General	Subject that belongs to the Blo	ck of Common Subject	cts of the Industrial	Technologies.	It is part of the curricula
description	of all Degrees of Industrial Eng	ineerina.		-	-

This subject provides an approach to Environmental Engineering, which is necessary to develop any engineering project. In it we work areas of Chemistry and Process Engineering, in order to study the pollutants behaviour and their effect on the environment and organisms, to design physical-chemical processes to mitigate pollution, as well as to evaluate the environmental impact of the industrial wastes.

The subject's objective is to know, understand, and know how to apply the techniques used, on an industrial scale, in fields such as solid wastes treatment and management, wastewater treatment, soil remediation, treatment of polluting gas industrial emissions, and pollution prevention.

English Friendly subject:

International students may request from the teachers: a) resources and bibliographic references in English, b) tutoring sessions in English, c) exams and assessments in English.

Skills	
Code	
B7	CG7 Ability to analyze and assess the social and environmental impact of the technical solutions.
C16	CE16 Basic knowledge and application of environmental technologies and sustainability.
D1	CT1 Analysis and synthesis.
D2	CT2 Problem solving.
D3	CT3 Oral and written proficiency in the own language.
D9	CT9 Application of knowledge.
D10	CT10 Self learning and work.
D12	CT12 Research skills.
D17	CT17 Working as a team.
D19	CT19 Personal relationships.

## Learning outcomes

Expected results from this subject	Training and Learning Results		
Basic knowledge and application of environmental technologies and sustainability	C16	D2	
		D3	
		D10	
		D19	
Problem solving	C16	D2	
		D3	
		D10	
		D19	
Oral and writing communication	C16	D2	
		D3	
		D10	
Knowledge application to practical and real cases	C16	D2	
		D3	
		D10	
		D19	
Analysis and synthesis	C16	D1	
		D2	
		D3	
		D9	
		D10	
		D12	
		D17	
		D19	
Ability to analyze and determine the social and environmental impact of the technical solutions to E	37	D1	
environmental problems		D3	
		D9	
		D10	
		D17	
		D19	

1. Material cycle economy.
1. Material cycle economy.
2. Introduction to the best available techniques (BAT).
1. Municipal waste management.
2. Industrial waste management. Industrial waste treatment facilities.
3. Regulations.
1. Valorization.
2. Physico-chemical treatment.
3. Biological treatment.
4. Thermal treatment.
5. Landfilling.
6. Soil remediation technologies
1. Characteristics of municipal and industrial wastewaters.
2. Wastewater treatment plant.
3. Sludge treatment.
4. Water treatment and reuse
5. Regulations
1. Types and origin of air pollutants.
<ol><li>Dispersion of pollutants in the atmosphere.</li></ol>
3. Effects of the air pollution.
<ol><li>Treatment of polluting gas emissions.</li></ol>
5. Regulations
1. Sustainable development
<ol><li>Life cycle analysis and economy.</li></ol>
<ol><li>Ecological footprint and carbon footprint.</li></ol>
<ol><li>Introduction to the environmental impact assessment</li></ol>

Planning			
	Class hours	Hours outside the classroom	Total hours
Lecturing	26	52	78
Problem solving	11	22	33
Laboratory practical	12	12	24
Objective questions exam	1	0	1
Problem and/or exercise solving	2	0	2
Report of practices, practicum and externa	al practices 0	6	6
Case studies	0	6	6
*The information in the planning table is for	or guidance only and does no	ot take into account the het	erogeneity of the students.

Methodologies	
	Description
Lecturing	Teaching in the classroom of the key concepts and procedures for learning the syllabus contents.
Problem solving	Solving exercises with the teacher's help and independently.
Laboratory practical	Application of the knowledge acquired to the resolution of problems of environmental technology,
	using equipment and facilities available in the laboratory/computer room.

Personalized assistance				
Methodologies	Description			
Laboratory practical	In tutorials, students can consult with their teacher any questions about laboratory practices or the report of practices to be done. The tutoring schedule of the teaching staff will be public and accessible to the students.			
Lecturing	In tutorials, students can consult with their teacher any questions arising in the lectures and related to the contents seen in them The schedule of tutorials of teachers will be public and accessible to students.			
Problem solving	In tutorials, students can consult their teacher any questions about the resolution of problems raised in the classroom. The tutoring schedule of the teaching staff will be public and accessible to the students.			

