

IDENTIFYING DATA

Management of protected areas and biodiversity

Subject	Management of protected areas and biodiversity			
Code	P03G370V01801			
Study programme	(*)Grao en Enxeñaría Forestal			
Descriptors	ECTS Credits	Choose	Year	Quadmester
	6	Optional	4th	2nd
Teaching language	Spanish Galician			
Department	Ecology and Animal Biology			
Coordinator	Cordero Rivera, Adolfo			
Lecturers	Cordero Rivera, Adolfo			
E-mail	adolfo.cordero@uvigo.es			
Web	http://ecoevo.uvigo.es			
General description	(*)Introdución aos principios da Bioloxía da Conservación aplicados á Xestión de Espazos protexidos e Conservación da Biodiversidade			

Competencies

Learning outcomes

Expected results from this subject	Training and Learning Results
New	

Contents

Topic	
1. The science of conservation.	The origins and brief history of conservationist movements. Principles of conservation biology. Ecology and Environment. Importance of science in conservation.
2. Present the ecological values and functions of biodiversity.	Genetic diversity, and by ecosystem: the concept of biodiversity. Why should you keep the species? The intrinsic value of the species and their conservation status. The instrumental values and rarity of the species. The values of ecosystems.
3. Biodiversity and stability.	The concept of stability. The diversity-stability debate (a history of controversy, current studies, compartmentalization, diversity and global change, implications for conservation biology). Recoil.
4. Ecological principles in the exploitation of natural resources.	Optimum performance concept. Principles for the exploitation of resources. Genetic changes in exploited populations. The exploitation of forests. Forest certification (FSC, PEFC).
5. Extinction	Number of species that inhabit the planet. The causes of the rarity of the species. IUCN classification. Estimation of extinction rate. Processes and causes of extinction. Degradation and destruction of habitats. Metapobocional dynamic. Analysis of viability of populations (PVA).
6. Management of species and populations.	Addresses of the units. In situ and ex situ conservation. Scarcity of resources. Control of threats. Transfers and artificial breeding. Role of zoos, botanical gardens and museums. Importance of ethology in conservation. Case study: the example of the black ferret pin.
7. E-mail management and restoration of ecosystems	. Principles of ecosystem management. Modified ecosystems (logging, agricultural ecosystems, aquatic ecosystems). Restoration of ecosystems.
8. Social factors in conservation.	Description of the values. Qualification priorities. Cultural changes. Environmental education. Galician strategy of environmental education.

9. The economics of conservation.	Economic valuation of biodiversity (types of sustainability, decision models in the ecological economy, the value of biodiversity). Cost of maintenance (method of cost of the trips, the method of revealed preferences, an economic and ecological perspective of market). The tragedy of communal property.
10. Political action and conservation.	International organizations (IUCN MAB program). Government agencies: The Spanish strategy for sustainable development. Spanish strategy for the conservation of biodiversity. Non-governmental organizations (NGOs). Companies and individuals. Scientific research, policy and conservation. Ecologism as a political ideology.
11. Reserves and protected parks.	Objectives of the creation of reserves (the problem of fragmentation). Representation of biodiversity. The main features of design reservations: size, dynamic context, spatial, connectivity, buffer zones. Protected natural areas of Galicia.
12. Conservation legislation	Biodiversity Agreements (Berne, Ramsar, Washington (CITES), Bonn Biodiversity (Rio de Janeiro) European legislation (Birds Directive, Habitats Directive) State legislation (Law 42/2007 on Natural Heritage, Decree 139 / 2011 catalog species in danger Decree 1628/2011 Catalog of invasive species) Legislation of Galicia: .. of Galician law of conservation of nature.
13. Management plans for endangered species.	Guidelines, objectives and feasibility. Examples: the management plan for the European turtle (<i>Emys orbicularis</i>) in Galicia; Plan of control of liberal populations (<i>Odonata</i>) of European interest; Reproductive biology and Camariña management (<i>Corema album</i>) in the Cíes Islands.
Practice 1. Design of Reservations: Testing the species-area relationship.	(*)
Practice 2. Taxonomic principles and characteristics of communities. Its use in the decision-making process on conservation.	(*)
Practice 3. Contingent assessment: Survey on social attitudes against conservation.	(*)
Practice 4. Analysis of the viability of populations using the vortex program.	(*)
Practice 5. Field output. Visit to the Center of Zooxenética Resources of Galicia.	Study of two systems of conservation of xermoplasma of autochthonous cattle breeds.
Practice 6. Field Output. Visit to the Natural Park of Fragas do Eume.	Contact with the actual treatment of the protease area, with its specific characteristics and problems.
Practice 7. Field output. Visit to the National Park of the Atlantic Islands of Galicia.	Given the peculiarities of the Park, with its insularity, the visit will be to the reception center of visitors in Vigo, if the climatic and climatic conditions so advise.

Planning

	Class hours	Hours outside the classroom	Total hours
Lecturing	30	52.5	82.5
Studies excursion	11	16.5	27.5
Classroom jobs	5	10	15
Computer practices	4	4	8
Short answer tests	2	0	2
Essay	5	10	15

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

	Description
Lecturing	Presentation by the professor of the most important concepts of the subject
Studies excursion	Understanding key concepts through study outings.
Classroom jobs	work and exposure practical classroom analysis methodologies.
Computer practices	study key concepts through computer simulations.

Personalized attention

Tests	Description
Essay	A sand county almanac, Aldo Leopold. Monographic work on the book

Assessment

Description		Qualification	Training and Learning Results
Lecturing	(*)Avaliarase mediante exames de resposta curta.	65	
Studies excursion	(*)Avaliaranse no exame da materia mediante preguntas específicas.	5	
Classroom jobs	(*)Avaliaranse no exame da materia mediante preguntas específicas ou ben mediante traballos escritos.	10	
Computer practices	(*)Avaliaranse no exame da materia mediante preguntas específicas ou ben mediante traballos.	10	
Short answer tests	(*)Forman parte do exame escrito da materia	0	
Essay	(*)Entrega dun traballo monográfico sobre o libro "A sand county almanac", de Aldo Leopold. O traballo debe ser entregado un mes antes da data do exame.	10
