| General description | (*)Esta asignatura tiene como objetivo capacitar al alumno para interpretar documentación cartográfica y saber aplicar diferentes tecnologías de elaboración de cartografía necesarias en los proyectos de documentación del patrimonio cultural inmueble y su entorno inmediato. |           |      |            |

## Competencies

|      |   |
|------|---|
| Code |   |
| A3   | That students are able to integrate knowledge and face the complexity of making judgments based on information that, being incomplete or limited, includes reflections on social and ethical responsibilities linked to the application of their knowledge and judgments.                   |
| B2   | Acquire the necessary knowledge to handle the different tools of graphic, dimensional and geospatial documentation to be applied in the documentation and valuation of Cultural Heritage.   |
| C5   | Master and be able to apply instruments and procedures of various cartographic techniques to the real cultural heritage for its dimensional control and the elaboration of graphic documentation using CAD tools.   |
| C6   | Analyze, refine and interpret geographic information, as well as its storage in databases, based on technical requirements for the inventory and documentation of an intervention project.  |
| D5   | Be able to predict and control the evolution of complex situations through the development of new and innovative work methodologies adapted to the specific scientific / research, technological or professional field, in general multidisciplinary, in which their activity is developed. |
| D8   | Acquire advanced knowledge and demonstrate, in a context of scientific and technological research or highly specialized, a detailed and substantiated understanding of the theoretical and practical aspects and the methodology of work in one or more fields of study.                    |

## Learning outcomes

| Expected results from this subject  | Training and Learning Results |    |          |          |
|---|-------------------------------|----|----------|----------|
| Know the different technologies that allow generating cartographic documents of heritage assets     | A3                            | B2 | C5<br>C6 | D5<br>D8 |
| Be able to interpret, refine and analyze dimensional information as well as optimize its management | A3                            | B2 | C5<br>C6 | D5<br>D8 |

| <b>Contents</b>   |  |
|---|--|
| Topic   |  |
| Foundations of Cartography  | Geoid and terrestrial ellipsoid.<br>Cartographic systems.<br>System of Projection UTM.<br>Models of cartographic data. Metadatos.<br>Sources of cartographic data.   |
| Foundations of Topography.  | Instruments and topographical methods<br>digital Models of the terrain and of surface.<br>Curves of level  |
| Systems GPS   | Introduction to the systems GPS<br>Foundations of the system GPS, errors, parameters that affect to the precision.<br>Types of systems GPS and instruments. Obtaining and interpretation of the information. |
| Models 2D and 3D of objects   | Clouds of points, models of surfaces, volumetric models, and other models of information.  |
| The teledetection like source of information for the preparation of cartography | Foundations of space teledetection<br>basic Concepts of Thematic cartography.<br>Teledetection and Projects of cartographic documentation.   |

## Planning

|                            | Class hours | Hours outside the classroom | Total hours |
|----------------------------|-------------|-----------------------------|-------------|
| Introductory activities    | 0.5         | 0.5                         | 1           |
| Lecturing                  | 1.5         | 1.5                         | 3           |
| Case studies               | 4           | 6                           | 10          |
| Autonomous problem solving | 0           | 25                          | 25          |
| Mentored work              | 0           | 30                          | 30          |
| Essay                      | 0           | 4                           | 4           |
| Systematic observation     | 0           | 2                           | 2           |

\*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

## Methodologies

|                            | Description   |
|----------------------------|---|
| Introductory activities    | Activities directed to take contact and gather information on the students, as well as to present the subject. They will present index card of the matter, aims, calendar, criteria of evaluation, as well as forums of debate and news and other surroundings in which it will manage the learning.      |
| Lecturing                  | Exhibition of the main theoretical contents of the matter with help of audiovisual means. The students will have the possibility to assist to said session in shape of videoconference.   |
| Case studies               | Analysis of a problem or real case, in order to know it, interpret it, solve it, generate hypotheses, diagnose it and go into alternative solution procedures, to see the application of theoretical concepts in reality. They will be used as a complement to the theoretical classes for self-learning. |
| Autonomous problem solving | Activities in which they formulate problems and/or exercises related with the matter. The student has to develop of autonomous form the analysis and resolution of the problems and/or exercises.   |
| Mentored work              | The student presents the result obtained in the preparation of a document on the thematic of the matter in the preparation of seminars, investigations, memories, essays, summaries of readings, conferences, etc   |

## Personalized assistance

| Methodologies | Description   |
|---------------|---|
| Mentored work | The personalised attention will consist in the orientation of the level of learning required, the introduction to the materials, the resolution of doubts and the explanation of the dynamics of the development of the matter in the platform of teledocencia. |

## Assessment

| Description | Qualification | Training and Learning Results |
|-------------|---------------|-------------------------------|
|-------------|---------------|-------------------------------|

|                        |  |    |    |    |          |          |
|------------------------|--|----|----|----|----------|----------|
| Essay                  | The student presents the result obtained in the preparation of a document on the thematic of the matter, in the preparation of seminars, investigations, memories, essays, summaries of readings, conferences. The results of learning evaluated are the capacity to manage big quantities of documentary data in diverse formats, so that they cooperate in the common work of management of the cultural heritage. | 80 | A3 | B2 | C5<br>C6 |          |
| Systematic observation | Evaluation of the active participation and based of the students in the activities of the process education-learning   | 20 | A3 | B2 | C5<br>C6 | D5<br>D8 |

### Other comments on the Evaluation

The student, in accordance with the valid rule, has two sessions of \*evaluaciÃ³n\*.

The first carries out during the semester of \*enseÃ±anza\* establishing in this case a \*cronograma\* of tasks of delivery.

The second \*evaluaciÃ³n\* carries out in the month of July, for which the access to the platform of \*enseÃ±anza\* enableÃ³ again.

In the \*reuniÃ³n\* extraordinary of July, the criteria of \*evaluaciÃ³n\* beÃ³n the same.
