General	The subject of Applied Electrotechnics has like gener			
description	study the Degree of Engineering in Industrial Techno			
	Machines so as to suplly him specific tools that allow			
	electric circuits so much in stable as in transitory regime. The subject is conceived to suplly knowledges,			
	objective and competitions that are necessary to board with guarantees other subjects of the courses 3º and 4º. To a suitable use of this subject and that do not suppose a additional effort for the student, would owe to			
	have studied previously the subjects of Bases of The			
	Il since we will give by imparted basic knowledges of	both subjects that	serve of startir	ng point stop the
	development of the Applied Electrotechnics.			

Competencies

Code

- B3 CG3 Knowledge in basic and technological subjects that will enable them to learn new methods and theories, and equip them with versatility to adapt to new situations.
- C22 CE22 Applied knowledge of electrical engineering
- D1 CT1 Analysis and synthesis.
- D2 CT2 Problems resolution.
- D6 CT6 Application of computer science in the field of study.
- D10 CT10 Self learning and work.
- D14 CT14 Creativity.
- D17 CT17 Working as a team.
- D19 CT19 Personal relationships.

Learning outcomes				
Expected results from this subject		Training and Learning		
		Res	ults	
Comprise the behavioural basic aspects of the electric circuits in front of a change of conditions	В3	C22	D1	
			D2	
			D6	
			D10	
			D14	
			D17	
			D19	

Dominate the available current techniques for it unbalanced	analysis of electric cii	cuits triphases balanced and	d B3 C22	D1 D2 D6 D10 D14 D17 D19
Know the techniques of measure and register of			B3 C22	D1 D2 D6 D10 D14 D17 D19
Purchase skills envelope the process of analysis foul	of electric circuits (tra	insformers) also in regime of	f B3 C22	D1 D2 D6 D10 D14 D17 D19
Contents				
Topic SUBJECT I: CIRCUITS OF THAT TRIPHASES. MEASURES. COMPENSATION. With this subject, intends that the student know to #analyze circuits triphases so much balanced how unbalanced. It initiates the subject with the basic concepts stop the analysis of circuits balanced. It continues with the unbalanced circuits, the different methods to measure the power and the compensation of power reactivates as well as the methods to determine the sequence of phases. It finalizes with an introduction to the symmetrical components. SUBJECT II: TRANSFORMERS With this subject, intends that the student know the constructive characteristics more *salientables of the transformers as well as determine his characteristic parameters and mai properties, as well as his utilization in the electric systems.	Circuits triphases Conversion of sou Analysis of circuits Power in circuits ti Analysis of circuits Determination of tenergy. Symmetrical comp Analogies between Introduction to the The transformer ic Operation of a train Equivalent circuit Essay in emptynes Fall of tension, los Autotransformers triphessays.	n electric and magnetic circular transformers: constructive deal: bases. Insformer real. Institute transformer is and in short-circuit of the ses and performance of a transformer of a transformer of a transformer of a transformer of a transformance of a transf	uits. aspects. real: fems an transformer.	d tensions.

Methodologies	Description
Master Session	The doubts and questions that can arise during the kinds and the personal work of the student will be resolved well *in *situ or during it time of tutorials. Also it will be possible to attention by means of the email stop the resolution of doubts.
Laboratory practises	The doubts and questions that can arise during the kinds and the personal work of the student will be resolved well *in *situ or during it time of tutorials. Also it will be possible to attention by means of the email stop the resolution of doubts.
Practice in computer rooms	The doubts and questions that can arise during the kinds and the personal work of the student will be resolved well *in *situ or during it time of tutorials. Also it will be possible to attention by means of the email stop the resolution of doubts.
Troubleshooting and / or exercises	The doubts and questions that can arise during the kinds and the personal work of the student will be resolved well *in *situ or during it time of tutorials. Also it will be possible to attention by means of the email stop the resolution of doubts.

Assessment			
	Description	Qualification	on Training and Learning Results
Long answer tests and development	(*)Evaluación continua (100%): Ao final de cada tema o alumno realizará unha proba que se cualificará de 0 a 10 puntos, alcanzándose o aprobado con un 5. Na proba valoraranse cuestións teóricas e exercicios prácticos. En cada proba o alumno poderá alcanzar un 50% da nota final. As probas parciais aprobadas son liberatorias da parte correspondente no exame final. Os alumnos que superen tódalas probas, a nota final será a media ponderada das notas das probas parciais Para os alumnos que suspendan ou non se presenten a algunha ou tódalas probas parciais realizarán un examen final na convocatoria oficial que se cualificará de 0 a 10 puntos. Para superala materia é necesario alcanzar unha nota mínima de 3 puntos en cada tema. Os alumnos aprobados por probas parciais poden modificala nota presentándose tamén á proba final. No exame indicarase as datas e lugares de publicación das cualificacións e das revisións. Compromiso ético: Espérase que o alumno presente un comportamento ético axeitado. No caso de detectar un comportamento non ético (copia, plaxio, utilización de aparatos electrónicos non autorizados, e outros) considerarase que alumno non reúne os requisitos necesarios para superar a materia. Neste caso a cualificación global no presente curso académico será de suspenso (0.0)	3	B3 C22 D1 D2 D6 D10 D14 D17 D19

Other comments on the Evaluation

The student only has to realize in the second announcement the mid-terms no surpassed in the first. The final result calculates of the even way that in the first announcement
