Web				
General description	Is it possible to describe the functioning of economies in an analytical way? The aim of this course is to provide tools for analysing economic data and detecting regularities that allow for analytical analysis of issues of economic interest.			
	English Friendly subject: International students may request from the teachers: a) resources and bibliographic references in English, b) tutoring sessions in English, c) exams and assessments in English.			

Training and Learning Results

Code	
C2	Understand the basic language of economics and the way economists think.
C4	Ability of situating an economy in its own historical evolution.
C5	Understand the basic functioning of the economy, both from a broad perspective as well as a close one.
C6	Acquire knowledge of economic analysis.
C8	Ability to look for, identify and interpret relevant sources of economic information and their contents.
D5	Skills to make coherent and intelligible statements both in oral and written form.

Expected results from this subject

Expected results from this subject	Training and Learning Results
The student will become familiar with the economists' way of thinking, i.e. in the use of the fundamental analytical tools and in the knowledge of the basic concepts of economics.	C2 C4 C5 C6
The student will become familiar with the use of economic databases as well as the use of spreadsheets that allow them to organise the information obtained from these databases.	C8
Students will learn to analyse economic data and to present their conclusions in an organised manner.	D5

Contents

Topic	
1. Introduction	1. Introduction

2. The data	2.1. National accounts: GDP, Sector Publish and External Sector. 2.2 Prices: IPC and Deflator of the GDP 2.3 Demography and Labour Market 2.4 Money 2.5 Financial Sector 2.6 Prices: rates of interest and indexes
3. Subjects aggregated	3.1. Economic growth 3.2. Economic cycles
4. Giving sense to the data: economic models	4.1 Model of the Circular Flow of the Rein 4.2 The restrictions of the Economic Agents: Saving, Investment, Public Debt and External Sector 4.3 The Quantitative Equation, Parity of the Purchasing power and Parity of the Exchange Rate

Planning

	Class hours	Hours outside the classroom	Total hours
Lecturing	29	36	65
Problem and/or exercise solving	18	20	38
Essay	4	35	39
Presentation	1	2	3
Oral exam	0	5	5

Methodologies

	Description
Lecturing	Weekly kinds of two hours of theory.

Personalized assistance

Methodologies Description

Lecturing	Individual tutorials will take place, by appointment with interested students, in the Virtual Office https://campusremotouvigo.gal/access/public/meeting/487723425 Access two students: DespachoVirtual-307
-----------	---

Tests	Description
Essay	Personalised guidance on the work to be done and resolution of problems encountered by students.

Assessment

	Description	Qualification	Training and Learning Results
Problem and/or exercise solving	Exercises in practical classes on the proposed problems, and other work and activities proposed in class throughout the course.	45	C2 C4 C5 C6
Essay	Final report of the course.	40	C8 D5
Presentation	Presentation in class of the charts and graphs requested in the Final Report. Cumulative work to be presented at the end of the course.	15	C2 D5 C4 C5 C6 C8
Oral exam	The Global Assessment exam consists of an oral part and a written part for those students who wish to obtain an Honours Degree, and for those who do not opt for continuous assessment (100% of the mark). It will take place on the official date established in the exam calendar.	--	C2 D5 C4 C5 C6 C8

Other comments on the Evaluation

Continuous assessment. The student's grade will consist of four parts: the presentation of exercises in practical classes, exercises proposed in class (both must be uploaded to the platform), plus other exercises proposed throughout the course, up to 45% of the grade; completion of a paper (40%) and its public presentation (15%), both of them (paper and presentation) are compulsory to achieve 55% of the grade. The student's final grade will be the sum of the grades of these four parts. The final oral exam is compulsory for students who wish to obtain an honours degree in the subject.

If a student does not pass the course through continuous assessment, he/she will have to take the global assessment test (oral exam and exercises) which will represent 100% of the grade.

For the second opportunity (extraordinary call), the continuous assessment coincides with that of the course.

Alternatively to the continuous assessment system, the student can choose to be assessed with a global assessment test (oral exam and exercises) which will represent 100% of the grade.

In the **final degree call** (only for Spanish students) the oral exam will account for 100% of the grade.

The dates of the global assessment exams will be available on the Faculty's website (<http://fccee.uvigo.es>).
