Web	http://faitic.uvigo.es				
General	This course aims at providing students with a systematic adequacy to develop the appropriate skills for				
description	communicating in Technical Er	nglish at level A2 acco	ording to the Comn	non European Fr	amework of Reference
	for Languages (CEFR).				
	As far as possible, students wi	II be monitored so as	to accommodate t	o each individua	l needs.

Compet	encies
Code	
B10	CG10 Ability to work in a multidisciplinary and multilingual environment.
D1	CT1 Analysis and synthesis.
D4	CT4 Oral and written proficiency in a foreign language.
D7	CT7 Ability to organize and plan.
D10	CT10 Self learning and work.
D13	CT13 Adaptability to new situations.
D17	CT17 Working as a team.
D18	CT18 Working in an international context.

Learning outcomes			
Expected results from this subject	Traini	ng and Learning Results	
To improve students' sense of linguistic awareness of English as a second language, the gramatical	B10	D1	
and lexical mecanisms and types of expressions.		D4	
· · · · · ·		D7	
		D10	
		D13	
		D17	
		D18	
Improving students' listening and reading skills, as well as their speaking and writing skills.	B10	D1	
		D4	
		D7	
		D10	
		D13	
		D17	
		D18	

To upgrade students' gramatical and lexical notions of the English language, and the comprehension of basic Technical English structures. D1 D2 D3 D13 D13 D17 D10 D13 D17 D10 D13 D17 D10 D13 D17 D17 D18 D17 D19				
D7 D10 D13 D17 D18 D19				
To encourage students to use the English language within the engineering context, and the B10 D1 benefits and usefulness of the English language when applying their grammatical, lexical, and D1	comprehension of basic reclinical English structu	ies.		
To encourage students to use the English language within the engineering context, and the D1 D1 benefits and usefulness of the English language when applying their grammatical, lexical, and D4 Cultural knowledge. D7 D10 D10 D10 D13 D17 D18 D19				- :
To encourage students to use the English language within the engineering context, and the benefits and usefulness of the English language when applying their grammatical, lexical, and D4 cultural knowledge. D7 D7 D10 D10 D13 D17 D18 D18 D17 D18 D18 D19

1. English grammar	UNIT 3
2. Vocabulary/Use of English	Reading: Job Qualities for an Engineer.
3. Technical-scientific language	Speaking: Expressing one own's qualities, and personal characteristics and
4. Speaking	abilities.
5. Listening	Listening: Mobile phones.
6. Reading comprehension	Grammar: Relative Clauses.
7. Writing	Writing: Dividing a text into types of paragraphs.
8. Direct and inverse translation of specific parts	
of the discourse	
1. English grammar	UNIT 4
2. Vocabulary/Use of English	Reading: Repairing a Broken Wall Socket.
3. Technical-scientific language	Speaking: Advantages and disadvantages of the different generation
4. Speaking	power systems.
5. Listening	Listening: How do Nuclear Power Plants work?
6. Reading comprehension	Writing: A description of a repair.
7. Writing	Grammar: Adverbs of sequence; conditional sentences; connectors:
8. Direct and inverse translation of specific parts	contrast, reason, purpose, and result.
of the discourse	

1. English grammar UNIT 5

2. Vocabulary/Use of English Reading: Robots - Nothing to lose but their chains.

3. Technical-scientific language Speaking: Comparison and contrast.
4. Speaking Listening: Manipulating Glass Properties.

5. Listening Writing: Cover letters.

6. Reading comprehension Grammar: Verb tenses expressing future; time adverbials; using "enable",

7. Writing "allow", "permit", "make", and "cause".

8. Direct and inverse translation of specific parts

of the discourse

1. English grammar UNIT 6

2. Vocabulary/Use of English Reading: Difference Engines.

3. Technical-scientific language Speaking: Expressing hypothetical future.

4. Speaking Listening: Car Repairs.

5. Listening
 6. Reading comprehension
 7. Writing
 Listening: Industrial Can Processing.
 Writing: Letter of Motivation.
 Grammar: Review of verb tenses.

8. Direct and inverse translation of specific parts

of the discourse

1. English grammar
2. Vocabulary/Use of English
3. Technical-scientific language
4. Speaking
5. Listening
6. Properties of Materials.
Reading: Properties of Materials.
Reading: Land and Off-shore Windfarms.
Speaking: Expressing cause and effect.
Listening: Innovations is Great (1).

