Architectural Heritage, Urban Territory and Landscape

Subject	Architectural Heritage, Urban Territory and Landscape			
Code	002M143V03212			
Study programme	Máster Universitario en Valoración, Gestión y Protección del Patrimonio Cultural			
Descriptors	ECTS Credits	Choose	Year	Quadmester
	3	Optional	1st	2nd
Teaching language	Spanish			
Department				
Coordinator	Barriocanal López, María Yolanda			
Lecturers	Barriocanal López, María Yolanda Castro Fernandez, Belen Maria			
E-mail	barriocanal@uvigo.es			
Web	http://moovi.uvigo.gal/course/view.php?id=1075			
General description	The subject aims to provide students with the necessary tools for the protection of real estate, based on the evolution of the concept of heritage in the different provisions that regulated it, its need for cataloging and the extension of protection to the environment or spatial framework of the monuments. On the other hand, the study of the historical groups, the instruments of plan for the protection of the historical city and its valorisation are also addressed.			

Training and Learning Results

Code	
A4	That the students know how to communicate their conclusions -and the knowledge and ultimate reasons that sustain them- to specialized and non-specialized audiences in a clear and unambiguous way.
B1	Acquire the ability to differentiate and assess the various expressions of Cultural Heritage, know the tools for their quantification and protection, as well as the different perspectives that address their management.
C8	Understand the multifactorial values of Cultural Heritage, and assess it appropriately according to criteria of social use.
C11	Acquire the ability to handle documentary tools and historiographic techniques for the characterization of heritage assets.
C15	Know and apply the procedures and mechanisms for the valuation and protection of the architectural Heritage in its territorial and administrative context.
D6	Know how to transmit in a clear and unambiguous way to a specialized audience or not, results from scientific and technological research or the most advanced field of innovation, as well as the most relevant foundations on which they are based
D9	Know and manage the legislation applicable to the sector, know the social and business environment and know how to relate to the competent administration by integrating this knowledge into the development of engineering projects and the development of any aspect of their professional work.

Expected results from this subject

Expected results from this subject	Training and Learning Results
Know the evolution in the protection of the Architectural Heritage from its consideration as isolated goods to its integration in a territorial context.	A4 B1 C8 C11 C15 D6 D9

Attend both to the historical aspects, to the procedures and mechanisms for the protection of the environments of the monuments, as well as to the instruments and figures for their protection and conservation.

The results of learning are: Qualify to the student to know the evolution of the applicable legislation to the different expressions of the Cultural Heritage.	30	B1 C8 D9 C15
Systematic observation	It will evaluate positively the participation of the students through the telematic means in the distinct virtual activities proposals in the development of the matter. The results of learnings are: Qualify to the students for the critical sensitisation and understanding of the values of the Heritage.	30	A4 B1 C8 D6 C11 D9 C15

Other comments on the Evaluation

According to the 2023 "Regulation on the evaluation, qualification and quality of teaching and the student learning process of the University of Vigo", there are two evaluation systems that students can choose: the preferred one, which will be applied by default, of "**continuous evaluation**" (diversified tests and activities that take place throughout the semester), and the so-called "**global evaluation**" (tests and/or delivery of work/exercises to be carried out on the official dates of evaluation established in the academic calendar), which must be expressly requested by the interested students, and communicated to the responsible teaching staff within a maximum period of 31 days from the beginning of each term.

The "**global evaluation**" tests for this subject will consist as follows: Case study (60%) and Problem solving and/or exercises (40%).

Students have two evaluation calls/opportunities. The first is carried out during the teaching semester. The second (or 2nd opportunity) will take place in the month of July, for which access to the teaching platform will be enabled again.

Recommendations

Other comments

The teaching of the subject will be always of face-to-face telematic way, well was synchronous or asynchronous, using the eMoodle (MooVi) educational platform and participating in the educational activities through multiple videoconference (e-meeting, Remote Campus).

To be able to receive the teaching of effective way it si recommended , previously to the start of the subject, to consult the

manual of access to the platform and to follow the technical specifications in order to assist to the remote sessions. It is indispensable that each student access to the educational platform of the subject previously to the beginning of the same.
