Universida_{de}Vigo

Subject Guide 2023 / 2024

IDENTIFYIN	G DATA				
Basin Analy	sis				
Subject	Basin Analysis				
Code	V10G061V01406				
Study	Grado en Ciencias				
programme	del Mar				
Descriptors	ECTS Credits		Choose	Year	Quadmester
	6		Optional	4th	2nd
Teaching	#EnglishFriendly				
language	Spanish				
Department					
Coordinator	García Gil, María Soledad				
Lecturers	Diz Ferreiro, Paula				
	García Gil, María Soledad				
	Pérez Arlucea, Marta María				
E-mail	sgil@uvigo.es				
Web	http://http://webs.uvigo.es/c10/web	c10/			
General	This matter allows the introduction	to the analysis o	f sedimentary basir	ns and of the i	interpretation of the
description	history of his filling using technical	multidisciplinary.			

English Friendly subject: International students may request from the teachers: a) resources and bibliographic references in English, b) tutoring sessions in English, c) exams and assessments in English.

Training and Learning Results

Code

- A3 Students have the ability to gather and interpret relevant data (usually within their field of study) to inform judgments that include reflection on relevant social, scientific or ethical issues
- A4 Students can communicate information, ideas, problems and solutions to both specialist and non-specialist audiences
- A5 Students have developed those learning skills that are necessary for them to continue to undertake further study with a high degree of autonomy
- B1 Know and use vocabulary, concepts, principles and theories related to oceanography and apply everything learned in a professional and/or research environment.
- B4 Manage, process and interpret the data and information obtained both in the field and in the laboratory.
- B5 Develop, implement and write basic or applied projects in oceanography from a multidisciplinary perspective.
- C13 Acquire the basic sedimentological, geochemical and geophysical techniques and methodologies used in identification, use and sustainability of the natural resources of coastal and marine environmets.
- C14 Know basic concepts and events of global change obtained from geological records.
- D1 Develop the search, analysis and synthesis of information skills oriented to the identification and resolution of problems.
- D5 Sustainability and environmental commitment. Equitable, responsible and efficient use of resources.

Expected results from this subject						
Expected results from this subject		Training and Learning Results				
Transmit information of form written, verbal and graphic for audiences of diverse types	A4 A5	B1 B5	C14	D1		
Caracterice and mapping of marine bottoms, marine sub-bottoms and coastal areas-continental	A3	B4 B5	C13	D1 D5		
Interpretation of paleoceanographic proxies		B1 B5	C14	D1		

Contents

Topic

SUBJECT 1. INTRODUCTION TO THE ANALYSIS OF BASINS	 1.1. Definitions. Sedimentary basins. Classification 1.2. Origin and evolution of the oceanic basins 1.3. Interest and applications of the analysis of basins
SUBJECT 2. EXTERNAL AND INTERNAL FACTORS	2.1. Tectonics, Climate, Supply and Sea-level changes
CONTROLLING THE EVOLUTION OF THE	2.2. Sequential stratigraphy: Types of sections, 3D architecture of facies
SEDIMENTARY BASINS	and correlation criteria
SUBJECT 3. DATING METHODS	3.1. Introduction to dating methods.
SUBJECT 4. SEISMIC STRATIGRAPHY	4.1. Sedimentary discontinuity surfaces: Criteria of recognition
	4.2. System tracks in the cycle of se-level oscillation
	4.3.Sequences and models of sequences.
SUBJECT 5. PALEOCEANOGRAPHY AND	5.1. Palaeoceanography and plaeoclimatology proxies
PALAEOCLIMATOLOGY	5.2. Natural mechanisms of climatic and oceanographic changes

Planning

	Class hours	Hours outside the classroom	Total hours
Lecturing	18	36	54
Case studies	20	0	20
Seminars	14	14	28
Presentation	0	48	48
*The information in the planning tak	le is for guidance only and does no	ot take into account the het	erogeneity of the students.

