Subject	(*)Biomateriales avanzados e enxeñaría tisular			
Code	V04M192V01106			
Study programme	Máster Universitario en Ingeniería Biomédica			
Descriptors	ECTS Credits	Choose	Year	Quadmester
	6	Mandatory	1st	1st
Teaching language	Spanish Galician			
Department				
Coordinator	González Fernández, Pio Manuel Serra Rodríguez, Julia Asunción			
Lecturers	Chiussi, Stefano González Fernández, Pio Manuel López Álvarez, Miriam Serra Rodríguez, Julia Asunción			
E-mail	pglez@uvigo.es jserra@uvigo.es			
Web				
General description				

Training and Learning Results

Code	
A4	Students can communicate their conclusions, and the knowledge and rationale underpinning these, to specialist and non-specialist audiences clearly and unambiguously.
B1	Ability to design, develop, implement, manage and improve products and processes in the different areas of the biomedical engineering, by means of appropriate analytical, computational or experimental techniques.
B3	Knowledge in basic and technological subjects that will enable students to learn new methods and theories, and provide them the versatility to adapt to new situations.
B4	Ability to solve problems with initiative, decision making, creativity, critical reasoning and to communicate and transmit knowledge, abilities and skills in the field of biomedical engineering.
B5	Knowledge to carry out measurements, calculations, assessments, appraisals, surveys, studies, reports, work plans and other similar works.
C6	Knowledge of tissue engineering and ability to analyze, manage and design biomaterials with advanced properties and response to stimuli.
D1	Ability to understand the meaning and application of the gender perspective in the different fields of knowledge and in professional practice with the aim of achieving a more just and equal society.
D3	Sustainability and environmental commitment. Equitable, responsible and efficient use of resources.

Expected results from this subject

Expected results from this subject	Training and Learning Results
Know the basic principles of tissue engineering and the ones of biomaterials with advanced properties, including response to stimuli	B3 C6 D1 D3

Apply knowledge of the theoretical concepts of tissue engineering and the ones of biomaterials with advanced properties, including response to stimuli.

A4
B1
B4

D3

Contents

Topic	
1.- Introduction to advanced biomaterials and tissue engineering	1.1. Basic concepts on advanced biomaterials 1.2. Basic concepts on tissue engineering
2.- Design of advanced biomaterials	2.1. Basic technical features and examples of bioinspired biomaterials 2.2. Basic 3D design tools 2.3. Scaffolds for tissue engineering 2.4. Biomaterials with osteoconductive and osteoinductive properties 2.5. Biomaterials with bactericidal properties 2.6. Biomaterials with antitumor properties
3.- Smart biomaterials	3.1. Basic technical features and examples of biosensors 3.2. Heat-transfer-based biomedical devices by laser-induced phototherapy 3.3. Heat-transfer-based biomedical devices by electromagnetic induction 3.4. 4D Printing: 3D biomaterials shape/function modification over time in response to specific temperature, humidity or pressure conditions
4.- Manufacture, characterization and sterilization of advanced biomaterials	4.1. Techniques for the manufacture of advanced biomaterials 4.2. Techniques for the characterization of advanced biomaterials 4.3. Techniques for the sterilization of biomaterials
5.- Biological evaluation of biomedical devices	5.1. Nature of the substrate/support for culture and aseptic techniques 5.2. Physicochemical and physiological conditions of the cell growth medium 5.3. Incubation conditions: gas phase, humidity and temperature 5.4. Advantages and disadvantages of cell culture
6.- Case reports	6.1. Case study in Musculoskeletal System 6.2. Case study in Dentistry 6.3. Case study in Otorhinolaryngology 6.4. Case study in Tissue Engineering
7.- Practical experiences	7.1. Design and manufacture of advanced biomaterials 7.2. Design and 3D manufacture for tissue engineering 7.3. Hyperthermia testing 7.4. Analysis of advanced biomaterials 7.5. Manufacturing in Clean Room 7.6. Cytotoxicity assay

Planning

	Class hours	Hours outside the classroom	Total hours
Lecturing	10	25	35
Presentation	10	21	31
Case studies	4	5	9
Research based methodologies	4	5	9
Laboratory practical	16	30	46
Essay questions exam	1	0	1
Presentation	1	0	1
Report of practices, practicum and external practices	1	16	17
Systematic observation	1	0	1

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

	Description
Lecturing	Content exposure by the lecturer on the subject matter of study, including theoretical bases, guidelines for reports and proposal of practical exercises that the student has to develop.
Presentation	Oral exposure by the students to the teacher and a group of students on a particular subject of interest within the contents or on the obtained results from a task, exercise, project... It will be carried out individually or in a group.
Case studies	Analysis of specific cases on the subject under study. The results of the search and analysis of the information will be presented to the teacher and group of students.

Research based methodologies	Activities developed in the laboratory practices and the preparation of reports based on the results of the scientific research carried out by following the scientific methodology.
Laboratory practical	Activities of application of knowledge to specific situations implying the acquisition of basic and procedural skills related to the subject matter of study. They will be performed in prepared spaces with specialized equipment (laboratories, computer rooms...)

Personalized assistance

Methodologies	Description
Presentation	Resolution of doubts and personalized help during one-on-one tutoring hours
Research based methodologies	Personalized guide on the experimental work taking into account the specific strengths and needs of each student
Laboratory practical	Personalized guide on the experimental work taking into account the specific strengths and needs of each student

Assessment

	Description	Qualification	Training and Learning Results		
Essay questions exam	Tests that include open questions on a developed topic as well as short answer questions.	30		B1 B3 B4	C6
Presentation	Content exposure by the students to the teacher and/or a group of students on a topic of relevance about the contents or the obtained results from a task, exercise, project... It can be carried out individually or in a group.	30	A4	B3 B4	C6
Report of practices, practicum and external practices	Preparation of a report by the students in which the characteristics of the assigned work will be reflected. Students must describe the tasks and developed protocol, show the obtained results or observations made, as well as the procedure followed for data analysis and treatment.	30	A4	B1 B3 B4 B5	C6
Systematic observation	Attentive, rational, planned and systematic perception to describe and record the attitude/aptitude of the student.	10	A4	B4	D1 D3

Other comments on the Evaluation

The subject surpasses when obtaining a mark equal or upper to 5 points (on 10 points), obtained of the following form:

a) Continuous evaluation, practices of laboratory (30%) and oral expositions (30%), mandatory with minimum assistance of 80%;b) Global evaluation, proof of short answer (30%) and systematic observation (10%)c) Second opportunity, only reevaluation of methodology/proofs considered non apt.

EXCEPTIONAL MEASURES PLANNED

=== ADAPTATION OF METHODOLOGIES ===

* Teaching methodologies that are modified

* Remote-teaching

The Remote Campus tools will be used in synchronous mode for the presentation of contents, fundamentals, theory, general guidelines for carrying out activities and practical cases. All teaching material and resources will be available on the Faitic platform.

* Non-face-to-face mechanism for student assistance (tutoring)

Personalized attention. Communication via e-mail or other necessary telematic tool. Virtual Office Tutoring (Remote Campus).

=== ADAPTATION OF THE ASSESSMENT ===

On-line tests will be carried out (Remote Campus and Fatic) to expose topics, send papers and a multiple answer questionnaire.

The ratios indicated in the teaching guide of the subject will be maintained.