6. Reading comprehension Listening: E-trading and e-trading.

7. Writing Writing: Easy reports.

8. Direct and inverse translation of specific parts Grammar: Expressing cause and effect.

of the discourse

1. English grammar UNIT 8

Vocabulary/Use of English
 Technical-scientific language
 Speaking: Expressing likelihood.
 Listening: Innovation is Great (2).

5. Listening6. Reading comprehensionWriting: Descriptions.Grammar: Likelihood.

7. Writing

8. Direct and inverse translation of specific parts

of the discourse

1. English grammar UNIT 9

2. Vocabulary/Use of English Reading: Water is Everything.

3. Technical-scientific language Reading: Man-made Building Materials.

4. Speaking: Materials used in industry: purpose and cause.

5. Listening Listening: Fuel Cells.

6. Reading comprehension Grammar: Adjectives: present participle, past participle.

7. Writing

8. Direct and inverse translation of specific parts

of the discourse

Planning			
	Class hours	Hours outside the classroom	Total hours
Introductory activities	1	0	1
Troubleshooting and / or exercises	4	15	19
Autonomous troubleshooting and / or exercises	4	15	19

Methodologies			
	Description		
Introductory activities	Activities aiming at introducing the subject, establish contact with students, and to gather		
	information about their previous knowledge of the English language.		
Troubleshooting and / o	Troubleshooting and / or Analysis and problem solving activities in relation to exercises concerning grammar and vocabulary,		
exercises	and communicative skills.		

Autonomous troubleshooting and / exercises	Activities focused on dealing with problems and/or exercises in relation to this subject. Students or develop skills to autonomously analyse and solve problems and/or exercises.
Group tutoring	Tutor and tutees carry out joint reviews for discussing issues concerning the so far course achievements and learning process.
Classroom work	The practice activities in connection to the four communication skills: Listening comprehension, Speaking, Reading comprehension, and Writing, as well as Use of English in Technical English. These activities are done individually or in groups (teamwork).
Presentations / exhibitions	In order to assess communication skills, students, in group or individually, accomplish guided Technical English oral and writing presentations.
Others	Role-play activities whose purpose is to improve students speaking skill, and to increase their participation in order to prompt the interaction of the group in English.

Personalized attention			
Methodologies	Description		
Troubleshooting and / or exercises	By group tutorials we mean the meeting of tutor and tutees in the classroom, and personal advising during tutorial hours. The aim of group tutorials and personal advising is to offer students guidance about the purpose of the course, to encourage learning strategies, guidance in the performance of assignments and exercises, a thorough analysis of the so-far obtained assessment scores, or advice for the successful completion of the Technical English examination. No tutorials will be carried out via telephone conversations or the internet (emails or Skype, etc.) If case of questions or comments students must contact the tutor in the classroom or at tutorial hours, as indicated above.		
Group tutoring	By group tutorials we mean the meeting of tutor and tutees in the classroom, and personal advising during tutorial hours. The aim of group tutorials and personal advising is to offer students guidance about the purpose of the course, to encourage learning strategies, guidance in the performance of assignments and exercises, a thorough analysis of the so-far obtained assessment scores, or advice for the successful completion of the Technical English examination. No tutorials will be carried out via telephone conversations or the internet (emails or Skype, etc.) If case of questions or comments students must contact the tutor in the classroom or at tutorial hours, as indicated above.		

Assessment				
	Description	Qualification	Lea	ning and arning esults
Classroom work	Practical tasks in relation to listening comprehension and writing skill.	30	B10	D1 D4 D7 D10 D13 D17 D18
Presentations / exhibitions	Performance of the speaking skill in relation to engineering topics, aimed to consolidate an acceptable fluent communication in English.	20	B10	D1 D4 D7 D10 D13 D17 D18
Others	To reach a competent level of speaking in given situations, in order to comment and discuss distinctive features of a specific topic.	20	B10	D1 D4 D7 D10 D13 D17 D18
Short answer tests	These are in relation to testing grammar usage and its applications in the Technical English framework. Students perform short answers exercises such as fill in the gaps, transformations, cloze, multiple choice, etc. to test their knowledge of the linguistic skill of Use of English.	10	B10	D1 D4 D7 D10 D13 D17 D18

Practical tests, real task The performance of reading comprehension assessments carried out on execution and / or articles about technology dissemination.

