Contents				
Topic				
				<u> </u>

1 UNITS, PHYSICAL QUANTITIES AND VECTORS	
	1.2 Consistency and conversions of units.
	1.3 Uncertainty and significant figures.
	1.4 Estimates and orders of magnitude.
	1.5 Vectors and sum of vectors.
	1.6 Vector components.
	1.7 Unitary vectors. 1.8 Vector products.
	1.9 Sliding Vectors
2 KINEMATICS	2.1 Position, speed and acceleration vectors. Average and instantaneous
Z KINEPIATICS	values.
	2.2 Angular speed and angular acceleration. Average and instantaneous
	values. 2.3 Relation between linear kinematic magnitudes and angular
	magnitudes.
	2.4 Intrinsic components.
	2.5 Study of simple movements: linear motion in 1D, circular motion,
	projectile motion.
	2.6 Expression of kinematic magnitudes in cartesian and polar coordinates
3 NEWTON'S LAWS OF MOTION	3.1 Force and interactions.
3 NEWTON 3 LAWS OF MOTION	3.2 Newton's first law. Inertial and non-inertial reference systems.
	3.3 Newton's second law.
	3.4 Mass and weight.
	3.5 Newton's third law.
	3.6 Momentum. Mechanical impulse. Angular momentum.
	3.7 Contact forces.
4 WORK AND KINETIC ENERGY	4.1 Work done by a force. Power.
	4.2 Kinetic energy.
	4.3 Conservative Forces
	4.4 Elastic potential energy.
	4.5 Potential energy in the gravitatory field.
	4.6 Mechanical energy.
	4.7 Force and potential energy.
5 KINEMATICS OF SYSTEM OF PARTICLES	4.8 Principle of conservation of mechanical energy.5.1 System of particles.
5 NINEMATICS OF STSTEM OF PARTICLES	5.2 Rigid body.
	5.3 Translation movement.
	5.4 Movement of rotation around a fixed axis.
	5.5 General movement.
	5.6 Instantaneus center of rotation.
	5.7 Rolling motion.
	5.8 Relative movement.
6 DYNAMICS OF SYSTEMS OF PARTICLES	6.1 Systems of particles. Internal and external forces.
	6.2 Centre of mass. Movement of the centre of mass.
	6.3 Equations of the movement of a system of particles.
	6.4 Linear momentum. Conservation of linear momentum.
	6.5 Angular moment of a system of particles. Conservation of angular
	momentum. 6.6 Work and power.
	6.7 Potential energy and kinetics of a system of particles.
	6.8 Conservation of energy of a system of particles.
	6.9 Collisions.
7 RIGID BODY DYNAMICS	7.1 Rotation of a rigid body around a fixed axis.
	7.2 Moments and products of inertia.
	7.3 Calculation of moments of inertia.
	7.4 Steiner's theorem.
	7.5 Moment of a force and pair of forces.
	7.6 Equations of the general movement of a rigid body.
	7.7 Kinetic energy in the general movement of a rigid body.
	7.8Work in the general movement of a rigid body.
O CTATICC	7.9 Angular momentum of a rigid body. Conservation theorem.
8 STATICS	8.1 Equilibrium of rigid bodies.
	8.2 Center of gravity. 8.3 Stability.
	8.4 Degrees of freedom and links
	or it begrees or recedorit and links

9 PERIODIC MOTION	 9.1 Description of the oscillation. 9.2 Simple harmonic motion. 9.3 Energy in the simple harmonic motion. 9.4 Applications of simple harmonic motion. 9.5 The simple pendulum. 9.6 The physical pendulum. 9.7 Damped oscillations. 9.8 Forced oscillations and resonance.
10 FLUID MECHANICS	10.1 Density. 10.2 Pressure in a fluid. 10.3 Fundamental principles of fluidostatics. 10.4 Continuity equation. 10.5 Bernoulli equation.
11 MECHANICAL WAVES	11.1 Types of mechanical waves. 11.2 Periodic waves. 11.3 Mathematical description of a wave. 11.4 Speed of a transverse wave. 11.5 Energy of the wave movement. 11.6 Wave interference, boundary conditions and superposition. 11.7 Stationary waves on a string. 11.8 Normal modes of a rope.
LABORATORY	 1 Theory of Measurements, Errors, Graphs and Fittings. Examples. 2 Reaction Time. 3 Determination of the density of a body. 4 Relative Movement. 5 Instantaneous speed. 6 Study of the Simple Pendulum. 7 Experiences with a helical spring. 8 Damped and forced oscillations. 9 Moments of inertia. Determination of the radius of rotation of a body. 10 Stationary waves.
LABORATORY NO STRUCTURED	1. Sessions with no structured activities (open practice) from the theoretical contents of the practices enumerated above. The groups of students shall resolve a practical problem proposed by the professor, selecting the theoretical frame and experimental tools to obtain the solution; for this, they will have basic information and the guide of the professor.

