Air transport and airborne systems				
Subject	Air transport and airborne systems			
Code	O07G410V01404			
Study programme	Grado en Ingeniería Aeroespacial			
Descriptors	ECTS Credits	Choose	Year	Quadmester
	6	Mandatory	2nd	2nd
Teaching language	#EnglishFriendly Spanish			
Department				
Coordinator	Orgeira Crespo, Pedro			
Lecturers	Orgeira Crespo, Pedro			
E-mail	porgeira@uvigo.es			
Web	http://aero.uvigo.es			
General description	The subject is divided in two main areas. First, civil aerial transport fundamentals are introduced, as well as the regulatory laws, the elements that constitute it, and its interactions. Second, airborne systems are described. English Friendly subject: International students may request from the teachers: a) materials and bibliographic references in English, b) tutoring sessions in English, c) exams and assessments in English.			

Training and Learning Results	
Code	
B1	Capabiliity for design, development and management in the field of aeronautical engineering (in according with what is established in section 5 of order CIN / 308/2009), aerospace vehicles, aerospace propulsion systems, aerospace materials , airport infrastructures, air navigation infrastructures and space management, air traffic and transport management systems.
B7	Capability to analyze and assess the social and environmental impact of technical solutions.
C14	Understand the air transport system and the coordination with other transport modes.
C19	Applied knowledge of: science and technology of materials; mechanics and thermodynamics; fluid mechanics; aerodynamics and flight mechanics; navigation and air traffic systems; aerospace technology; theory of structures; airborne transportation; economy and production; projects; environmental impact.
C21	Appropriate knowledge applied to engineering: foundations of sustainability, maintenance and operation of aerospace vehicles.
D1	Capability of analysis, organization and planification.
D2	Leadership, initiative and entrepreneurship
D3	Capability of oral and written communication in native lenguage
D4	Capability of autonomous learning and information management
D5	Capability to solve problems and draw decisions
D6	Capabiliity for interpersonal communication
D8	Capabiliity for critical and self-critical reasoning
D13	Sustainability and environmental commitment. Equitable, responsible and efficient use of resources

Expected results from this subject	Training and Learning Results		
Knowledge of the structure and the elements that conform the current system of world-wide transport.		C14	D1 D5 D8
Understanding of the legal characteristics of the aerial transport and knowledge of this transport mode law	B1 B7	C14 C21	D1 D2 D3 D4 D8 D13

Knowledge of the different elements that integrate the system of transports: aerial companies, manufacturing, airports, aerial navigation suppliers	B1 B7	C14 C19	D1 D2 D4 D6 D8 D13
Comprise the most important aspects of the situation of the aerial transport in the actuality, so much in Spain how in the rest of the world	B1 B7	C14 C19 C21	D1 D2 D3 D4 D6 D8 D13
Knowledge of the different systems and subsystrems onboarded in aerospace vehicles	B1 B7	C14 C19 C21	D1 D3 D4 D8 D13
Knowledge of the way in which the aerial way inserts in the system of transport and the distinct forms of cooperation and intermodal competition	B1	C14	

Contents

Topic	
Aerial transport	Structure and elements that constitue current world-wide transport system. Insertion of the aerial mode in the transport system and the different ways of cooperation and intermodal competition. Economic and social benefits of the aerial transport. Legal frame of the aerial transport and international law system. Elements that constitute the system of transportation: aerial companies, manufacturing, airports, aerial navigation suppliers. Situation of the aerial transport nowadays, in Spain and in the rest of the world.
Onboard systems	Introduction to flight systems Engine and fuel Systems Hydraulic System Eectrical System Pneumatic System Air conditioning Systems Navigation Systems Positioning Systems

Planning

	Class hours	Hours outside the classroom	Total hours
Lecturing	33.5	68.5	102
Laboratory practical	12	14.5	26.5
Report of practices, practicum and external practices	1	7.5	8.5
Objective questions exam	2.5	0	2.5
Objective questions exam	2.5	0	2.5
Report of practices, practicum and external practices	1	7	8

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

	Description
Lecturing	The teacherwill expose the theoretical bases of the subject. The students will have basic reference texts
Laboratory practical	IT and laboratory solutions will be used to solve problems and exercises and apply the knowledge achieved.

Personalized assistance

Methodologies	Description
Lecturing	The teacher will attend personally the doubts and queries of the students, in person, or by telematic support.

Laboratory practical	The teacher will attend personally the doubts and queries of the students, in person, or by telematic support.

Assessment

	Description	Qualification	Training and Learning Results		
Report of practices, practicum and external practices	Report covering all requirements given	18	B1 B7	C14 C19 C21	D1 D2 D3 D4 D5 D6 D8 D13
Objective questions exam	Test or question's evaluation exam.	40	B1 B7	C14 C19 C21	D3 D8
Objective questions exam	Test or question's evaluation exam.	30	B1 B7	C14 C19 C21	D3 D8
Report of practices, practicum and external practices	Report covering all requirements given	12	B1 B7	C14 C19 C21	D1 D2 D3 D4 D5 D6 D8 D13

Other comments on the Evaluation

By default, the evaluation is assumed to be continuous. The student has the right to opt for the global evaluation according to the procedure and deadline established by the center for each call.

- Continuous evaluation:

- At the first opportunity:

- There will be a partial, liberating and retrievable exam during the course, with part of the contents of the subject. To pass said written test and release that part of the subject, it is necessary to obtain a grade of 5 out of 10; this part can be released if the grade exceeds 4 out of 10, and if the rest of the parts compensate the grade to exceed a final grade of 5 out of 10. The weight of this test in the final grade for this case is 30% .

- A final exam will be held on the official date indicated by the center. Said written test will consist of two parts: a first for students who have passed the partial exam, and with a weight of 40% in the final grade; a second part, for students who have not passed the partial exam (with its weight, of 30%)

- Two qualifying internships will be delivered within the regular internship schedule, with a weight of 30% in the final grade: a first, with a partial weight of 40%, and a second, with a partial weight of 60%.

- The minimum grade to be achieved in any test will be 4 out of 10 to be able to balance the exam and practicals. To pass the subject, you must pass a weighted grade (written exams, possible work, internships), of 5 out of 10, and it is also required to have attended at least 90% of the internships. The written tests may consist of test-type questions and/or short questions and/or development questions.

- In the second opportunity:

- Students who have not passed the subject at the first opportunity will take an exam that will cover all aspects of the subject.

- To pass the subject you must pass 5 out of 10. The exam may consist of test-type questions and/or short questions and/or development questions.

- Global evaluation / End of career:

- At the first opportunity:

- A final exam will be held on the official date indicated by the center, which will cover all aspects of the subject.

- To pass the subject you must pass 5 out of 10. The exam may consist of test-type questions and/or short questions and/or development questions.

- In the second opportunity:

- The conditions are the same as in the case of continuous evaluation.

In case of detection of plagiarism in any qualification item, the qualification in said item will be 0 and the fact will be communicated to the Center's management for the appropriate effect.
