|------------------------|--|
| Methodologies          | Description  |
| Lecturing              | Lecture where theoretical principles are presented using digital media, videos and blackboard.           |
| Laboratory practical   | Activities of application of the knowledge to concrete situations and of acquisition of basic skills and |
|                        | procedural skills related with the subject of study.   |
| Project based learning | Resolution of problems related to real case studies.   |

| Methodologies | Description   |  |
|---------------|---|--|
|               | The students can ask the lecturers for the clarification of those concepts presented in the lecturers<br>and practicals, as well as to clarify / discuss any doubts that may appear after the end of the<br>sessions. The tutoring sessions may be carried out by telematic means (Remote Campus, Faitic, etc.)<br>under the modality of prior agreement. |  |

Assessment

Description

Qualification Training and Learning Results

| Laboratory<br>practical    | A) it will evaluate the attendance and active participation in all the practicals of<br>the semester, as well as the correct delivery (time and form) of all the<br>documentation requested (reports, exercises, etc.). Practical sessions will be held<br>in a fixed date, so it is not possible to attend the practical in a later date. Whether<br>the student does not attend to a practical, he/she must demonstrate that the<br>absence was due to unavoidable reasons (e.g. medical reasons). Practicals will<br>marked with the value indicated, only when the student reaches the minimum<br>mark in the written exam, which is 45%. (See following section: 'Other comments') | 2.5  | B3 C14<br>B4 | D1<br>D2<br>D9<br>D10<br>D16<br>D17 |
|----------------------------|---|------|--------------|-------------------------------------|
| Project based<br>learning  | C) Written tests to evaluate the individual work delivered by the student. It will be compulsory the attendance to the 90% of the practicals to obtain the marks given in section C. The marks obtained in the sections A will proportionally affect to the marks of the section C. The section C will be marked with a maximum value of 12,5% of the total mark, only when the student reach the minimum mark in the written exam, which is 45%. (See following section: 'Other comments')   | 12.5 | B3 C14<br>B4 | D1<br>D2<br>D9<br>D10<br>D16        |
| Essay<br>questions<br>exam | Written exam in the dates established by the School.  | 85   | B3 C14<br>B4 | D1<br>D2<br>D9<br>D10<br>D16        |

### Other comments on the Evaluation

Students resigning continuum assessment (after School aproval) will be evaluated only through the written exam which will be graded with 100% of final mark.

Continuum assessment is composed of sections A and C. The maximum mark for continuum assessment (NEC) is 15%, which will be computed from the following equation: NEC (%) =  $0.25 \cdot (A) + 1.25 \cdot (C) \cdot (A)$ ; where A and C are granted 0-1.

Ethical commitment: it is expected an adequate ethical behavior of the student. In case of detecting unethical behaviour (copying, plagiarism, unauthorized use of electronic devices, etc.) shall be deemed that the student does not meet the requirements for passing the subject.

In this case, the overall rating in the current academic year will be Fail (0.0).

The use of any electronic device for the assessment tests is not allowed unless explicitly authorized. The fact of introducing unauthorized electronic device in the examination room will be considered reason for not passing the subject in the current academic year and will hold overall rating (0.0).
