## **Training and Learning Results**

## Code

- A1 CB6 Possess and understand knowledge that provides a basis or opportunity to be original in the development and/or application of ideas, often in a research context
- A2 CB7 Students should be able to apply their acquired knowledge and problem-solving skills in new or unfamiliar environments within broader (or multidisciplinary) contexts related to their area of study.
- A5 CB10 That students possess the learning skills that will enable them to continue studying in a manner that will be largely self-directed or autonomous.
- Maintain and extend sound theoretical approaches to enable the introduction and exploitation of new and advanced technologies in the field of Artificial Intelligence.
- B3 Search and select useful information needed to solve complex problems, handling with fluency the bibliographic sources of the field.
- Work in teams, especially multidisciplinary teams, and be skilled in time management, people management and decision making.
- C23 Understanding and mastering the basic concepts and techniques of digital image processing.
- C24 Ability to apply different techniques to computer vision problems.
- C25 Knowledge and skills to design systems for detection, classification and tracking of objects in images and video.
- C26 Understanding and mastery of the forms of representation of signals and images according to their data, as well as their fundamental characteristics and their forms of representation.
- D3 Utilizar las herramientas básicas de las tecnologías de la información y las comunicaciones (TIC) necesarias para el ejercicio de su profesión y para el aprendizaje a lo largo de su vida.
- D4 To develop for the exercise of a citizenship respectful of democratic culture, human rights and gender perspective.
- D8 Value the importance of research, innovation and technological development in the socioeconomic and cultural progress of society.
