Methodologies

	Description
Practicum, External practices and clinical practices	The student develops the activities in a context related to the exercise of a profession, during a certain period, carrying out the functions assigned and foreseen in the internship proposal. In the case of the Practicum, these practices are included in studies that lead to certain regulated professions. Clinical practices are developed in a context related to health sciences.

Mentored work	The student, individually or in groups, prepares a paper on the subject of matter or prepare seminars, research, memoirs, essays, summaries of readings, lectures, etc.. Generally it is an autonomous activity of the student that includes finding and collecting information, reading and literature management, writing ...

Other comments on the Evaluation

The evaluation system consists of the evaluation of the two methodologies used in these practices:

1. The evaluation of the external internship through the reports of the student, the entity and the internship tutor of the University of Vigo (70% of the qualification).
2. The evaluation of a final report on the internship. In this section, the administrative and institutional management of all the procedures involved in the internship is part of the student evaluation criteria, since it is a dynamic way of observing how the student moves between Administrations (fundamental competence in a Degree in Public Management) (30% of the qualification).
