| General | (*)Os obxectivos que se perseguen nesta materia son: | | | | | | |
| description | - Descrición e análise dos elementos dos circuítos eléctricos. | | | | | | |
| | - Resolución de circuítos en réxime *estacionario *sinusoidal. | | | | | | |
| | - Análise sistemática de circuítos eléctricos. | , | | | | | |
| | - Conceptos de potencia e enerxía así como a súa dete | rminacion. | | | | | |
| | - Análise de circuítos a partir de *teoremas. | anático do co | n.í. | | | | |
| | Fenómenos nos que se basea a conversión electroma Aspectos xerais comúns e tecnolóxicos das máguinas | | XId. | | | | |
| | - Aspectos verais comuns e technioxicos das maquinas | electificas. | | | | | |

Competencies

Code

- B3 CG3 Knowledge in basic and technological subjects that will enable them to learn new methods and theories, and equip them with versatility to adapt to new situations.
- C10 CE10 Knowledge and use of the principles of circuit theory and electrical machines.
- D2 CT2 Problems resolution.
- D6 CT6 Application of computer science in the field of study.
- D10 CT10 Self learning and work.
- D14 CT14 Creativity.
- D17 CT17 Working as a team.

| Learning outcomes | | | | |
|--|---------|-----------------------|-----|--|
| Expected results from this subject | | Training and Learning | | |
| | Results | | | |
| Comprise the basic appearances of the operation of the circuits and the electrical machines | В3 | C10 | D10 | |
| | | | D17 | |
| Know the experimental process used when it works with electrical circuits and scheme electrical. | | C10 | | |
| Know the available current technicians for the analysis of electrical circuits | В3 | | D2 | |
| | | | D6 | |
| Know the technicians of measure of the electrical circuits | | C10 | D2 | |
| | | | D17 | |
| Purchase skills on the process of analysis of electrical circuits | В3 | | D2 | |
| | | | D14 | |

