Methodologies

	Description
Mentored work	They constitute the most important part of the matter. They will make of individual way or forming teams and will have the greater educational weight, so much in hours as in the total of the evaluation.
Seminars	They will use , fundamentally, for the put in common of the works made, for the queries and debates on the central subjects of the matter and for the realisation of individual or collective presentations.
Lecturing	It is, by definition, the time devoted to give the theoretical contents of the matter and some that, although of character rather practical, need an explanation on his function or operation.

Personalized assistance

Methodologies	Description
Lecturing	In the theoretical sessions
Mentored work	In the practical sessions and tutoring schedules
Seminars	In the practical sessions

Systematic observation	Assistance to class	20	A5 D4

Other comments on the Evaluation

INSTRUCTIONS ON THE CONTINUOUS EVALUATION SYSTEM

Practical work and percentage of assessment

The course is structured around several assignments. These practical assignments constitute 80% of the grade. Attendance to class, which is mandatory, accounts for the remaining 20%.

P1. Practical Assignment 1. Valuation of 20% of the total grade. Information about the tasks to be carried out, their format,

length, evaluation rubric, and submission channels will be explained by the instructor.

P2. Practical Assignment 2. Valuation of 20% of the total grade. Information about the tasks to be carried out, their format, length, evaluation rubric, and submission channels will be explained by the instructor.

P3. Practical Assignment 3. Valuation of 20% of the total grade. Information about the tasks to be carried out, their format, length, evaluation rubric, and submission channels will be explained by the instructor.

P4. Practical Assignment 4. Valuation of 20% of the total grade. Information about the tasks to be carried out, their format, length, evaluation rubric, and submission channels will be explained by the instructor.

A1. Attendance to class sessions. Valuation of 20% of the total grade. Attendance will be recorded in all course sessions (Sign-in sheet indicating name, ID, and signature). This will be the evidence to demonstrate attendance and the only way to access the 20% valuation. Attendance is mandatory, and in case of absence, it must be justified.

SECOND CHANCE. BRIEF DESCRIPTION

Students who are enrolled in continuous evaluation must pass in the second opportunity all those methodologies or tests that they did not pass in the first opportunity.

To coordinate the second chance, students must contact the responsible instructor, who will establish the relevant tests.

The conditions for the second chance described here apply to all subsequent opportunities.

INSTRUCTIONS ON THE GLOBAL EVALUATION SYSTEM

The default evaluation system at the University of Vigo is the continuous evaluation system. Students who opt for the global evaluation system must follow the following guidelines.

Formal requirements prior to evaluation:

Students must inform the instructor of their express resignation from the continuous evaluation system within the deadline established by the center, attaching the document provided for this purpose and signed.

Test 1. Theoretical exam. The theoretical exam will be carried out. The exam has a value of 40% of the total grade, and it is necessary to obtain a minimum grade of 5 points to pass this part. A lower grade will not be considered as an average with the other tests.

Test 2. Practical assignments. Students must submit the four assignments proposed by the instructor. The set of assignments (4) has a value of 30% of the total grade. A minimum grade of 5 points must be obtained in each assignment to pass this part. A lower grade will not be considered as an average with the other tests. The assignments will be submitted on the date and time of the exam.

Test 3. Practical activity. After taking the theoretical exam, students enrolled in continuous evaluation must attend with the instructor to the usual practice room, where they must carry out practical activities similar to those carried out by students enrolled in the continuous evaluation system. The test will last a maximum of two hours from the beginning of the activity. The details of the tests and the evaluation criteria will be sent to students no later than one month after their resignation from the continuous evaluation system. The selection of practical activities, as a whole, has a weight of 30% of the total grade. A minimum grade of 5 points is required to pass this part. A lower grade will not be considered as an average with the other tests.

Other aspects to consider

This course is taught in PRESENCIAL mode, so it is the duty of students to attend the teaching sessions at the time established by the center.

As already indicated when explaining the continuous evaluation system, attendance of the members present will be recorded in all sessions (Sign-in sheet indicating name, ID, and signature).

This regulation applies to all students enrolled in this course WITHOUT EXCEPTION.

For everything not expressly contemplated and/or detailed in this guide, the instructions of the Regulation on Evaluation, Grading, and Quality of Teaching and the Student Learning Process (Approved in the plenary session on April 18, 2023) will be taken as reference.
