Contonto					
Contents					
Topic					
Preliminaries	The field of complex numbers.				
Matrices, determinants and systems of linear		Definition and types of matrices.			
equations.	Matrices operations.	ations row achalon forms	rank of a matrix		
		Elementary transformations, row echelon forms, rank of a matrix. Inverse and determinant of a square matrix.			
		ns of linear equations and t	hoir colutions		
Vector charges and linear mans					
Vector spaces and linear maps.	Vector space. Subspaces.				
	Linear independence, basis and dimension. Coordinates, change of basis.				
	Basic notions on linea				
Eigenvalues and eigenvectors.		· ·	Jaro matrix		
Eigenvalues and eigenvectors.		Definition of eigenvalue and eigenvector of a square matrix. Diagonalization of matrices by similarity transformation.			
		alues and eigenvectors.	mation.		
Vector spaces with scalar product and quadratic		scalar product. Associated	norm and proportion		
forms.		Schmidt orthonormalizatior			
01113.		ation of a real and symmet			
	Ouadratic forms.				
Probability.	Concept and propertie				
Tobability.			ntc		
	Conditional probability and independence of events. Bayes Theorem.				
Discrete random variables and continuous					
random variables.	Definition of random variable. Types of random variables. Distribution function.				
	Discrete random variables. Continuous random variables.				
	Characteristics of a random variable.				
	Main distributions: Binomial, Geometric, Poisson, Hypergeometric,				
	Uniform, Exponential, Normal.				
	Central Limit Theorem.				
Statistical inference.	General concepts.				
	Sampling distributions	5			
	Point estimation.				
	Confidence intervals.				
	Tests of hypotheses.				
Regression.	Scatterplot. Correlation.				
(egi essioni	Linear regression: regression line.				
	Inference about the parameters of the regression line.

Assessment

_	Description	Qualification	Training and Learning Results
Problem solving	Students will make several mid-term exams of	40 por cento en Álxebra; 20 por cento	
	Algebra and Statistics during the course.	en Estatística	
Essay questions	At the end of the semestre there will a final exam of	60 por cento en Álxebra; 80 por cento	
exam	Algebra and a final exam of Statistics.	en Estatística	

Other comments on the Evaluation

At the end of the first quarter, once the mid-term exams and the final exams have been done, the student will have a grade out of 10 points in Algebra (A) and a grade out of 10 points in Statistics (S). The final qualification of the subject will be calculated as follows:

- If both grades, A and S, are greater or equal to 3.5, then the final grade will be (A+S)/2.

- Any of the grades A or S is less than 3.5, then the final qualification will be the minimum of the quantities (A+S)/2 and 4.5.

The students who are exempted by the School from taking the mid-term exams will be evaluated through a final exam of Algebra (100% of the grade of this part) and a final exam of Statistics (100% of the grade of this part). The final grade will be calculated according to procedure described above.

A student will be assigned to NP ("absent") if he/she is absent in both final exams (i.e. Algebra and Statistics); otherwise he/she will be graded according the the procedure described above.

The assessment in the second call (June/July) will be done by means of a final exam of Algebra and a final exam of Statistics (100% of the grade of each part). The final grade will be calculated according to procedure described above.

If at the end of the first quarter a student obtains a grade equal to or greater than 5 out of 10 in any of the parts of the subject (Algebra or Statistics) then he/she will keep this grade in the second call (June/July) without retaking the corresponding exam.

Ethical commitment: Students are expected to commit themselves to an adequate and ethical behaviour. Students showing unethical behaviours (exam cheating, plagiarism, unauthorized use of electronic devices, etc.) will be rated with the minimum grade (0.0) in the current academic year.

As a general rule, the use of any electronic device for the assessment tests is not allowed unless explicitly authorized.
