General description	The main objective of this course is to introduce students into the analysis of economic inequality, an issue of increasing importance in public debates in both developed and developing countries. We study the different approaches and main tools for the quantification of phenomena related with equity in the distribution of economic resources such as inequality, poverty, or discrimination of women in the labor market. We discuss the main practical problems and conceptual issues associated with the quantification of these phenomena. We also present the most adequate indicators, after analyzing their properties, and study current trends and their causes. A gender perspective is transversal to the whole course. The course has a very practical orientation so that the student has the necessary tools to be able to interpret critically studies and reports related with equity. After the course, the student should also be able to replicate the main indicators using household survey data using specific free software for distributive analysis (DAD). Undertaking a brief report about a distributive issue in which students apply their acquired knowledge is essential part of the course.			

English Friendly subject: International students may request from the teachers: a) resources and bibliographic references in English, b) tutoring sessions in English, c) exams and assessments in English.

Training and Learning Results

Code	
C6	Acquire knowledge of economic analysis.
C8	Ability to look for, identify and interpret relevant sources of economic information and their contents.
C9	Identify and anticipate relevant economic issues in both public and private spheres.
C13	Ability to prepare economic assessment reports
D5	Skills to make coherent and intelligible statements both in oral and written form.

Expected results from this subject

Expected results from this subject	Training and Learning Results
Identify the main problems associated to the distribution of resources and the discrimination	C6 C9
I handle of tools stop the analysis *distributiva employing the sources available data on conditions of life of the homes and labour market.	C6 C9
Understanding and capacity of manufacture of one inform related with a problem *distributivo	C6 C8 C9 C13

Contents

Topic

1. Introduction: wellbeing	1.1 Theoretical setting: The economic analysis of the inequalities 1.2 Methodological issues in the analysis of the wellbeing
2. Economic inequalities	2.1 Inequality, income distribution and social welfare 2.2 Ordinal comparisons of inequality: the Lorenz curve 2.3 Cardinal comparisons of inequality: inequality measures and their properties 2.4 Extensions
3. Poverty and social exclusion	3.1 Identification of the poor population: poverty lines 3.2 Quantification of poverty: poverty measures 3.3 Ranking distributions based on poverty 3.4 Poverty dynamics 3.5 Multidimensional poverty 3.6 Determinants of poverty
4. Economic analysis of the discrimination	4.1 Inequality between groups and discrimination 4.2 Explanations of inequalities in the labor market 4.3 Labor discrimination by gender and race 4.4 Hiring and occupational segregation 4.5 Gender wage discrimination

Methodologies

	Description
Lecturing	Class exposition of the main contents of the syllabus.
Seminars	Computation of indicators on spreadsheet and inequality software (DAD), using information on income distributions. Discussion and interpretation of results. Preparation and presentation of an essay.

Personalized assistance

Methodologies Description

Seminars	During the seminars, students will receive personalized assistance in the resolution of problems using the course tools.
----------	--

Tests Description

Essay	During the essay, students will receive personalized assistance in the resolution of problems using the course tools. The office hours will be available at the web of the course (Moovi). To ask for an appointment, please send an email to cgradin@uvigo.gal
-------	---

Assessment

	Description	Qualification	Training and Learning Results
Objective questions exam First partial exam		30	C6 C9
Objective questions exam Second partial exam		40	C6 C9
Essay	An essay using sources of available statistical data, with specific statistical software (Excel, DAD), with presentation in the classroom.	30	C6 C8 C9 C13

Other comments on the Evaluation

The student may choose between the continuous evaluation system and the global evaluation system in accordance with the procedures and deadlines established by the center.

The continuous evaluation system will consist of two partial exams, as well as an essay. To pass the course it is necessary to achieve at least 40% of the grade in each of the three tests, and 50% in total.

In the global evaluation system, the result will exclusively be determined by the official final exam. Extraordinary calls, will only use global evaluation. The official dates of exams will appear on the faculty website (<http://fccee.uvigo.es>)