| | | | |

| Topic SUBJECT 1. INTRODUCTION And AXIOMS | 1.1 Magnitudes and units. |
|--|---|
| , | 1.2 References of polarity. |
| | 1.3 Concept of electrical circuit. |
| | 1.4 Axioms of Kirchhoff. |
| SUBJECT 2. ANALYSIS OF LINEAR CIRCUITS | 2.1 Ideal Elements: definition, representation and mathematical model. |
| RESISTIVES | 2.2 Models of real sources. |
| | 2.3 Equivalent Dipoles: conversion of sources.2.4 Association of resistors: concept of voltage divider and current divider |
| | 2.5 Association of resistors. Concept of voltage divider and current divider |
| | 2.6 Topological Concepts: knot, branch, bow and mesh. |
| | 2.7 Number and election of circular and nodal equations linearly |
| | independent. |
| | 2.8 Analyses by meshes and knots of circuits with resistors. |
| | 2.9 Topological Transformations. |
| | 2.10 Power and energy in resistors, ideal sources and real sources. |
| | 2.11 Fundamental theorems. |
| SUBJECT 3. ANALYSIS OF CIRCUITS WITH | 3.1 ideal Condenser: definition, representation and mathematical model. |
| ELEMENTS THAT STORE ENERGY | 3.2 magnetic Circuits: units, magnetic flow, strength magnetomotive and |
| | reluctance. 3.3 ideal Coil: definition, representation and mathematical model. |
| | 3.4 Association series and parallel of coils and capacitors. |
| | 3.5 Circuits with elements that store energy. Circuits RL, RC and RLC. |
| SUBJECT 4. ANALYSIS OF CIRCUITS IN | 4.1 Forms of periodic wave and values associated: sinusoidal wave. |
| *SINUSOIDAL STEADY-STATE REGIME | 4.2 Determination of the sinusoidal steady-state regime. |
| | 4.3 Response of the basic passive elements to sinusoidal excitations: |
| | concept of impedance and complex admittance. |
| | 4.4 Law of Ohm and axioms of Kirchhoff in sinusoidal steady-state regime. |
| | 4.5 Association of elements. |
| | 4.6 Analyses by knots and by meshes of circuits in sinusoidal steady-state |
| | regime. |
| | 4.7 Power and energy in sinusoidal steady-state regime. Instantaneous |
| | power, half or active power and energy in the passive elements: coils, capacitors, resistances and complex impedances. |
| | 4.8 Power and energy in the dipoles. Apparent power, reactive power and |
| | complex power. |
| | 4.9 Theorem of conservation of the complex power (theorem of |
| | Boucherot). |
| | 4.10 The power factor and his importance in the electrical systems. |
| | Correction of the power factor. |
| | 4.11 Measurement of the active and reactive power: wattmeters and |
| | varmeters. |
| | 4.12 Fundamental Theorems in sinusoidal steady-state regime. |
| SUBJECT 5: MAGNETIC ADJUSTMENTS | 5.1 Magnetic joined up coils: definitions, equations of flows, own and mutual inductances. Representations and mathematical models. |
| | mutual inductances, Representations and mathematical models |
| | |
| | 5.2 Analyses by meshes of circuits of alternating current with coils joined |
| SUBJECT 6. | 5.2 Analyses by meshes of circuits of alternating current with coils joined up. |
| • | 5.2 Analyses by meshes of circuits of alternating current with coils joined up.6.1 Introduction. Three-phase voltage system. Sequence of phases. |
| • | 5.2 Analyses by meshes of circuits of alternating current with coils joined up. 6.1 Introduction. Three-phase voltage system. Sequence of phases. 6.2 Generators and three-phase loads: star and triangle connections. |
| • | 5.2 Analyses by meshes of circuits of alternating current with coils joined up. 6.1 Introduction. Three-phase voltage system. Sequence of phases. 6.2 Generators and three-phase loads: star and triangle connections. Voltages and currents. |
| SUBJECT 6: BALANCED THREE-PHASE SYSTEMS | 5.2 Analyses by meshes of circuits of alternating current with coils joined up. 6.1 Introduction. Three-phase voltage system. Sequence of phases. 6.2 Generators and three-phase loads: star and triangle connections. Voltages and currents. 6.3 Equivalent transformations star-triangle. |
| • | 5.2 Analyses by meshes of circuits of alternating current with coils joined up. 6.1 Introduction. Three-phase voltage system. Sequence of phases. 6.2 Generators and three-phase loads: star and triangle connections. Voltages and currents. |
| • | 5.2 Analyses by meshes of circuits of alternating current with coils joined up. 6.1 Introduction. Three-phase voltage system. Sequence of phases. 6.2 Generators and three-phase loads: star and triangle connections. Voltages and currents. 6.3 Equivalent transformations star-triangle. 6.4 Analyses of balanced three-phase systems. Equivalent single-phase |
| BALANCED THREE-PHASE SYSTEMS | 5.2 Analyses by meshes of circuits of alternating current with coils joined up. 6.1 Introduction. Three-phase voltage system. Sequence of phases. 6.2 Generators and three-phase loads: star and triangle connections. Voltages and currents. 6.3 Equivalent transformations star-triangle. 6.4 Analyses of balanced three-phase systems. Equivalent single-phase circuit. 6.5 Power in balanced three-phase systems. Compensation of the power factor. |
| BALANCED THREE-PHASE SYSTEMS | 5.2 Analyses by meshes of circuits of alternating current with coils joined up. 6.1 Introduction. Three-phase voltage system. Sequence of phases. 6.2 Generators and three-phase loads: star and triangle connections. Voltages and currents. 6.3 Equivalent transformations star-triangle. 6.4 Analyses of balanced three-phase systems. Equivalent single-phase circuit. 6.5 Power in balanced three-phase systems. Compensation of the power factor. 7.1 Transformer and autotransformers. |
| BALÁNCED THREE-PHASE SYSTEMS | 5.2 Analyses by meshes of circuits of alternating current with coils joined up. 6.1 Introduction. Three-phase voltage system. Sequence of phases. 6.2 Generators and three-phase loads: star and triangle connections. Voltages and currents. 6.3 Equivalent transformations star-triangle. 6.4 Analyses of balanced three-phase systems. Equivalent single-phase circuit. 6.5 Power in balanced three-phase systems. Compensation of the power factor. 7.1 Transformer and autotransformers. 7.2 Rotational electrical machines: synchronous machine, asynchronous |
| BALÁNCED THREE-PHASE SYSTEMS SUBJECT 7. ELECTRICAL MACHINES | 5.2 Analyses by meshes of circuits of alternating current with coils joined up. 6.1 Introduction. Three-phase voltage system. Sequence of phases. 6.2 Generators and three-phase loads: star and triangle connections. Voltages and currents. 6.3 Equivalent transformations star-triangle. 6.4 Analyses of balanced three-phase systems. Equivalent single-phase circuit. 6.5 Power in balanced three-phase systems. Compensation of the power factor. 7.1 Transformer and autotransformers. 7.2 Rotational electrical machines: synchronous machine, asynchronous machine and DC machines. |
| BALÁNCED THREE-PHASE SYSTEMS SUBJECT 7. ELECTRICAL MACHINES | 5.2 Analyses by meshes of circuits of alternating current with coils joined up. 6.1 Introduction. Three-phase voltage system. Sequence of phases. 6.2 Generators and three-phase loads: star and triangle connections. Voltages and currents. 6.3 Equivalent transformations star-triangle. 6.4 Analyses of balanced three-phase systems. Equivalent single-phase circuit. 6.5 Power in balanced three-phase systems. Compensation of the power factor. 7.1 Transformer and autotransformers. 7.2 Rotational electrical machines: synchronous machine, asynchronous machine and DC machines. 1. Use of lab equipments. |
| BALÁNCED THREE-PHASE SYSTEMS SUBJECT 7. ELECTRICAL MACHINES | 5.2 Analyses by meshes of circuits of alternating current with coils joined up. 6.1 Introduction. Three-phase voltage system. Sequence of phases. 6.2 Generators and three-phase loads: star and triangle connections. Voltages and currents. 6.3 Equivalent transformations star-triangle. 6.4 Analyses of balanced three-phase systems. Equivalent single-phase circuit. 6.5 Power in balanced three-phase systems. Compensation of the power factor. 7.1 Transformer and autotransformers. 7.2 Rotational electrical machines: synchronous machine, asynchronous machine and DC machines. 1. Use of lab equipments. 2. Measures in resistive circuits. |