Assessment	Description	Qualification	Trainin	and
	Description	Qualification	Learr Resu	ning
Objective questions exam	"FINAL EXAM" consisting of theoretical questions related to the syllabus of the subject.	30	B7 C16	D1 D3 D10
	CG7, CE16 and CT19 competences will be assessed in this exam, based on student responses to the questions.			D19
	CT1, CT3 and CT10 competences are also evaluated, since the exam is written and requires students' analysis and synthesis skills.			
Problem and/or exercise solving	"FINAL EXAM" consisting of problems related to the syllabus of the subject.	30		D1 D2
-	CT2, CT9 and CT19 competences will be assessed in this exam, based on the			D3
	resolution of various exercises of environmental technology, which require			D9
	the use of applied knowledge related to the contents of the subject.			D10 D19
	CT1, CT3 and CT10 competences are also evaluated, since the exam is written and requires students' analysis and synthesis skills.			

on the quality of the written report elaborated by each student on his/her	10	Β7	C16	D1 D3 D9 D10 D12 D17
correctness, structure and presentation, analysis and discussion of the results, and conclusions.				DI
Competences CT12 and CT17 will be assessed based on the laboratory work. Lab practices will be carried out in pairs, and it is expected the student develop research skills in the field of environmental technology. The written report must be done in pairs.				
All exercises, seminars, practical cases and theoretical / practical tests that are made and delivered to the teacher throughout the course, related to the concepts and contents of the syllabus.	30	B7	C16	D2 D3 D10 D12
Throughout a four-month time several tests are performed.				
Competences CG7 and CE16 will be assessed considering the students answers to the theoretical questions.				
Competences CT2, CT10 and CT12 will be assessed considering the students answers to the exercises.				
Competenci CT3 will be assessed base on the two parts of the exam: theory and exercises; considering the precision and clarity of the answers.		_		
	<ul> <li>discussion.</li> <li>s The competences: CG7, CE16, CT1, CT3, CT9 and CT10, are assessed based on the quality of the written report elaborated by each student on his/her own. Lab practices will be carried out in pairs, and it is expected the student develop research skills in the field of environmental technology. The written report must be done in pairs.       30       B7       C16         All exercises, seminars, practical cases and theoretical / practical tests that are made and delivered to the teacher throughout the course, related to the concepts and contents of the syllabus.       30       B7       C16         Throughout a four-month time several tests are performed.       Competences CG7 and CE16 will be assessed considering the students answers to the theoretical questions.       Competences CT2, CT10 and CT12 will be assessed considering the students answers to the exercises.       Competencis CT3 will be assessed base on the two parts of the exam: theory

# Other comments on the Evaluation

## **Evaluation**

A student who choose continuous assessment, to pass the course, must achieve a **MINIMUN SCORE** of **4.0 points** (out of 10) *in each of the parts of the "FINAL EXAM*", ie, theory (Objective questions exam) and problems (Problem and/or exercise solving). If a student reaches the minimum grade in both parts of the "FINAL EXAM", to pass the subject must obtain a **FINAL GRADE** of  $\geq$  **5.0**, that is, when the sum of grades of the "practice report", "Case study" and the "FINAL EXAM" (Exam of objective questions + Problem solving and/or exercises) is  $\geq$  5.0.

Students who "officially renounces continuous assessment", will make a "FINAL EXAM" (Objective questions exam + Problem and/or exercise solving) that will be worth 90% of the final grade, and a "EXAM OF PRACTICES" that will be worth 10% of the final grade. In any case, to pass the course, the student must achieve 50% of the maximum score in each of the constituent parts of the subject, ie, theory, problems and practices.

#### Second call:

In the second call the same criteria apply.

In relation to the July exam, grades of the "Case studies" and "Practices report" are maintained, and students only have to repeat the "FINAL EXAM", ie, "Objective questions exam" + "Problem and/or exercise solving".

If, at the 1st call, a student suspended one of the parts of the "FINAL EXAM" (theory or problems) and approves the other party with a grade  $\geq$  6, on the July exam, you only need to repeat the suspended part.

#### Ethical commitment:

The student is expected to present an adequate ethical behavior. If you detect unethical behavior (copying, plagiarism, unauthorized use of electronic devices, etc.) shall be deemed that the student does not meet the requirements for passing the subject. In this case the final grade, in the current academic year, will FAIL (0.0 points).

The use of electronic devices during the assessment tests will be allowed. The fact of introducing into the examination room an unauthorized electronic device, will be reason not pass the course in the current academic year, and the final grade will FAIL (0.0 points)
