Personalized assistance

Methodologies	Description
Problem solving	Personalised attention implies attention in the classroom and during tutoring hours, as well as attention via the e-learning platform. The objectives of personalised attention include general guidance on the subject, the promotion of learning strategies, offering indications on assignments and exercises, analysing the results obtained in tests already taken or advice on how to pass the course. It is recommended that students inform in advance of their intention to attend a tutoring session. Appointments must be made via email.

Other comments on the Evaluation

General considerations

The mastery of the linguistic and communicative competences of this subject will be assessed by means of several partial tests for each of the skills specified in this teaching guide. The specific dates for each test will be announced by the teachers in the classroom well in advance.

The final grade for the subject will be calculated taking into account all the skills worked on throughout the term, with the distribution indicated in the previous section and detailed below:

Use of English & Vocabulary: 35%.

Reading: 25%

Writing: 40%

In order to pass the subject as a whole, a minimum mark of 5 points as an overall mark (out of 10) will be required, 5 points being the minimum mark required in each of the partial tests.

Remarks

The assessment will take into account not only the relevance and quality of the content of the answers but also their linguistic and stylistic correctness. Otherwise, the evaluation test may result in a fail.

Total or partial plagiarism in any type of work or activity will result in an automatic failure in the subject as a whole, regardless of the tests already taken and/or passed. Claiming ignorance of what constitutes plagiarism will not exempt students from their responsibility in this respect.

It is the student's responsibility to check email regularly, to consult materials and news via the e-learning platform, and to be aware of the dates on which the assessment tests take place. Single assessment dates are announced on the FFT website. Continuous assessment dates are announced in class well in advance, except for spontaneous tests. The teaching staff is not obliged to communicate assessment dates via the teledocency platform.

If, for any health-related reason, face-to-face exams cannot be held, the affected assessment test(s) may be considered to be carried out via the e-learning platform and/or via Campus Remoto.

Other comments

All students must upload a photo to the e-learning platform during the first week of class. The photo must be a passport photo or sufficiently clear to show the student's face. Assessment marks will not be published for students who do not provide a photo.

Consistent and serious study of the subject is recommended. Students who do not have the required level (minimum C1) will have to seek English language training on their own.

Daily and autonomous work by the students is essential to follow and pass the subject. It should be borne in mind that the hours spent in the classroom are only part of the total hours of work necessary to pass the subject; in no case do they represent the total number of hours that students will have to dedicate to the subject. In this sense, it is highly recommended that the material handled by the students is not limited to that seen in the classroom sessions. It is recommended that time be devoted to reading newspapers, books and magazines in English, watching videos, films, series in English, etc.

Students should be reminded that they must respect the copyright of both the books used as teaching support and the original materials produced and provided by teachers in the classroom or through the teaching support platform.

During classes, students may not use mobile devices (telephone, tablet, PDA or similar) or computers, unless the teacher allows or requires the use of these devices for teaching purposes.

The use of dictionaries, notes and electronic devices (mobile phones, tablets, computers, etc.) is not permitted during exams.

It is the student's responsibility to have the necessary telematic means available in order to keep track of the subject and any possible assessment tests. In the event of any technical problem that makes it difficult to access virtual teaching, students should inform the university's technical services (SAUM) as soon as possible, where they will be able to receive advice.

The criteria described here will also apply to external students (Erasmus, etc.). In the event of not being able to access the distance learning platform, external students should contact the subject teaching staff as soon as possible.

If there are students belonging to the Senior Programme in the subject, their assessment process may be different from that applied to the rest of the students and will be agreed with the subject teaching staff sufficiently in advance.
