring sessions in English.	heoretical and praces thetics, obstetrics ration of all the tech led at present for the request from the tech led.	etical skills to addrest and traumatology, a nniques included in the treatment of the achers: a) resource	ss the different among others. It is a the Complex lymphedema.

Skills

Code

- A2 Students are able to apply their knowledge to their work or vocation in a professional manner and possess the competences usually demonstrated through the development and defence of arguments and problem solving within their field of study.
- B1 To know how to work in professional teams as a basic unit in which professionals and other personnel of health care organizations are structured in a uni or multidisciplinary and interdisciplinary way.
- C7 Know the physiological and structural changes that can occur as a result of the application of physiotherapy.
- C9 Know the pathophysiology of diseases, identifying the manifestations that appear throughout the process, as well as the medical-surgical treatments, mainly in their physiotherapeutic and orthopedic aspects. To identify the changes produced as a consequence of the physiotherapy intervention. Encourage the participation of the user and family in the recovery process.
- C16 Analyze, program and apply movement as a therapeutic measure, promoting the participation of the patient/user in the process.
- C17 Know, design and apply the different modalities and general procedures of intervention in Physiotherapy: Massage Therapy, Electrotherapy, Magnetotherapy, Hydrotherapy, Balneotherapy, Climatotherapy, Thalassotherapy, Thermotherapy, Cryotherapy, Vibrotherapy, Phototherapy, Pressure Therapy, therapies derived from other physical agents, as well as fundamental aspects of Ergotherapy and other therapies related to the field of competence of physiotherapy.
- C18 Encourage the participation of the user and family in their recovery process.
- C21 Identify the situation of the patient/user through a physiotherapy care diagnosis, planning interventions, and evaluating their effectiveness in a cooperative work environment with other professionals in health sciences.
- C22 Know and apply good clinical practice guidelines.
- C38 Intervene in the areas of health promotion, prevention, protection and recovery.
- D1 Ability to communicate orally and in writing in Galician.
- D7 Maintain an attitude of learning and improvement.

Learning outcomes

Expected results from this subject

Training and Learning Results

Know the lymphatic physiology and pathophysiology and describe the bases of Manual Lymphatic			C/	
Drainage and Complex Decongestive Therapy.			C16	
			C17	
			C21	
			C38	
Identify pathophysiology in oncology, in plastic, reconstructive and aesthetic surgery			C7	
amenable to lymphedema treatment.			C9	
Apply the different techniques of Complex Decongestive Therapy.		B1	C16	D7
			C17	
			C18	
			C21	
			C22	
Perform a kinesitherapy protocol applied to a patient with lymphedema	A2	B1	C16	D1
			C22	D7

Combonto	
Contents	
Topic	
THEORETICAL TOPICS	-
Anatomy and physiology of the lymphatic system	Introduction to the lymphatic system. lymphatic physiology. lymphatic pathophysiology. Physiopathology of the formation of edema of vascular and lymphatic origin.
Physiotherapy of lymphedema in plastic, reconstructive and aesthetic surgery.	Basics of manual lymphatic drainage. Edema prophylaxis.
Physiotherapy of lymphedema in oncology	Complex decongestive physiotherapy. Manual lymphatic drainage in cancer patients. Multilayer bandage. Pressotherapy. therapeutic exercise.
PRACTICAL TOPICS	•
Manual lymphatic drainage.	Manual lymphatic drainage practice in the upper limb, lower limb, trunk and face. Call and reabsorption maneuvers
Multilayer bandage.	
-	Practice of multilayer bandage in upper limb and lower limb
Pressotherapy.	Pressotherapy practice in the upper and lower limbs

Methodologies	
	Description
Lecturing	The following teaching methodologies will be used: introductory activities, lecture, problem solving,
	debate, discussion forums and collaborative learning.
Laboratory practical	Debate and case studies will be encouraged in laboratory practices.
Mentored work	Through the completion of the work, autonomous problem solving will be encouraged. The work will
	include the completion of a written document as well as its presentation in the classroom.

Personalized assis	tance
Methodologies	Description
Lecturing	Tutorials in person, by email or through the remote campus when students request it.
Laboratory practica	Tutorials in person, by email or through the remote campus when students request it.
Mentored work	Small group tutorials in person, by email or through the remote campus when the students request it.

Assessment	
Description	Qualification Training and
	Learning Results

Essay question exam	ns Theoretical exam: it consists of 5 questions, not being able to leave any without an effective answer.	40		C7 C9 C16 C17 C21	
Laboratory practice	Practical exam: make a practical assumption	50	B1	C38 C16 C17	D7
	Continuous evaluation: the students can avail themselves of the continuous evaluation of the practical contents. In this case, 100% attendance at practical classes is required.			C18 C21 C22	
Essay	The realization, exhibition and defense of the work is mandatory. The formulation and the analysis carried out will be valued, as well as the writing and the use of bibliographic sources.	10	A2 B1	C16 C17	D1 D7

Other comments on the Evaluation

The realization of the work is obligatory as well as the presentation and defense of the same.

Continuous practical evaluation: to take advantage of the continuous evaluation of the practical contents, attendance at all practices is required.

In order to take the practical exam, the student must take the theoretical exam.

To pass the subject, the student must pass the theoretical exam, the practical part and the work independently.
