General description	They are those that configure integrated academic activities as a subject of the plan of studies of the Máster of Therapeutic Exercise in Physiotherapy that has an educational load of 9 credits during the second term. In this subject, the students have to make clinical stays and a dossier concerning the same.			

Skills

Code	
A1	Possess and understand knowledge that provides a foundation or opportunity to be original in the development and/or application of ideas, often in a research context.
A2	That the students know how to apply the knowledge acquired and their ability to solve problems in new or little-known environments within broader (or multidisciplinary) contexts related to their area of study.
A3	That the students are able to integrate knowledge and face the complexity of formulating judgments based on information that, being incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and judgments.
A4	That the students know how to communicate their conclusions and the knowledge and ultimate reasons that support them to specialized and non-specialized audiences in a clear and unambiguous way.
A5	That students have the learning skills that allow them to continue studying in a way that will be largely self-directed or autonomous.
B1	Know how to work in teams that are structured in a uni or multidisciplinary and interdisciplinary way as a professional specialized in Therapeutic Exercise in Physiotherapy.
B2	Incorporate the ethical and legal principles of the physiotherapist profession into professional practice, as well as integrate social and community aspects in decision-making in interventions focused on Therapeutic Exercise in Physiotherapy.
B3	Transmit information in a clear way to the users of the health system, as well as with other professionals.
B6	Develop learning skills that allow them to continue studying in a way that will be largely self-directed or autonomous.
C3	Integrate all knowledge, abilities, skills, attitudes and values; acquired in all subjects, developing all professional skills and training for effective physiotherapy care
C4	Analyze, program and apply movement as a therapeutic measure, promoting the participation of the patient/user in the process.
C5	Acquire the appropriate clinical experience in the use of therapeutic exercise that provides intellectual abilities and technical and manual skills; that facilitates the incorporation of ethical and professional values; and to develop the ability to integrate the content acquired.
C6	Ability to solve problems in new and imprecisely defined environments to identify the most appropriate treatment based on therapeutic exercise in the different processes of alteration, prevention and health promotion, as well as integration with other professionals for the benefit of health of the patient/user.
C11	Adapt therapeutic exercise sessions based on the characteristics of the patient, the pathology and the environment.

C12	Apply a protocol for measuring the functional capacity of patients based on their characteristics, as well as the pathology in the different areas of specialization.
D1	Ability to understand the meaning and application of the gender perspective in the different fields of knowledge and in professional practice with the aim of achieving a fairer and more equal society.
D2	Ability to communicate orally and in writing in the Galician language.
D3	Sustainability and environmental commitment. Equitable, responsible and efficient use of resources.
D4	Knowledge of statistics applied to Health Sciences, or to the field of study related to the field of study.
D5	Recognition of diversity and multiculturalism.
D6	Creativity, entrepreneurial spirit and adaptation to new situations.
D7	Develop leadership and organization skills.
D8	Maintain an attitude of learning and improvement.

Learning outcomes

Expected results from this subject	Training and Learning Results
- To design and schedule a program of therapeutic exercise adapted to the needs of the population.	A1 A2 A3 B1 C3 C4 C6 C11 D1 D4 D5 D6 D8
- To evaluate populations and surroundings with demand of therapeutic exercise.	A2 A3 B1 B2 C3 C6 C12 D1 D3 D5 D6 D8
- To promote the realization and to develop the application of the therapeutic exercise in different clinical populations.	A1 A2 A3 A4 A5 B2 B3 B6 C3 C4 C5 C6 C11 D1 D2 D3 D5 D6 D7

Contents

Topic	
- Application of programs of therapeutic exercise in different groups of population and with different pathologies.	The student will have to evaluate the pathological population patients in the collaborator entity for the realization of the Practicum and schedule and apply a protocol of therapeutic exercise with a determinate clinical purpose.

Planning			
	Class hours	Hours outside the classroom	Total hours
Introductory activities	2	1	3
Practicum, External practices and clinical practices	120	72	192
Portfolio / dossier	0	15	15
Systematic observation	0	15	15

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
	Description
Introductory activities	It will be explained all the rights and duties of the students to facilitate the realization of the clinical Practicum. It will be presented the specific Regulation of external Practices well like the document of the orientation of realization of the practices and like executing and delivering of the dossier, as it will be structured the evaluation of the subject, as it requests and assigns the destinations for the realization of the practices and as they carry out the tutor guidance of the subject.
Practicum, External practices and clinical practices	The student evaluates the clinical population of the center where he/she makes the practices and schedules and applies the physiotherapy treatment based on therapeutic exercise in a clinical context and looking to reach some previously posed aims in the project of external practices. In this clinical context, the student will have to resolve problems that can arise with the application of the protocol posed and make the necessary adaptations for its set up.

Personalized assistance	
Methodologies	Description
Practicum, External practices and clinical practices	The personalized attention will be centered on solving doubts, orienting the development of the dossier to make in the subject, and carrying register and value the made by the students during the realisation of the external practices. It can be developed in face-to-face tutor guidance in the respective offices of the academic co-tutor/to guider or of the coordinator of external practices (academic tutor) or by virtually form through Remote Campus in the respective virtual office of the co-tutors or coordinator related to the previous subject agreement between students and lecturers.

Assessment				
	Description	Qualification	Training and Learning Results	
Portfolio / dossier	The dossier delivered in time and form in function of the established in the space of teaching of the subject in Moovi has to include introduction, description of the practice and methodology of work, reflection about the process and personal relations with the tutor of the entity collaborator and patient, reflection about the methodology applied and bibliography.	20	A1 A2 A3 A4	B1 C3 D1 B2 C6 D2 B3 D4
Systematic observation	It is divided in two parts: the report made by the tutor of the entity collaborator where the practice is developed (40%) and the report presented by the academic tutor on the follow-up of the practices (40%). The report presented by the tutor of the entity collaborator has to include the assistance of the student in addition to the evaluation on the aptitudes and attitudes developed during the external practices. The report presented by the academic tutor will include evaluation of the project of practices, follow-up of the same, tutoring made, among others appearances.	80	A1 A2 A3 A4 A5	B1 C3 D1 B2 C4 D3 B3 C5 D5 B6 C6 D6 C11 D7 C12 D8