Methodologies	
	Description
Lecturing	Presentations of the theoretical concepts that allow the students to adquire or improve the skills to perform the analysis of sedimentary basins. This involves the relationship of multidisciplinary theoretical concepts.
	It can be possible to get 1 extra point in the final mark by participation in classroon discussions.
Case studies	Each student will have several real seismic profiles corresponding to a sedimentary basin. They will have to perform the interpretation of each one and to perform a resumen of each practical.
Cominara	(Assistance and reports are mandatories, 30% of the mark)
Seminars	sedimentary basins types in different marine contexts, stratigraphic surfaces. (Assistance and reports are mandatories, 30% of the mark)
Presentation	It is mandatory that each student will have to elaborate an individual report explaining the evolution of the basin based on the interpretation of the seismic records worked on in the practicals. (30% of the mark)

Personalized assistance Methodologies Description

Methodologies	Description
Lecturing	Students that wish it will be able to attend to personalized tutorials to resolve doubts, mainly in the indicated schedules. To optimize time, it is necessary that the student to contact with the lecturer previously. The tutorials will be able to be individual or in group in accordance with the schedules of the lecturer: Prof. Soledad García Gil (Tuesday and Thursday: 11 - 14 h) that would be modified according to educational needs.
Seminars	Students that wish it will be able to attend to personalized tutorials to resolve doubts, mainly in the indicated schedules. To optimize time, it is necessary that the student to contact with the lecturer previously. The tutorials will be able to be individual or in group in accordance with the schedules of the lecturer: Prof. Soledad García Gil (Tuesday and Thursday: 11 - 14 h) that would be modified according to educational needs.
Case studies	Students that wish it will be able to attend to personalized tutorials to resolve doubts, mainly in the indicated schedules. To optimize time, it is necessary that the student to contact with the lecturer previously. The tutorials will be able to be individual or in group in accordance with the schedules of the lecturer: Prof. Soledad García Gil (Tuesday and Thursday: 11 - 14 h) that would be modified according to educational needs.
Presentation	Students that wish it will be able to attend to personalized tutorials to resolve doubts, mainly in the indicated schedules. The tutorials will be able to be individual or in group in accordance with the schedules of the lecturer: Prof. Soledad García Gil (Tuesday and Thursday: 11 - 14 h) that would be modified according to educational needs.

Assessme	nt					
	Description	Qualificatio	n Ti	raining I	i and Le Results	arning
Case studie	sSequential seismic analysis of a sedimentary basin from the interpretation of seismic records and profiles.	30	A3	B4	C14	D1
Seminars	Reports of Seminars	40	A5	B1 B5	C14	D1 D5
PresentationEach student will have to elaborate an individual report explaining the evolution of the basin based on the interpretation of the seismic records worked on in the practicals. (30% of the mark)		30	A3	B4	C14	D1

Other comments on the Evaluation

Continuous assesment option

The student will be evaluated continuously and based on the delivery of the reports corresponding to the case studies, seminars and practicals in the percentages described. Given the experimental nature of the seminars and practicals, attendance is compulsory.

Attendance and participation in the discussions of the theoretical classes can mean 1 extra point in the final mark.

Global assesment option

The same percentages indicated above will be maintained. However, given the experimental nature of the seminars and practicals, non-attendace without justification invalidates this option, as well as the extraordinary evaluation.

The application for this evaluation option must be submitted in the time and manner determined by the Center, which will be published prior to the academic start.

Other considerations

Dates and times for reports will be published in https://mar.uvigo.es/alumnado/asignaturas-y-horarios/

Students are strongly requested to fulfil a honest and responsible behaviour. It is considered completely unacceptable any alteration or fraud (i.e., copy or plagiarism) contributing to modify the level of knowledge and abilities acquired in exams, evaluations, reports or any kind of teacher proposed work. Fraudulent behaviour may cause failing the course for a whole academic year. An internal dossier of these activities will be built and, when reoffending, the university rectorate will be asked to open a disciplinary record.
