Methodologies	
	Description
Lecturing	Exhibition by part of the professor of the contained envelope to subject object of study, theoretica bases and/or guidelines of the work, exercise or project to develop pole student. The course will be taught through master class sessions whose dates and times are marked in the official calendar of the master's degree. The classes will take place simultaneously - in person - at the Pontevedra and A Coruña campuses and - online - through the UVigo remote campus. During these sessions there will be a presentation and explanation of the contents. In addition, in the topics that allow it, practical exercises will be interspersed to help assimilate the concepts of each topic.
	All material (presentations, tests, resources, etc.) will be made available to students on the UDC Virtual Campus as it is used. Recordings of class sessions will also be linked on this platform (please keep in mind for privacy purposes).
Autonomous problem solving	Along the course will propose exercises that will owe to resolved of individual form by part of student.

Case studies	Along the course present situations problem that will be #analyze and studied by part of the students to propose solutions to the even. Sessions will be interrupted at any time to raise doubts, comments on the application of the concepts to professional environments or discuss any practical experience related to the subject. At the end of each topic there will do review tests with a similar format as the final exams.
Practices through ICT	Available material (audiovisual, documents, dossier, etc.) for online modality. Some activities, forums of debate and concrete exercises will be proposed.

#### Other comments on the Evaluation

The grading of the course will be based on **individual exams for each of the topics** covered.

The **weight of the exams** in the final grade will be distributed as follows:

Topics 1 and 3 will each have a weight of 25% in the final grade.

Topic 2 (Scrum) will always have a weight of 50% in the final grade.

The following **pass criteria** should also be taken into account:

Exams 1 and 3 will contribute to the final grade regardless of whether they are passed or not.

It is established as a necessary requirement to pass the subject to have passed topic 2 (Scrum).

Each exam will be considered passed if a grade of 6 or higher is achieved.

All exams will be composed of short questions (single-choice, multiple-choice or true/false) and wrong questions will not penalize the grade.

The use of documentation or notes during the exams is allowed but a time limit will be established for each exam (at the rate of one and a half minutes for each question).

All exams will be conducted through the Virtual Campus of the UDC and, on each convocation date, will be accessible from

In order to make the study of the subject more flexible and to be able to combine the master's degree with the work and personal life of each student, the exams of the course will be available one week after the end of the classes (in an additional exam session prior to the official calendar date). In other words, this course will have three exam dates.

In the case of not taking or not passing any of these exams, the student will be able to retake the exams without any penalty on the date of the official calendar of the master's degree. In this case, it will only be necessary to take the exams of the failed or failed subjects.

### Recommendations

#### **Other comments**

In order to unify and facilitate communication during the sessions, regardless of the physical location of the students, a single videoconferencing platform will always be used as the main tool (Remote Campus, Teams, etc.) for all groups. The platform to be used will be announced before the start of the sessions.

Such devices will also be necessary to perform some practical exercises using platforms and tools that are only accessible through the Internet.

In the event that any tool requires prior registration, you will be notified in advance at the beginning of the session.