| Planning | | | |
|----------------------------|-------------|-----------------------------|-------------|
| | Class hours | Hours outside the classroom | Total hours |
| Laboratory practices | 20 | 10 | 30 |
| Problem solving | 10 | 10 | 20 |
| Autonomous problem solving | 0 | 20 | 20 |
| Lecturing | 22 | 44 | 66 |
| Essay questions exam | 4 | 0 | 4 |
| Practices report | 0 | 10 | 10 |

^{*}The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

| Methodologies | |
|----------------------------|---|
| | Description |
| Laboratory practices | It will be performed circuit assembly corresponding to the knowledges acquired in class of theory, or it will be seen in the laboratory complementary aspects not treated in the theoretical classes. |
| Problem solving | It will solved type problems and exercises in class of big groups and the student will have to solve similar exercises. |
| Autonomous problem solving | The student will have to solve on his own a series of exercises and questions of the matter proposed by the professor. |
| Lecturing | The professor will explain in the classes of big groups the contents of the matter. |

| Personalized attention | | | |
|---|--|--|--|
| Methodologies | Description | | |
| Problem solving | The professor will attend personally the doubts and queries of the students during the tutorial hours. | | |
| Laboratory practices The professor will attend personally the doubts and queries of the students during the tutorial hours. | | | |

| Assessment | | | | |
|----------------------------|---|---------------|---------------------------|-------------------------------|
| | Description | Qualification | Training Learn Resu | ing |
| Essay questions exam | They will realise a 'written final exam' that will cover the full contents of the subject. | 80 | B3 C10 | D2 D10 D14 |
| Practices report | It will be valued positively the realisation of a memory of each one of the practices of laboratory that will include: objectives, procedure followed, materials employed, results obtained and interpretation of them. The realisation of practices and the presentation of the memories are part of the process of continuous evaluation of the student. However, the students that have not realised the practices along the course, or wish to improve the mark obtained, will be able to opt to realise an additional written exam with questions regarding the development of the practices and to the educational contents explained during them. The value of this exam is the 20% of the final mark, in the same way as the continuous evaluation. | 20 | C10 | D2 D6 D10 D14 D17 |

Other comments on the Evaluation

For the second opportunity of June-July it is kept the qualification in the continuous evaluation obtained during the own course, without prejudice that, to the equal that at the earliest opportunity of December - January, can be surpassed by the realisation of the written exam additional that is proposed to this effect.

Each new enrolment in the subject supposes to put a zero the qualifications in the activities of continuous evaluation obtained in previous courses.

Ethical commitment:

It expects that the student presents a suitable ethical behaviour. In the case to detect a no ethical behaviour (copy, plagiarism, utilisation of unauthorised electronic devices, for example) it will be considered the student does not gather the necessary requirements to surpass the matter. In this case the global qualification in the present academic course will be of suspense (0.0).

It will not be allowed the utilisation of any electronic device during the proofs of evaluation except with explicit permission. The fact to enter an unauthorised electronic device in the classroom of examination will be considered reason of no surpass the matter in the current academic course and the global qualification will be of suspense (0.0).

Responsible professor by group:

Groups

T1 and T2 (theory and practise): EMILIO GONZALEZ ESTÉVEZ

T1 english (theory and practise): DANIEL VILLANUEVA TORRES

Recommendations

Other comments

It is very recommended that the students have sufficient knowledge of the algebra of the complex numbers, linear algebra, linear differential equations and have attended to the subject of Physics along the whole first course.

Requirements: To enrol in this matter it is necessary to have surpassed or be enrolled of all the matters of the inferior courses to the course in which it is situated this matter.