D4 simulated.

Other comments on the Evaluation

There are two evaluation systems. Choosing a system excludes the other. To qualify under the system of continuous evaluation, students are required to attend 80% of the total lecture hours with academic progress and involvement. Therefore students not attending the total hours of the percentage established will lose this option. Students making use of the continuous evaluation counts 100% in the assessment of their final grade with the course assignments and testings. The failure to complete the assignments requested along the course will be counted as a zero (0.0). The assignments requested must be delivered or submitted by the deadlines and dates marked beforehand.

Students making use of the only evaluation or final examination sit for examination with a final overall assessment, taking place on the oficial date established by the School of Industrial Engineering. To this end, students should consult the School web site, where the examination date and time are specified in accordance to students subject attendance either Campus or City Centre (Torrecedeira).

1. Continuous Evaluation

The final mark for this subject is computed taking into consideration all the skills practiced during the course. Therefore each of them counts as follows: Listening (20%); Speaking (40%); Reading (20%); Writing (20%). The sum of these four skills represents the 80% for the mark, whereas Use of English examination sums up 20%.

So, the final mark will be established adding skills and Use of English tests up to 100%, being 5 (five) the mark necessary to obtain a pass in all skills and Use of English tests.

Students, who in the publication of the first assessment record, have scored a non-pass in one or several skills, must retake the part or parts for the corresponding failed skills in the July exam of 2017 to obtain a pass. In case of a second non-pass in July 2017, students must undergo examination for all skills in future courses. Therefore, those passed parts will not be taken into account in the future or subconsequent to course 2016-2017.

Partial or total plagiarism in any of the assignment or activity will result in an automatic non-pass on the subject. Plead ignorance of what plagiarism is, will not exempt students of their responsibility in this regard.

2. Final Examination (May and July)

The only examination is computed as follows. Overall final assessment counts 80% for Listening (20%); Speaking and oral presentation (40%); Reading (20%); Writing (20%), whereas Use of English test sums up 20%.

So, the final mark will be established adding skills and Use of English test up to 100%, being 5 (five) the mark necessary to obtain a pass in all skills and short answer tests.

Regarding July assessment (second call assessment) continuous evaluation students will undergo examination for the specific parts of the subject contents not completed; while students of the only examination who failed in the previous exam notification (first call) must undergo an assessment of the total subject contents (100%).

Both continuous assessment and final examination will take into account not only the relevance and appropriateness of the content of the answers, but also their linguistic correctness. In addition, during the examinations no dictionaries, notes or electronic devices (mobile phones, tablets, PCs, etc.) will be allowed.

It is students responsibility to check FAITIC or their e-mails to be kept up to date on the uploaded teaching materials, as well as to be aware of examination or submission dates.

All the comments here indicated also pertain to Erasmus students. In the event of not being able to access information on FAITIC, students have to contact the teacher to solve the problem.

Ethical commitment: Students are requested to present an adequate ethical behaviour. In case of detecting an unethical behaviour (coping, plagiarism, use of not authorized electronic devices, and others) will be considered that the student does not meet the requisites necessary to pass the subject. In this case, the global qualification in the present academic course will be of a fail (0.0)."

Recommendations

Other comments

We recommend students, who wish to take part in this course, to have a prior A1 level in English so as to reach the A2 level, according to the European Framework of Reference for Languages of the Council of Europe.

Requisites: To register in this subject it is necessary to have passed or to be registered for all the subjects of the lower-division courses to the course where this subject is placed.

We also recommend continuous assessment due to the methodology used to practice and consolidate the learning process of the subject contents. Therefore, the active participation of students is essential to pass the Technical English subject requisites.

It is advisable to check the School's lectures timetable so as to avert imcompatibility of attendance with any other subject. Therefore students will not be permitted to sit for continuous evaluation if there is overlap.

In order to avoid damaging computers, students will not be allowed to take drinks or food into the classroom. If the ingestion of liquid or food is necessary, students must show an official medical prescription.
