*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
	Description
ICT suppoted practices	Realisation by part of the students of practices guided and supervised.
(Repeated, Dont Use)	
Mentored work	Realisation by part of the students of works of component so much theorist like practice.
Lecturing	Exhibition by part of the *profesorado of the main theoretical contents related with the
	*ciberseguridad in industrial outlines.

Personalized assistance				
Methodologies	Description			
ICT suppoted practices (Repeated, Dont Use)	The professors of the subject will provide individual attention and customized to the students during it study, solving his doubts and questions. Likewise, the professors will guide and will guide to the students during the realization of the tasks that have assigned, in the practical tasks and in the guided works. The doubts generated would be attended during the lessons or even during the personalized time.			

	Description	Qualification	Training and Learning Results
ICT suppoted practices (Repeated, Dont Use)	Evaluation of the reports of realization of practices	30	
Mentored work	Evaluation Of the memory and execution of one guided work agreed with the student.	30	
Objective questions exam	Evaluation of the resulted of an examination with the contained theoretical and practical of the subject	40	

Other comments on the Evaluation

FIRST OPPORTUNITY

Two posibilities: continuous evaluation and only one evaluation.

The continuous evaluation will imply to do the laboratory practices (30%), a guided work (30%) and a mixed exam (40%). The final score has to be least 5/10. A student that delivers at least one practice will be considered that attends the continuous evaluation.

In the case of only one evaluation, the evaluation will be performed by an unique exam with theoretic and practical contents. The final score has to be at least 5/10 to pas.

The student has to choose between both alternatives before the end of the second week of lessons.

SECOND OPPORTUNITY And EXTRAORDINARY ANNOUNCEMENTS

The students that chooses the continuous evaluation have the option to hold the score of practices and guided work. The students have to pass a theoretical and practical exam. The weight of the practices, guided works and exam are the same as in the first opportunity (30,30,40).

The other students will be considered as only one evaluation and will have to realize an unique exam containing theoretical and practical parts.

OTHER COMMENTS

The scores of previous courses will not be hold.

Plagiarism at the work reports will be considered as a score of 0. The Master header will be informed.

Recommendations

Contingency plan

Description

=== EXCEPTIONAL MEASURES SCHEDULED ===

STAGE 1: MIXED TEACHING

Because of the exceptional situation, due the impossibility to teach in person, the teaching will be performed in an online way.

For the online teaching, we will use the tools provided by the University, at present the "Remote Campus" and FAITIC tools. Nevertheless it will be able to be complemented by using other means.

STAGE 2: TEACHING COMPLETELY ONLINE.

Because of the exceptional situation, due the impossibility to teach in person, the teaching will be perform in an online way.

All the teaching will use the tools provided by the University, at present the "Remote Campus" and FAITIC tools. Nevertheless it will be able to be complemented by using other means.

=== ADAPTATION OF THE METHODOLOGIES ===

For the laboratory practices, we will substitute the practices that require specific equipment by virtualized practices or simulated ones. Eventually, other similar practices will be proposed that are able to be performed online or at home. The practices will be able to have an autonomous format to prevent conciliation problems and/or connectivity problems..

Tutoring sessions (attention to the students) will be done using telematic tools (Email, FAITIC forums, Remote Campus), that will be complemented by using other means. In some cases an appointment will be necessary.

=== ADAPTATION OF THE EVALUATION ===

The evaluation in the case of no-presence will be done by using of on-line proofs using Remote Campus and FAITIC.