Planning			
	Class hours	Hours outside the classroom	Total hours
Lecturing	24.5	45	69.5
Problem solving	8	20	28
Laboratory practical	18	18	36
Objective questions exam	1	0	1
Problem and/or exercise solving	3.5	0	3.5
Essay questions exam	3	0	3
Report of practices, practicum and externa	al practices 0	9	9
	·		1. 6.1 . 1

^{*}The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
	Description
Lecturing	Explanation by the professor of the contents of the subject, theoretical bases and/or guidelines of a work, exercise or project to be developed by the student.
Problem solving	Problems and/or exercises related to the subject are formulated. The student has to arrive to the correct solution by application of routines, formulas or algorithms, procedures of transformation of the available information and the interpretation of the results. It is usually employed ato complement the lectures.
Laboratory practical	Activities to apply the knowledge to specific situations and to acquire basic skills and procedures related with the subject. They are developed in special spaces with specialized equipment (laboratories, computer rooms, etc).

Personalized assistance		
Methodologies	Description	
Lecturing	In office hours	

Laboratory practical	in office hours
Problem solving	In office hours
Tests	Description
Objective questions exam	In office hours
Problem and/or exercise solving	In office hours
Essay questions exam	In office hours
Report of practices, practicum and external practices	In office hours

Assessment			
	Description	Qualification	Training and Learning Results
Objective question: exam	s Tests for evaluating the acquired competences that include closed questions with different answer alternatives (true / false, multiple choice, pairing of elements). Students select an answer from a limited number of possibilities.	n 10	
Problem and/or exercise solving	Test in which the student must solve a series of problems and / or exercises in a time / condition established by the teacher. In this way, the student must apply the knowledge they have acquired.	40	
Essay questions exam	Competency assessment tests that include open-ended questions on a topic. Students must develop, relate, organize and present the knowledge they have or the subject in an extensive answer.	40	
Report of practices practicum and external practices	, Preparation of a document by the student that reflects the characteristics of the work carried out. Students must describe the tasks and procedures developed, show the results obtained or observations made, as well as the analysis and treatment of data.	10	

Other comments on the Evaluation

The qualification of the continuous evaluation (which we will call EC) will have a weight of 40% of the final grade and will include both the contents of the laboratory practices (weight of 20%, which we will call ECL qualification) and of the classroom (weight of 20%, which we will call ECA qualification).

The ECA qualification will be obtained through theoretical-practical tests (they will be able to understand objective questions and / or development questions) on classroom content.

The ECL qualification will be obtained as the sum of the qualification of the Reports / memories of practices on laboratory contents.

Those students who cannot follow the continuous assessment and who have asked and obtained the EC waiving will have the possibility of taking a final written test to obtain a REC grade that will weigh 40% of the final grade and will include both the contents of the laboratory practices (weight of 20%, which we will call RECL rating) as classroom (weight of 20%, which we will call RECA rating).

The remaining 60% of the final grade will be obtained by completing a final exam that will consist of two parts: a theoretical part (which we will call T) that will weigh 20% of the final grade and another part of problem solving (which we will call P) that will have a weight of 40% of the final grade. The theoretical part will consist of a theoretical-practical test (objective questions and / or development questions). Those students who do not appear for the final exam will obtain a grade of not presented.

Both the final exams and those that are held on dates and / or times different from those officially set by the center, may have an exam format different from the one previously described, although the parts of the exam retain the same value in the final grade.

Final grade G of the subject for the continuous assessment modality:

$$G = ECL + ECA + T + P$$

Final grade G of the subject for the evaluation modality at the end of the semester and July (the RECL and RECA options only for students with waiver granted):

G = ECL (or RECL) + ECA (or RECA) + T + P.

To pass the subject, it is a necessary and sufficient condition to have obtained a final grade G greater than or equal to 5.

Ethical commitment: The student is expected to exhibit adequate ethical behavior. In the case of detecting unethical behavior (copying, plagiarism, unauthorized use of electronic devices, etc.), the student will be considered not to meet the necessary requirements to pass the subject. In this case, the overall grade in the current academic year will be suspended (0.0).

The use of any electronic device during the evaluation tests will not be allowed unless expressly authorized. The fact of introducing an electronic device not authorized in the exam room will be considered a reason for not passing the subject in this academic year and the overall rating will be suspended (0,0).

Recommendations

Other comments

Recommendations:

- 1. Basic knowledge acquired in the subjects of Physics and Mathematics in previous courses.
- 2. Capacity for written and oral comprehension.
- 3. Abstraction capacity, basic calculation and synthesis of information.
- 4. Skills for group work and group communication.

In case of discrepancy between versions, the Spanish version of this guide will prevail.
